Digital and Social Media Marketing IGI Global

Mobile business expands rapidly. The increasing number of Internet-enabled devices is creating an ecosystem with almost endless possibilities. In order to survive in this emerging ecosystem, companies have to implement new applications and take many actions and adaptations. In fact, this need for innovation affects nearly every online business. Denise Gaber examines transactions in local shops made through payment applications on customers' smartphones, the so-called Proximity Mobile Payment Systems. She also explains the trend of proximity mobile payment and its rapid development in China compared to the low adoption rate in Austria, Germany and Switzerland. How can mobile payment be implemented successfully? Gaber gives a SWOT analysis to indicate obstacles and to plan implementation and business strategies. As best practices she examines companies like WeChat Wallet and Alipay. Her findings are based on a profound analysis of the markets of Germany, Austria, Switzerland and China. In this book: - app; - e-commerce; - m-commerce; - mobile commerce; - m-payment

Electromechanical Control Technology and Transportation International Science Group

The discipline of technology management focuses on the scientific, engineering, and management issues related to the commercial introduction of new technologies. Although more than thirty U.S. universities offer PhD programs in the subject, there has never been a single comprehensive

resource dedicated to technology management. "The Handbook of Technology Management" fills that gap with coverage of all the core topics and applications in the field. Edited by the renowned Doctor Hossein Bidgoli, the three volumes here include all the basics for students, educators, and practitioners

Managing E-commerce in Business IGI Global

The 2017 2nd International Conference on Electromechanical Control Technology and Transportation (ICECTT 2017) was held on January 14-15, 2017 in Zhuhai, China. ICECTT 2017 brought together academics and industrial experts in the field of electromechanical control technology and transportation to a common forum. The primary goal of the conference was to promote research and developmental activities in electromechanical control technology and transportation. Another goal was to promote exchange of scientific information between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year thus making it an ideal platform for people to share views and experiences in electromechanical control technology and transportation and related areas.

Innovations in Digital Economy Prentice Hall Professional

Web Systems Design and Online Consumer Behavior takes an interdisciplinary approach toward systems design in the online environment by providing an understanding of how consumers behave while shopping online and how certain system design elements may impact consumers' perceptions, attitude, intentions, and actual behavior. This book contains theoretical and empirical research from expert scholars in a number of areas including communications, psychology, marketing and advertising, and information systems. This book provides an integrated look at the subject area as described above to further our understanding of the linkage among various disciplines inherently connected with one another in electronic commerce.

Inhaltsangabe:Abstract: The object of research is electronic commerce as an instrument of new economy which has gained a foothold in the western business practice and is developing in Ukraine at a furious pace. The subject of the research is organizational, structural and functional development of e-commerce. The purpose of the thesis is, basing on the analysis of current state of electronic commerce in the world and Ukraine, to estimate the its prospects for doing business internationally and to develop recommendations for a Ukrainian company X which considers the possibility of introducing e-commerce business models into its business practice. The information data of the thesis are based on official statistical reports, current web-archives of research and statistical Internet-companies, national Boards of Statistics, Organization of Economic Cooperation and Development, publications on e-business and e-commerce issues, economic literature from the funds of the scientific library of Otto-von-Guericke University (Magdeburg, Germany). The thesis applies the method of scientific abstractions, cause-effect and functional analysis to understand the mechanism of electronic commerce and its place within the electronic business framework; comparative statistical analysis to study the state of the art in the electronic commerce in the world and in Ukraine, SWOT-analysis to define the strategic potential of electronic commerce; economic-mathematical simulation to estimate the efficiency of the Internet shop for the business activity of the company «?». The thesis describes the Internet as an environment for doing business, defines the concept of e-commerce, its components, advantages, costs and challenges. It considers the peculiarities of studying international e-commerce, its dynamics in the world and in Ukraine, analyses factors that influence its development in transitional economies. The thesis gives classification of business-models for electronic commerce and provides calculations proving the efficiency of the Internet shop as the simplest and most available business model for a Ukrainian company that considers a possibility to launch e-commerce initiative including the international business activity. Calculations prove that introduction of the Internet shop contributes to increasing the efficiency of the business activity, to improving customer service quality and strengthening the company competitiveness in the home and foreign [...]

Handbook of Research on Innovation and Development of E-Commerce and E-Business in ASEAN Horizon Books (A Division of Ignited Minds Edutech P Ltd)

By introducing a balanced scorecard to work out a management strategy in the viewpoint which is the optimal for the whole and to promote the strategy management which is useful for the performance evaluating, it shows the power to be outstanding in to the business management. It is the one which is useful of a lifestyle of a life design by the office worker to design tactically in addition to showing an effect in the business reform and the performance evaluating and to visualize them. This manual is the introduction to have introduced the know-how which utilizes a balance scorecard practicing-ly to. To apply a balanced scorecard in the place of the business management practicing-ly, the training to learn much near case study from after understanding the basic logic practicing-ly is valid. In the design of the balanced scorecard, their basic structure and the feature must be understood about the management vision, KGI, KPI, SWOT, the strategy mapping. Therefore, in 10 case studies which are useful for the business

management reform and the skill improvement, the training which creates KGI, KPI, SWOT analysis, strategy mapping in the unaided in the balanced scorecard can be experienced. It adopts the composition as the skill which masters a balanced scorecard can be acquired by checking the balanced scorecard to have designed in the unaided of with the specific solution example. Let's introduce the composition of this manual. Chapter 1 is introducing the basic logic of the balanced scorecard. The individual is introducing the practice step of the balanced scorecard which consists of 7 steps. Chapter 2 explains the point of the basic structure, the way of thinking, the approach of the tool which composes a balanced scorecard in detail and introduces the step to create actually using the training sheet. Well, it takes up the many case studies which seem to encounter in the daily life to attempt for the skill as the office worker to improve and to acquire the skill which can play an active part by the business management reform. Well, as the practice theme about the business management reform, it is preparing case study resemblance by the management problems such as the earning capacity reinforcement and the cost reduction, the product competition power reinforcement. Digital and Social Media Marketing: A Results-Driven Approach is an exciting new industry-led, research-informed and results-driven guide to digital commerce. Its examples draw from SMEs and from Europe to offer a unique perspective for those learning about digital marketing and, having been developed in close collaboration with the Search Engine Marketing Trade Association (SEMATA), it is a reliable source of prevailing industry standards for practitioners at the cutting edge of their trade. Unlike other digital marketing texts, this accessible textbook gives special consideration to the ethical challenges raised by an increasingly digital world. Equally unique is the book's Digital Business Maturity Model, which offers organisations a clear roadmap for understanding their relative levels of technology adoption. Embracing the true spirit of Digital and Social Media Marketing, the book will be the first of its kind in this field with digital learning materials, case studies and exercises available in a supporting Massive Open Online Course (MOOC). The MOOC will enhance learners' experience and create an interactive international learning community. This book will provide a hands on, accessible and user friendly platform to turn skills and knowledge into strategic advantage. Ideal for postgraduate learners, instructors interested in providing a unique and up-to-date learning experience and for SMEs and practitioners aiming to be at the cutting edge of Digital and Social Media Marketing.

Policies of Electronic Commerce: Challenges and Development IGI Global

Recently, there has been an increase in the number of e-commerce users. This has caused online shopping to become a new and challenging market for e-commerce vendors. Security, inventory management, reliability, and performance of e-commerce websites are a few of the challenges associated with the rising popularity of e-commerce. On a daily basis, millions of e-commerce transactions are taking place. This generates a huge amount of data that can be used to solve the various challenges of e-commerce. Further study on how this data can be used to address these issues is required to propel businesses forward. Empirical Research for Futuristic E-Commerce Systems: Foundations and Applications shares experiences and research outcomes on all aspects of intelligent software solutions such as machine learning, nature-inspired computing, and data science for business-to-consumer (B2C) e-commerce. By looking at the exponential growth of the e-commerce market and its popularity, this book also focuses on the current issues, solutions, and future possibilities in the B2C model of e-commerce. Covering a range of critical topics such as online shopping, supply chain management, and blockchain, this reference work is ideal for academic scientists, data scientists, software developers, business experts, researchers, scholars, practitioners, academicians, instructors, and students.

ACCA P3 Business Analysis BPP Learning Media

Business-to-consumer (B2C) and consumer-to-consumer (C2C) e-commerce transactions, including social commerce, are rapidly expanding, although e-commerce is still small when compared to traditional business transactions. As the familiarity of making purchases using smart devices continues to expand, many global and regional investors hope to target the ASEAN region to tap into the rising digital market in this region. The Handbook of Research on Innovation and Development of E-Commerce and E-Business in ASEAN is an essential reference source that discusses economics, marketing strategies, and mobile payment systems, as well as digital marketplaces, communication technologies, and social technologies utilized for business purposes. Featuring research on topics such as business culture, mobile technology, and consumer satisfaction, this book is ideally designed for policymakers, financial managers, business professionals, academicians, students, and researchers.

PESTLE Analysis Educreation Publishing

The continued advancement of globalization, increases in internet connectivity, compatibility of international payment systems, and adaptability of logistics and shipping processes have combined to contribute to the rapid growth of the cross-border e-commerce market. Due to these advancements and the ubiquitous presence of smartphones, consumer use of cross-border e-commerce is increasingly simplified, and thus, sellers are hardly restricted to a specific country in terms of promoting, selling, and shipping goods worldwide. The burgeoning opportunities, habits, and trends of shopping on cross-border e-commerce platforms have expedited the prospect of becoming a presence in the global market. This is true for enterprises of all sizes, especially for small? and medium?sized enterprises (SMEs) that want to add their footprint in the international market for the first time. Like any other industry, cross-border e-commerce has its specific economics and driving forces, but has different scopes, challenges, and trends due to the geographic and cultural expanse of relevant environments. Cross-Border E-Commerce Marketing and Management was conceptualized by identifying the scope of new complementary information with a comprehensive understanding of the issues and potential of cross-border e-commerce businesses. The authors believe that this book will not only fill the void in the current research but will also provide far-sighted vision and strategies, as it covers big data, artificial intelligence, IoT, supply chain management, and more. This book provides the necessary knowledge to managers to compete with the competitive market structure and ultimately contribute to the sustainable economic growth of a country. It works as a guideline for existing cross-border e-commerce managers to formulate individual strategies that combine to optimize the industry while keeping the enterprise competitive. This book is useful in both developed and developing country contexts. This publication is an ideal resource for

academicians, policy makers, stakeholders, and cross-border e-commerce managers, especially from SMEs.

We focus on concepts that will help you understand and take advantage of the evolving world of opportunity offered by e-commerce, which is dramatically altering the way business is conducted and driving major shifts in the global economy. Chapter 1 and 2 discuss about the basic concepts of e-commerce and e-business strategy. Chapter 3 describes different types of e-commerce technology. This chapter also tells us about the emerging e-commerce technology innovations. Chapter 4 depicts various types of e-business models and markets. Chapter 5 discuss about the mobile electronic commerce. Chapter 6 tells about the mobile commerce, mobile enterprise solutions and ubiquitous computing. Chapter 7 tells about the security parameters used in e-commerce and fraud issues and why protection in e-commerce is required. Chapter 8 depicts payment system used in electronic commerce like smart cards, micropayments, e-checking, mobile payments etc. Chapter 9 ensures about the E-Commerce Regulatory, Ethical, and Social Environments. Electronic commerce and m-commerce is a business model in which transactions take place over electronic networks, mostly the Internet. It includes the process of electronically buying and selling goods, services, and information. Certain EC and m-commerce applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trade volumes. However, EC and m-commerce is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, customer service, e-government, social networks, and much more. EC and m-commerce is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people.
