An introduction to the philosophical, economic, historical, feminist, and cultural versions of post-Marxist theory.

An Agenda for Critical Theory Macmillan International Higher Education

In this brilliant critique, Terry Eagleton explores the origins and emergence of postmodernism, revealing its ambivalences and contradictions. Above all he speaks to a particular kind of student, or consumer, of popular "brands" of postmodern thought.

The Postmodern History Reader Against Postmodernism Marxist Critique

Is regarded as the most important response to the philosophies of desire, as expounded by thinkers such as de Sade, Nietzsche, Bataille, Foucault and Deleuze and Guattari. It is a major work not only of philosophy, but of sexual politics, semiotics and literary theory, that signals the passage to postmodern philosophy.

The Revenge of History is a frontal assault on the widely accepted idea that the East European revolutions of 1989 mark the death of socialism. Alex Callinicos seeks to vindicate the classical Marxist tradition by arguing that socialism in this tradition can only come from below, through the self-activity of the working class.

Stalinism from this standpoint was a counterrevolution, erecting at the end of the 1920s a state capitalist regime on the ruins of the radically democratic socialism briefly achieved in October 1917. Callinicos argues that the collapse of Stalinism at the end of the 1980s is one aspect of a worldwide transition from nationally organized to globally integrated capitalism. The result is likely to be greater economic and political instability. Against this background socialism--in Marx's sense--is all the more necessary. Callinicos contends that Marx's vision of a classless communist society would be both practically feasible and profoundly democratic. He concludes that the collapse of Stalinism should be

less the moment to abandon socialism than to resume unfinished business.

Lyotard, Derrida, Foucault, Deleuze Psychology Press

Marxism and History examines Marxism's enormous impact on the way historians approach their subject. Tackling current historiographical questions in a lively, jargon-free way, Matt Perry offers a concise introduction to: Marxist views of history; key Marxist historians and thinkers; and the relevance of Marxist theory and history to students' own work.

The Marxist Critique of Market Despotism Beyond Postmodernism Aakar Books

We are living in a time of resurgent global conflicts and imperialistic tensions-a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education. The efforts of countless teachers, activists, and families working and living in poor areas around the world are labeled as failures, entirely discredited on the basis of their expendability in relation to capital gains, or simply ignored. In response to these oppressive and challenging conditions, this book's contributors-a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders-have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations. In a clear attempt to move beyond both nostalgia and romanticism, *Critical Theories, Radical Pedagogies, and Global Conflicts* draws from a range of viewpoints-conceptual and thematic, transnational and crosscultural, First World and Third World-to articulate new directions for teachers and activists working to demonstrate that another education, and indeed, another world, is possible.

The 'Postmodern Turn' in the Social Sciences Routledge

This book sheds a radical light on the issue of race, showing that social and racist discourses are ideological and political mystifications masking exploitation. It deals with substantive issues that have the potential to enhance our understanding how Marxist theory can be quite useful in interpreting the race

paradigm.

Prodigiously influential, Jacques Derrida gave rise to a comprehensive rethinking of the basic concepts and categories of Western philosophy in the latter part of the twentieth century, with writings central to our understanding of language, meaning, identity, ethics and values. In 1993, a conference was organized around the question, 'Whither Marxism?', and Derrida was invited to open the proceedings. His plenary address, 'Specters of Marx', delivered in two parts, forms the basis of this book. Hotly debated when it was first published, a rapidly changing world and world politics have scarcely dented the relevance of this book.

Against the Market Springer

Written by renowned British and American educational theorists, *Marxism Against Postmodernism in Educational Theory*—a substantially revised edition of the original 1999 work—examines the infusion of postmodernism and theories of postmodernity into educational theory, policy, and research.

Marx and the Postmodernism Debates University of Chicago Press
Marx is out of fashion in intellectual circles on the whole but he is increasingly seen as an astute guide to the spread of a new raw capitalism worldwide. This book is not a scholastic Marxology, but a provocative survey of Marxism in the context of key issues in ecology, culture, feminism, development, and nationalism.

A Marxist Critique Rowman & Littlefield

What does postmodernism mean for the future of history? Can one still write history in postmodernity? To answer questions such as these, Ernst Breisach provides the first comprehensive overview of postmodernism and its complex relationship to history and historiography. Placing postmodern theories in their intellectual and historical contexts, he shows how they are part of broad developments in Western culture. Breisach sees

postmodernism as neither just a fad nor a universal remedy. In clear and concise language, he presents and critically evaluates the major views on history held by influential postmodernists, such as Derrida, Foucault, Lyotard, and the new narrativists. Along the way, he introduces to the reader major debates among historians over postmodern theories of evidence, objectivity, meaning and order, truth, and the usefulness of history. He also discusses new types of history that have emerged as a consequence of postmodernism, including cultural history, microhistory, and new historicism. For anyone concerned with the postmodern challenge to history, both advocates and critics alike, *On the Future of History* will be a welcome guide.

Post-ality Polity

This book traces the crystallisation of post-Marxism as a specific theoretical position in its own right and considers the role played in its development by post-structuralism, postmodernism and second-wave feminism. It examines the history of dissenting tendencies within the Marxist tradition and considers what the future prospects of post-Marxism are likely to be.

Libidinal Economy Routledge

This book provides a critical analysis of classical and contemporary social theory from a class perspective. It is concise, lucid, and well written.

A Marxist Critique Springer

The migration of cynical academic ideas about postmodernism into music journalism are traced in this book. The result of this migration is a widespread fatalism over the ability of the music industry to absorb any expression of defiance in popular music. The book synthesizes a number of fields: American and British academic and journalistic music criticism; aesthetic and literary history and theory from romanticism through postmodernism; alternative music such as feminist punk and grunge; political economy, which has fueled the obsession with commercial incorporation; and subcultural sociology.

Postmodernism, Or, The Cultural Logic of Late Capitalism SUNY Press

In this clear, jargon-free guide, Willie Thompson provides a concise introduction to postmodernist theory and its significant impact on the study of history. Although this is a hotly-debated topic, with much of the current literature being both polemical and inaccessible to the beginner, Thompson offers

straightforward explanations of complex concepts and shows how the debates are relevant to students' own work. *Postmodernism and History*: - considers the origins of postmodernism in both the ideas of poststructuralist thinkers, particularly Michel Foucault, and the political and cultural developments of the late 20th century - explores themes such as the treatment of historical evidence, problems of historical representation, feminist history, ethical judgements on past events, and the validity of metanarrative or long-term historical explanation - discusses critically the work of a number of current and recent practicing historians - including Joan Scott, Roy Porter, Patrick Joyce and James Vernon - who have used postmodernist ideas in their writing - enquires how far postmodern thought has been absorbed into mainstream historiography

Marx Through Post-Structuralism presents a thorough critical examination of the readings of Marx given by four post-structuralist thinkers, all key figures in Continental philosophy: Jean-François Lyotard, Jacques Derrida, Michel Foucault, and Gilles Deleuze. Arguing that both Marx and the post-structuralists seek to produce a genuinely materialist philosophy, the author aims to develop a better understanding of both Marx and post-structuralism and in so doing to reflect on the possibilities and problems for materialist philosophy more broadly. Against the common assumption that post-structuralism begins with a rejection of Marx, Choat argues that Marx has been a key influence on post-structuralist thought and that each of the four thinkers examined affirms Marx's contemporary significance. By looking at how these thinkers have read Marx - analysing their direct comments, unspoken uses, and implicit criticisms - the book demonstrates that there is a distinct and original post-structuralist approach to Marx that allows us to read him in a new light.

An Introduction to Classical and Contemporary Social Theory Mehring Books, Incorporated

The 2008 financial crisis revitalised the question of whether capitalism was working and how it might be overturned. More recently, the growth of new social movements across the globe are posing a threat to the economic and political status quo, with Marxist ideas rejuvenated for the 21st century. In this provocative and critically engaged introduction, Ronaldo Munck applies Marx's

theories to the most pressing issues of our times: the environmental crisis, austerity, international development, religion, nationhood, the role of women and LGBTQ+ communities. Crucially, he shows the far-reaching contribution Marx can make to both contemporary debate and political action. Accessible and wide-ranging, *Marx 2020* is essential reading for anyone interested in the state of the modern world and the ideas needed for effective change.

Marx Through Post-Structuralism Macmillan International Higher Education

Matthew Flisfeder introduces readers to key concepts in postmodern theory and demonstrates how it can be used for a critical interpretation and analysis of *Blade Runner*, arguably 'the greatest science fiction film'. By contextualizing the film within the culture of late 20th and early 21st-century capitalism, Flisfeder provides a valuable guide for both students and scholars interested in learning more about one of the most significant, influential, and controversial concepts in film and cultural studies of the past 40 years. The "Film Theory in Practice" series fills a gaping hole in the world of film theory. By marrying the explanation of film theory with interpretation of a film, the volumes provide discrete examples of how film theory can serve as the basis for textual analysis. *Postmodern Theory and Blade Runner* offers a concise introduction to Postmodernism in jargon-free language and shows how this theory can be deployed to interpret Ridley Scott's cult film *Blade Runner*.

Marxism Against Postmodernism in Educational Theory Verso

The Poverty of Postmodernism rejects the current celebration of knowledge and value relativism. This is on the grounds that it renders critical reason and commonsense incapable of resisting the superficial ideologies of minoritarianism that leave the hard core of global capitalism unanalyzed. In this book John O'Neill examines the postmodern turn in the social sciences. From a phenomenological standpoint (Husserl, Merleau Ponty, Schutz, Winch), he challenges Lyotard's post-rationalist reading of Wittgenstein and Habermas in order to defend commonsense reason and values that are constitutive of the everyday life-world. In addition he argues from the standpoint of Vico and Marx on the civil history of embodied mind that the post-rationalist celebration of the arts of superficiality undermines the recognition of the cultural debt each generation owes to past and post-generations.

In a positive way O'Neill develops an account of the historical vocation of reason and of the charitable accountability of science institutions of civic democracy. to commonsense that is necessary to sustain the basic
