In anesthesiology, pain medicine, and critical care, practitioners at all levels need help to stay current with the continually evolving drug knowledge-base and trainees need tools to prepare for in-training and board exams that increasingly test their knowledge of pharmacology. This practical book is aimed at both readerships. It features a unique and practical chapter on the United States Food and Drug Administration (FDA) "black box" warnings

that describe what safety precautions should be taken with commonly used drugs. The editors and contributors are pharmacology experts representing a cross-section of clinical specialties and institutions in the United States and include pharmacologists, pharmacists, as well as physicians.

Pharmacology: An Essential Textbook Springer

Pharmacology can be difficult. But with the right text, understanding drugs and how they work doesn't have to be! Using easy-to-follow language and engaging learning tools - like Memory Joggers, Clinical Pitfalls, Do Not Confuse, and Drug Alerts - the second edition of Understanding Pharmacology: Essentials for Medication Safety helps readers really understand how drugs work. In addition to the popular critical thinking activities from the first edition, the second edition also includes more chapter review questions, updated content, and a new organization that centers on the different body systems. For students who have a limited background in the sciences and want complete preparation for licensure exams and clinical practice, there is no better choice than Understanding Pharmacology, 2nd Edition! Entire unit reviewing math, weights and measures, and dosage calculation minimizes readers' anxiety and promotes medication safety. Clever, easy-to-recognize margin icons help visual learners remember essential side effects of drugs. Simplified heading structure replaces intimidating terminology (i.e. pharmacokinetics) with simplified language (How These Drugs Work) to increase understanding of concepts. Drug Alert!, Do-Not-Confuse, and Clinical Pitfall boxes highlight important tips for safe medication administration. Memory Jogger boxes help readers remember important drug information. Get Ready for Practice sections at the end of each chapter include key points, chapter review questions, and critical thinking activities to reinforce learning. 10th grade reading level uses straightforward,

everyday language to really enhance readers' understanding of pharmacology concepts. Incorporation of adult learning theory features both a simple to complex organization of material along with answers to why readers need to learn something. NEW! Body system organization helps readers better understand drugs that are specific to particular body systems. NEW! More chapter review questions have been added to the text. All review questions are now organized into one of two categories: Test Yourself on the Basics and Test Yourself on Advanced Concepts.

This ideal starter text for student nurses in pharmacology is now into its 4th edition. It makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to safely and competently practice as a newly qualified nurse. Praised for its helpful layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way, without assuming previous knowledge or a level of confidence in numeracy. This new edition has been carefully expanded to include new chapters on cardiovascular pharmacology and chemotherapy in cancer nursing. There are more details on drugs used in chronic and long-term conditions applied to nursing competencies and standards. It incorporates the new 2018 NMC standards for nursing education and links to practice guidelines. Additional case scenarios have been added spanning all areas of practice and include adult, elderly care, child, mental health and learning disability applications. This allows nurses to apply their knowledge to a range of different people with varying and complex needs to enhance their application to practice. The book contains: • 120 calculations and 130 multiple choice questions to assist you in assessing your learning as you work through each chapter • Clinical tips boxes linking pharmacology to nursing practice • 50 person centred case scenarios across a range of practice settings • References to key standards and guidelines "The book also emphasises the application of the principles of pharmacology to all areas of practice and includes; drug action, drug interactions, side effects and adverse reactions. It is useful for all pre-registration students and those on post qualifying or continuing professional development courses where pharmacology is a component. Overall, this book is an excellent resource for healthcare students that will support their learning throughout their training and beyond. It covers fundamental concepts of how the major classes of medications exert their therapeutic effect, but also how side effects and adverse reactions can occur. Chapters on legal aspects of medication administration and drug calculations enhance this usefulness of this book – all of which are supported by example questions, calculations and clinical 'tips'. This book has been fully updated to reflect the 2018 NMC standards and as such provides a one-stop shop for any students studying safe administration of medications." Dr Andy Powell, Physiology Lead for Nursing Birmingham City University "The outlay of the chapters is easily navigated and the level of the knowledge that the book starts at is at a basic level enough for any student nurse from year 1-3 to start with and builds in complexity. They are in lovely bite-size chunks that are easy to read and easily understood. The 10 MCQ's at the end of a chapter are a very useful method of chapter consolidation and the case studies further reinforce learning." Georgina Cox, Senior Lecturer in Adult Health Middlesex University Deborah Robertson is a lecturer in nursing at the University of Salford. She teaches on the pre-registration nursing curriculum as well as being involved in post graduate education. She is also author of *Essentials of Medicines Management for Mental Health Nurses*. Paul Barber was a Senior Lecturer at the University of Chester. He is co-author of *Further Essentials of Pharmacology for Nurses* (2012) and contributor and editor of *Medicines Management for Nurses: Case Book* (2013), all Open University Press. He is now retired.

This ideal starter text for student nurses makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to practice as a newly qualified nurse. Noted for its clear layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way. The book does not assume previous knowledge of pharmacology, or a level of confidence with maths and drugs calculations. This new edition has been carefully expanded to include a new chapter introducing drug calculations and measurements as well as more detail on drugs used in chronic conditions, as well as more on pharmacology for the older patient and for other specific groups such as children, pregnant women or those with minor illness. More case scenarios have been added to encourage nurses to apply knowledge to a range of different people with a range of needs. The book contains: 90 calculations and 100 multiple choice questions to help perfect your skills and assess learning Clinical tip boxes linking pharmacology to the role of the nurse 35 patient scenarios across a range of clinical settings References to key clinical tests and the latest NICE guidelines The book emphasises application of pharmacological principles to all areas of practice including drug action, interaction and side effects, and is useful to all students of pharmacology whether as part of a 3 year course, post-qualifying course, top-up course or standalone module. "This latest edition of a key textbook on pharmacology for nurses has moved forward from previous editions by becoming stronger by the inclusion of a greater scope of material so maintaining its place as an essential pharmacology book for current and forthcoming nursing students in all clinical

practice fields to give them a strong evidence base for their studies and clinical practice. The addition of a chapter on drug calculations is an essential step forward in this edition for all students as this is a key component within all current nursing degree programmes. The continued use of case studies and clinical tips makes learning fun both as an individual but also in small learning groups of students. It follows a clear pathway for learning: it is easy to read, is clearly written and shows the importance of aspects of pharmacology within the work of a nurse. " Keith Booles, Senior Nurse Lecturer/Module Leader, Faculty of Health Sciences, Staffordshire University, UK "With the ever evolving role of nursing it is essential, for safe practice, that all nurses have knowledge of pharmacology. This latest edition of essentials of pharmacology for nurses offers just that. This is a well presented book with logical, thought out chapters that enable the reader to learn at their own pace. Although aimed at undergraduate nurses, I feel that this is a good base to build on pharmacology knowledge, not only for undergraduate nurses but also trained nurses." Sharon Riverol NHS West Cheshire CCG, UK
