10 Section 1 Meiosis
Study Guide Key.pdf | pdf
...1) Meiosis takes a cell
with two copies of every
chromosome (diploid) and
makes cells with a single
copy of every
chromosome (haploid).
This is a good idea if
you're going to combine
two cells to make a new
organism. This trick is
accomplished by halving
chromosome number. In

meiosis, one diploid cells
produces four haploid
cells.Chapter 10-
