The first in a new series exploring the basics of Raspberry Pi Operating System (OS) administration, this volume is a compendium of easy-to-use and essential system administration for the novice user of the Raspberry Pi OS. The overriding idea behind the system administration of a modern, 21st-century Linux system such as the Raspberry Pi OS is the use of systemd to ensure that the Linux kernel works efficiently and effectively to

Exercises are included throughout to reinforce the readers' learning goals with solutions and example code provided on the accompanying GitHub site. This book is aimed at students and practitioners looking to maximize their use of the Raspberry Pi OS. With plenty of practical examples, projects, and exercises, this volume can also be adopted in a more formal learning environment to supplement and extend the basic knowledge of a Linux operating system.

The focus of this report is to provide an overview of green print behaviors in an office setting. Using both focus group and survey data, we outline a number of findings. First, respondents indicated that printing duplex is an ideal and expected default printer setting; in fact, 49% of survey respondents use duplex printing as default. Therefore, companies should consider providing employees tools for dual screen functionality and coordinate office printers to default duplex printing. Second, in terms of communication of green data, 60% of survey respondents were highly interested in receiving data about the dollars saved from the use of green print behaviors, which signifies that this is particular is a quantifiably strong motivation for individuals. Therefore, when print providers develop informational tools to encourage adoption of greener print behaviors, it is wise to start with financial information about savings from the use of greener behaviors. Furthermore, 47% of survey respondents prefer to have such information provided in

the form of graphs and charts. Another critical discovery is that there are different motivational factors that influence behavior change. Those employees who are motivated by achieving goals, as opposed to meeting peer expectations or a desire to help the environment, will be most likely to engage in green behaviors that are aligned with these goals. This suggests that feedback is an important factor in encouraging green print behaviors. These and other findings are discussed.
