in agent-based systems, which, because of the agents themselves, are proactive (have goals and pursue them, take the initiative to act for Engineering an ambient assisted living (AAL) information system using agent technology is a nontrivial task.¹ AAL systems combine the application domains of ambient intelligence (Aml) and home-based e-health ...

Agents And Ambient Intelligence Achievements

In computing, ambient intelligence (Aml) refers to electronic environments that are sensitive and responsive to the presence of people. Ambient intelligence was a projection on the future of consumer electronics, telecommunications and computing that was originally developed in the late 1990s by Eli Zelkha and his team at Palo

Alto Ventures for the time frame 2010–2020.
