Was Francisco Cantú
an der amerikanisch-
mexikanischen Grenze
erlebt, bringt ihn fast
um den Verstand.
Cantú hat Politik
studiert und wollte am
eigenen Leib erfahren,
was an der Grenze
wirklich geschieht. Als
Mitglied der United
States Border Patrol

rettet er Verdurstende aus der Wüste, deportiert aber auch illegale Einwanderer oder erlebt, wie Familien auseinandergerissen werden. In seiner persönlichen Reportage zeigt er, was Grenzen für die Menschen wirklich bedeuten. No Man's Land mutet wie eine Tragödie an und bildet doch die Realität wahrheitsgetreu ab, unverzerrt, grausam und zutiefst berührend. *De Germania* Walter de Gruyter GmbH & Co KG Apocalypse and Reform from Late Antiquity to the Middle Ages provides a range of perspectives on what reformist apocalypticism meant for the formation of Medieval Europe, from the Fall of Rome to the twelfth century. It

explores and challenges accepted narratives about both the development of apocalyptic thought and the way it intersected with cultures of reform to influence major transformations in the medieval world. Bringing together a wealth of knowledge from academics in Britain, Europe and the USA this book offers the latest scholarship in apocalypse studies. It consolidates a paradigm shift, away from seeing apocalypse as a radical force for a suppressed minority, and towards a fuller understanding of apocalypse as a mainstream cultural force in history. Together, the chapters and case studies capture and contextualise the

variety of ideas present across Europe in the Middle Ages and set out points for further comparative study of apocalypse across time and space. Offering new perspectives on what ideas of 'reform' and 'apocalypse' meant in Medieval Europe, *Apocalypse and Reform from Late Antiquity to the Middle Ages* provides students with the ideal introduction to the study of apocalypse during this period.

The Lunisolar Calendar of the Germanic Peoples Reconstruction of a bound moon calendar from ancient, medieval and early modern sources

Die Rudolphinischen Tafeln Tyndale House Publishers, Inc. In *Art, Space, Ecology*, internationally renowned curator and critic John K. Grande interviews twenty major contemporary artists whose works engage with the natural environment. Whether their medium is sculpture, nature interventions, performance, body art, or installation, these discussions, complemented by eighty stunning photographs, reveal the artists' diverse backgrounds and methods, expressions and realizations. Ultimately, the natural world serves as a canvas to explore the intersections of art, space, and the environment, thereby

raising questions about our relationship with landscape itself. The essence of the art form is a dynamic interactivity, and the dialogues between Grande and the artists mirror the encounter of object and environment, artist and audience, society and nature. This work is rounded out with an engaging introduction by writer and curator Edward Lucie-Smith, who sets the stage for some of the most insightful and compelling discussions on art to be found.

The NLT's scholarship and clarity breathe life into even the most difficult-to-understand Bible passages--but even more powerful are stories of how people's lives are changing as the words speak directly to their hearts.

Muttertag und Mutterkreuz Walter de Gruyter

This book is an exposition of the

sociocultural past, present, and futuristic preview of the Emevor-speaking people of the Niger-Delta, Nigeria. The work is the product of the author's reminiscences and introspection into the historiography, geography, economy, language, education, and the multifarious rich sociocultural milieu of the people. It deals with the traditional customs, beliefs, totems, astronomy, time and event reckoning, marriages, traditional religions, ancestral worship and Christology, oracle divination, obituary and obsequies, initiation into Ehwa womanhood rites and sabbatical fattening of brides, festivals, identity of people, governance,

heroes/heroines and modern pacesetters, and the changes provoked by modernity. By using simple language, graphic descriptions, and vivid and clear explanations of the phenomena and events, the author has taken the reader through the maze, as it were, with the needed compass to navigate through these labyrinths.

Time and Its Adversaries in the Seleucid Empire J.B. Metzler

Under Seleucid rule, time no longer restarted with each new monarch. Instead, progressively numbered years, identical to the system we use today, became the measure of historical duration. Paul Kosmin shows how this invention of a new kind of time—and resistance to it—transformed the way we organize our thoughts about the past, present, and future.

Brothers im September 2008 zusammenbrach, war dies der Tiefpunkt der Banken- und Finanzkrise. Und obwohl der totale Kollaps der Weltwirtschaft damals verhindert wurde, ist die Finanzkrise noch lange nicht Geschichte, wie der britische Historiker Adam Tooze zeigt. Er schildert, wie es zu dieser Krise der Finanzmärkte kam und welche dramatischen Folgen sie bis heute hat. Denn durch die Finanzkrise ist nicht nur die Stabilität Europas ins Wanken geraten, sie hat auch das Vertrauen in die Kraft der globalen Wirtschaftsordnung erschüttert – und so zum Aufstieg der Populisten beigetragen.

The missing piece in so many histories of Mesopotamian technical disciplines is the client, who often goes unnoticed by present-day scholars seeking to reconstruct ancient disciplines in the Near East over millennia. The contributions to this volume investigate how Mesopotamian medical specialists interacted with their patients and, in doing so, forged their social and professional identities. The chapters in this book explore rituals for success at court, the social classes who made use of such rituals, and depictions of technical specialists on seal impressions and in later Greco-Roman iconography. Several

essays focus on Egalkura: rituals of entering the court, meant to invoke a favorable impression from the sovereign. These include detailed surveys and comparative studies of the genre and its roots in the emergent astrological paradigm of the late first millennium BC. The different media and modalities of interaction between technical specialists and their clients are also a central theme explored in detailed studies of the sickbed scene in the iconography of Mesopotamian cylinder seals and the transmission of specialized pharmaceutical knowledge from the Mesopotamian to the Greco-Roman world.

Offering an encyclopedic survey of ritual clients attested in the cuneiform textual record, this volume outlines both the Mesopotamian and the Greco-Roman social contexts in which these rituals were used. It will be of interest to students of the history of medicine, as well as to students and scholars of ancient Mesopotamia. In addition to the editor, the contributors include Netanel Anor, Siam Bhayro, Strahil V. Panayotov, Maddalena Rumor, Marvin Schreiber, JoAnn Scurlock, and Ulrike Steinert. *Handbook of International Futurism* Fodor's Rio de Janeiro & Sao Paulo First comparative analysis of the role of

A ground-breaking study of ceremonial stone landscapes in Northeast America and their relationship to other sites around the world • Features a comprehensive field guide to hundreds of megalithic stone structures in northeastern America, including cairns, perched boulders, and effigies • Details the Wall of Manitou, the Hammonasset Line, landscape astronomy along the Hudson River, and a several-acre area in Woodstock, NY, with large, carefully constructed lithic formations • Analyzes the archaeoastronomy, archaeoacoustics, and symbolism of these sites to reveal their

relationships to other ceremonial stone sites across America and the world Presenting a comprehensive field guide to hundreds of lost, forgotten, and misidentified megalithic stone structures in northeastern America, Glenn Kreisberg documents many enigmatic formations still standing across the Catskill Mountain and Hudson Valley region, complete with functioning solstice and equinox alignments. Kreisberg provides a first-person description of the “Wall of the Manitou,” which runs for 10 miles along the eastern slopes of the Catskill Mountains, as well as narratives about related sites that include animal effigies, reproductive organs, calendar stones,

enigmatic inscriptions, and evidence of alignments. Using computer software, he plots the trajectory of the Hammonasset Line, which begins at a burial complex near the tip of Long Island and runs to Devil’s Tombstone in Greene County, New York. He shows how the line runs at the same angle that marks the summer solstice sunset from Montauk Point on Long Island, and, when extended, intersects the ancient copper mines of Isle Royal in Upper Michigan. He documents a several-acre area on Overlook Mountain in Woodstock, New York, with a grouping of very large, carefully constructed lithic formations that together create a serpent or snake

figure, mirroring the constellation Draco. He demonstrates how this site is related to the Serpent Mount in Ohio and Ankor Wat in Cambodia and reveals how all of the vast, interlocking sites in the Northeast were part of an ancient spiritual landscape based on a sophisticated understanding of the cosmos, as practiced by ancient Native Americans. While modern historians consider these sites to be colonial era constructions, Kreisberg reveals how they were used to communicate with the spirit world and may be remnants of a long-vanished civilization.

The Gregorian calendar

reform of 1582, which provided the basis for the civil and Western ecclesiastical calendars still in use today, has often been seen as a triumph of early modern scientific culture or an expression of papal ambition in the wake of the Counter-Reformation. Much less attention has been paid to reform's intellectual roots in the European Middle Ages, when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture, as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied before 1500. For centuries prior to the Gregorian reform,

astronomers, mathematicians, theologians, and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar, which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace.

Scandalous Error is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts. It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical-astronomical problem to medieval society and details the often sophisticated

ways in which computists and churchmen reacted to this challenge. By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the fifteenth century, the volume offers substantial new insights on the place of exact science in medieval culture.

»Arische« Frauen wurden in der Zeit des Nationalsozialismus als »höchstes Gut« des Volkes gefeiert: »Heilig soll uns sein jede Mutter deutschen Blutes.« Im nationalsozialistischen »Mutterkult« wurde der Mutterschaft der »deutschen« Frau ein quasi-religiöser Rang verliehen und damit das Leben der meisten Frauen ideologisch aufgewertet. Mutterschaft war keine private und persönliche Angelegenheit, sondern Staatsaufgabe und religiöse Handlung. Hierbei spielte das Mutterkreuz mit seinen drei Verleihungsstufen eine besondere Rolle.
