"With over eleven hundred performances in the United States and England between 1902 and 1905, In Dahomey became a landmark of American musical theater. Created and performed entirely by African Americans, it showcased the talent of

conservatory-trained composer Will Marion Cook and the popular vaudevillians Bert Williams and George Walker. This edition presents the musical and textual materials of *In Dahomey* in a comprehensive piano-vocal score, with many musical numbers that were added or substituted in various early productions. This complete array of songs makes this the first publication of its type." --

Focusing on the body in every chapter, this book examines the changing meanings and profound significance of the physical form among the Anglo-Saxons from 1880 to 1920. They formed an imaginary—but, in many ways, quite real—community that ruled much of the world. Among them, racism became more virulent. To probe the importance of the body, this book brings together for the first time the many areas in which the physical form was newly or more extensively featured, from photography through literature, frontier wars, violent sports, and the global

circus. Sex, sexuality, concepts of gender including women's possibilities in all areas of life, and the meanings of race and of civilization figured regularly in Anglo discussions. Black people challenged racism by presenting their own photos of respectable folk. As all this unfolded, Anglo men and women faced the problem of maintaining civilized control vs. the need to express uninhibited feeling. With these issues in mind, it is evident that the origins of today's debates about race and gender lie in the late nineteenth century.

Many world-class thinkers and creators have been concerned about the state of education in the United States. Discover their thoughts on how children really learn and what teachers must do to optimally tap children's latent abilities. During the last three decades, education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills. However, during this period that author Thomas Armstrong calls the "miseducation of America," a number of troubling trends have

surfaced, including a decrease in creative thinking scores among children in kindergarten through third grade. Rather than focus on what's wrong with the education system that has produced these outcomes, Armstrong lays out what creative thinkers know about how children should be educated. In an extended thought experiment, he asks what would happen if we turned the reins of educational policy over, not to the politicians and educational bureaucrats, but to eminent thinkers and creators like Albert Einstein, Pablo Picasso, Martin Luther King Jr., Rachel Carson, Doris Lessing, Jane Goodall, and other seminal culture-builders. What might they say about the best way to educate a child? If Einstein Ran the Schools suggests that the answers to this intriguing question should guide future efforts to reform our nation's schools.
