### How to Survive the Apocalypse BenBella Books

Ultimate Fighter champ Forrest Griffin and Erich Krauss, who previously brought you the New York Times bestseller *Got Fight*, now offer a hilarious and very timely guide to surviving the coming apocalypse. *Be Ready When the Sh\*t Goes Down* provides everything an aspiring Mad Max needs to know about post-apocalyptic living. Since it's coming soon anyway, we might as well all *Be Ready When the Sh\*t Goes Down*.

**Bunker** Simon and Schuster

When your base camp is overrun by zombies, whom do you save if you cannot save everyone? Is it permissible to sacrifice one survivor to an undead horde in order to save a greater number of the living? Do you have obligations to loved ones who have turned? These are some of the troubling ethical questions you might face in a zombie apocalypse. Bryan Hall uses situations like these to

creatively introduce the foundational theories of moral philosophy. Covering major thinkers such as Aristotle, Immanuel Kant, and John Stuart Mill, this is an introduction to Ethics like no other: a practical guidebook for surviving a zombie outbreak with your humanity intact. It shows you why moral reasoning matters as long as you still walk among the living. The book is written entirely from the perspective of someone struggling to survive in a world overrun by the undead. Each chapter begins with graphic art and a "field exercise" that uses a story from this world to illustrate an ethical problem. By considering moral controversies through the unfamiliar context of a zombie apocalypse, the morally irrelevant factors that get in the way of resolving these controversies are removed and you can better answer questions such as: · Do we have a moral obligation to help those less fortunate than ourselves? · Is it ever morally permissible to intentionally kill an innocent person? · Are non-rational but sentient beings morally considerable? Equipped with further reading sections and overviews of the theories that you would usually cover in an introductory Ethics course, this one-of-a-kind primer critically evaluates different procedures for moral action that you can use not only to survive but flourish in an undead world.

*Last Days: Zombie Apocalypse* is a skirmish-scale miniatures game of survival horror. It pits players against each other in a nightmarish near-future where the dead have returned to life and are feasting on the living. Players build their own factions, representing desperate civilians, military personnel, or hardened survivors, and must explore, scavenge, and fight in order to survive another day. Rival gangs are only one of the dangers they face - mindless zombies wander the streets, driven by insatiable hunger and drawn by the sound of combat! A gang's ability to scavenge is as vital as their combat ability, and players must ensure that they have the resources to survive in this hostile world. Scenarios and campaigns allow you to develop your gang, gain experience and recruit new henchmen to build up your strength or replace the inevitable casualties of the zombie apocalypse.

"A kind of apocalyptic Super Size Me" (The Guardian) that is both "page turning and thoughtful" (Financial Times) about "prepper" communities around the world that are building fortresses against an array of threats. Currently, 3.7 million Americans call themselves preppers. Millions more prep without knowing it. Bradley Garrett, who began writing this book years before the 2020

Covid-19 pandemic, argues that prepping is a rational response to global, social, and political systems that are failing to produce credible narratives of continued stability. Left with a sense of foreboding fueled by disease outbreaks, increasing government dysfunctionality, eroding critical infrastructure, nuclear brinkmanship, and an accelerating climate crisis, people all over the world are responding predictably—by hunkering down. Garrett traveled across four continents to meet those who are constructing panic rooms, building underground backyard survival chambers, stockpiling supplies, preparing go bags, hiding inflatable rafts, rigging mobile “bugout” vehicles, and burrowing deep into the earth. He has returned with “a big-thinking, deep-diving, page-turning study of fear, privilege, and apocalypse” (Robert Macfarlane, author of *Underland*) from the frontlines of the way we live now: an illuminating reflection on our age of disquiet and dread that brings our times into new and sharper focus. With scenes that are “fascinating, amusing, crazy, chilling, and surreally topical” (Douglas Preston, author of *Lost City of the Monkey God*), Garrett shows that the bunker is all around us: in malls, airports, gated communities, the vehicles we drive. Most of all, he reveals, it’s in our minds.

Let’s face it: most of us are not prepared to face a basic disaster survival situation, let alone a zombie uprising. What are you going to do when all the trappings of civilization are ripped away by rotting, undead hands? During a *Zombie Apocalypse*, the electricity stops running, water stops flowing from the tap, and the rule of law becomes the Law of the Jungle. Hordes of ravenous, cannibalistic ghouls roam the streets, seeking human flesh. It would be a miracle if you survive the first night, let alone a month. Your life expectancy has just dropped to next winter...if you're lucky. That's where this book comes in. It provides you with not just the information you need to survive the coming *Zombie Apocalypse*, but the confidence such knowledge brings. After reading this book, you will learn:
 

- \* The different classifications of zombies, along with their strengths and weaknesses
- \* How to cope with the overall zombie-caused breakdown of society
- \* Combat-proven zombie-fighting tactics and techniques
- \* How to find food, water, and shelter in a zombie-overrun world
- \* Skills for surviving other apocalyptic dangers, including rogue government agencies, zombie animals, and other humans competing for scarce resources
- \* How to prepare a *Zombie Bug-Out Bag* to get you through that critical first week of the *Zombie Apocalypse*

 This revised and updated edition contains new information, including a chapter on the very worst case of a worst-case scenario: surviving the *Zombie Apocalypse* in a major metropolitan city like Chicago or Atlanta! If, like the author, you're the least bit concerned about surviving the coming *Zombie Apocalypse*, you need this book. It's a no-brainer.

It seems like people are always talking about the end of the world, doesn't it? Y2K, the Mayan Apocalypse, Blood Moon Prophecies, nuclear war, killer robots, you name it. In *Apocalypse Any Day Now*, journalist Tea Krulos travels the country to try to puzzle out America's obsession with the end of days. Along the way he meets doomsday preppers—people who stockpile supplies and learn survival skills—as well as religious prognosticators and climate scientists. He camps out with the *Zombie Squad* (who use a zombie apocalypse as a survival metaphor); tours the *Survival Condos*, a luxurious bunker built in an old Atlas missile silo; and attends *Wasteland Weekend*, where people party like the world has already ended. Frightening and funny, the ideas Krulos explores range from ridiculously outlandish to alarmingly near and present dangers.

Meticulously researched and vigorously detailed this important survival manual is the most detailed and up-to-date book you will find to keep you and your family safe during the *Zompoc* (*Zombie Apocalypse*). This book is unique in its coverage of all *Zombie* strains from the viral infected fast zombies through to the shambling re-animated undead. All subjects from zombie identification, first-aid, escape techniques, household defence, combat techniques and raiding through to bartering, supplies, vehicle modification, weapons and convoy structure are all covered

in great detail. With this book you can prepare for the day the *Zompoc* strikes and be ready to fight back and eradicate the *Zombie* menace from our streets. This book is illustrated throughout and even contains full plans and instructions for a post-*Zompoc* rebuilding of civilisation!

A woman sits in prayerful meditation, waiting to offer her first confession in more than thirty years. She holds a small book on her lap, one that she's made, and tells herself again the Bible stories it contains, the ones she has written anew, for herself, each story told aslant, from Jonah to Jesus, Moses to Mary Magdalen. Woven together and stitched by hand, they provide a new version, virtually a new translation, of the heart of this ancient and sacred text. Rakow's Bernadette traces, through each brief and familiar story, a line where belief and disbelief touch, the line that has been her home, ragged and neglected, that hidden seam. The result is an amazing book of extraordinary beauty, so human and humorous, and yet so holy it becomes a work of poetry, a canticle, a song of lament and praise. In the private terrain of silence and devotion, shared with us by a writer of power and grace, Rakow offers, through Bernadette, her own *lectio divina* for the modern world. No reader will forget this book or be able to read the Bible itself without a new perspective on this text that remains, arguably, Western civilization's greatest literary achievement.

How would you go about rebuilding a technological society from scratch? If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors? What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible? Human knowledge is collective, distributed across the population. It has built on itself for centuries, becoming vast and increasingly specialized. Most of us are ignorant about the fundamental principles of the civilization that supports us, happily utilizing the latest—or even the most basic—technology without having the slightest idea of why it works or how it came to be. If you had to go back to absolute basics, like some sort of postcataclysmic Robinson Crusoe, would you know how to re-create an internal combustion engine, put together a microscope, get metals out of rock, or even how to produce food for yourself? Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide, adapted to cataclysmic circumstances. The *Knowledge* describes many of the modern technologies we employ, but first it explains the fundamentals upon which they are built. Every piece of technology rests on an enormous support network of other technologies, all interlinked and mutually dependent. You can't hope to build a radio, for example, without understanding how to acquire the raw materials it requires, as well as generate the electricity needed to run it. But Dartnell doesn't just provide specific information for starting over; he also reveals the greatest invention of them all—the phenomenal knowledge-generating machine that is the scientific method itself. The *Knowledge* is a brilliantly original guide to the fundamentals of science and how it built our modern world.

A survival expert's guide for every family to prepare and educate themselves about the skills and mentality necessary to survive a disaster anywhere. This is not your father's scout manual or a sterile FEMA handout. Entertaining and informative, *When All Hell Breaks Loose* describes how to maximize a survival mindset necessary for self-reliance. According to the book, living through an emergency scenario is 90 percent psychology, and 10 percent methodology and gear. Relevant quotes and tips are placed throughout the pages to help readers remember important survival strategies while under stress and anxiety. Lundin also addresses basic first aid and hygiene skills and makes recommendations for survival kit items for the home, office, and car. Watch naturalist Cody Lundin in *Dual Survival* on The Discovery Channel as he uses many of the same skills and techniques taught in his books. *When All Hell Breaks Loose* provides solutions on how to survive a catastrophe. Lundin addresses topics such as:
 

- Potable drinking water
- Storing super-nutritious foods
- Heating or cooling without conventional power
- How to create alternative lighting options
- Building a makeshift toilet & composting the results
- Catching rodents for food
- Safely disposing of a corpse

In this insightful book, an underwater archaeologist and survival coach shows how understanding the collapse of civilizations can help us prepare for a troubled future. Pandemic, climate change, or war: our era is ripe with the odor of doomsday. In movies, books, and more, our imaginations run wild with visions of dreadful, abandoned cities and returning to the land in a desperate attempt at survival. In *The Next Apocalypse*, archaeologist Chris Begley argues that we completely misunderstand how disaster works. Examining past collapses of civilizations, such as the Maya and Rome, he argues that these breakdowns are actually less about cataclysmic destruction than they are about long processes of change. In short: it's what happens after the initial uproar that matters. Some people abandon their homes and neighbors; others band together to start anew. As we anticipate our own fate, Begley tells us that it was communities, not lone heroes, who survived past apocalypses—and who will survive the next. Fusing archaeology, survivalism, and social criticism, *The Next Apocalypse* is an essential read for anxious times.

Incisive insights into contemporary pop culture and its apocalyptic bent The world is going to hell. So begins this book, pointing to the prevalence of apocalypse — cataclysmic destruction and nightmarish end-of-the-world scenarios — in contemporary entertainment. In *How to Survive the Apocalypse* Robert Joustra and Alissa Wilkinson examine a number of popular stories — from the *Cylons* in *Battlestar Galactica* to the purging of innocence in *Game of Thrones* to the hordes of zombies in *The Walking Dead* — and argue that such apocalyptic stories reveal a lot about us here and now, about how we conceive of our life together, including some of our deepest tensions and anxieties. Besides analyzing the dystopian shift in popular culture, Joustra and Wilkinson also suggest how Christians can live faithfully and with integrity in such a cultural context.

"By the author of the award-winning *To Be a Machine*, a deeply considered look at the people and places in confrontation with the end of our days. We're alive in a time of worst-case scenarios: The weather has gone uncanny, volatile. Our old post-war alliances are crumbling. Everywhere you look there's an omen, a joke whose punchline is the end of the world. How are we to live in the shadow of such a grim future? What does the world hold for our children? What might it be like to live

through the worst? And what is anybody doing about it? Dublin-based writer Mark O'Connell ("wryly humorous, cogently insightful"--NPR) is possessed by these questions. In *Notes from an Apocalypse*, he crosses the globe in pursuit of answers. He tours survival bunkers in South Dakota. He ventures to New Zealand, a favored retreat of billionaires banking on civilization's collapse. And

he bears witness to those places where the future has already arrived--real-life portraits of the end of the world as we know it. In doing so, he offers us a unique window into our apocalyptic imagination. Part tour, part pilgrimage, *Notes from an Apocalypse* is an affecting and hopeful meditation on our alarming present tense. With insight, humanity, and wit, O'Connell leaves you to wonder: What if the end of the world isn't the end of the world?"--
