Principles of Biology

John Wiley & Sons
Shortlisted for the
2021 Booker Prize
Longlisted for the 2021
National Book Award
for Fiction A
heartrending new
novel from the Pulitzer
Prize-winning and #1
New York Times best-
selling author of The

Overstory. Named one
of the Most Anticipated
Books of 2021 by
Newsweek, Los
Angeles Times, New
York Magazine,
Chicago Tribune,
BuzzFeed, BookPage,
Goodreads, Literary
Hub, The Millions, New
Statesman, and Times
of London The
astrobiologist Theo
Byrne searches for life
throughout the cosmos
while single-handedly
raising his unusual

nine-year-old, Robin, following the death of his wife. Robin is a warm, kind boy who spends hours painting elaborate pictures of endangered animals. He's also about to be expelled from third grade for smashing his friend in the face. As his son grows more troubled, Theo hopes to keep him off psychoactive drugs. He learns of an experimental neurofeedback treatment to bolster Robin's emotional control, one that involves training the boy on the recorded patterns of his mother's brain... With its soaring descriptions of the natural world, its tantalizing vision of life beyond, and its account of a father and son's ferocious love, Bewilderment marks

Richard Powers's most intimate and moving novel. At its heart lies the question: How can we tell our children the truth about this beautiful, imperiled planet?

Island Storms Longman Publishing Group
Looks at the mysteries, scientific discoveries, and benefits of the chemical element hydrogen.

The Evolution and Future of the Human Animal Harper Collins
Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and

skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this

extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts. Home Care of the Sick Harvard University Press
In 1995, this novel won both the Jomo Kenyatta Literature Prize, and the Commonwealth

Writers Prize Best First Book in the Africa Region. Now reprinted, it remains in great demand. An epic story spanning cultures, it tells the lives of three generations of women. It traces the story of Akoko in her rich traditional Luo setting, through to the children who live and die in the 20th century.

Bewilderment: A Novel

Let's Review

Physics
The Physical
Setting

Let's Review Physics covers all topics in the New York State high school curriculum for physics and prepares students to pass the Physics Regents Exam. Topics covered include: motion in one dimension, forces and Newton's laws, vector quantities and their applications, circular motion and gravitation,

momentum and its conservation, work and energy, the properties of matter, static electricity, electric current and circuits, magnetism and electromagnetism, waves and sound, light and geometric optics, solid-state physics, modern physics from Planck's hypothesis to Einstein's special theory of relativity, and nuclear energy. One recently-administered actual Physics Regents Exam is also presented with an answer key.

Core Concepts and Live Cases Harvard University Press

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive,

thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."-- Page 4 of cover.

Neil deGrasse Tyson's #1 New York Times best-selling guide to the cosmos, adapted for young readers. From the basics of physics to big questions about the nature of space and time, celebrated astrophysicist and

science communicator Neil deGrasse Tyson breaks down the mysteries of the cosmos into bite-sized pieces. *Astrophysics for Young People in a Hurry* describes the fundamental rules and unknowns of our universe clearly—and with Tyson's characteristic wit, there's a lot of fun thrown in, too. This adaptation by Gregory Mone includes full-color photos, infographics, and extra explanations to make even the trickiest concepts accessible. Building on the wonder inspired by outer space, *Astrophysics for Young People in a Hurry* introduces an exciting field and the principles of scientific inquiry to young readers. Now a major motion picture: Love, Simon, starring Nick Robinson and Katherine Langford! This edition includes new Simon and Blue emails, a behind-the-scenes scrapbook from the Love, Simon movie set, and Becky Albertalli in conversation with fellow authors Adam Silvera and Angie Thomas. William C. Morris Award Winner: Best Young Adult Debut of the Year * National Book Award Longlist "A remarkable gift of a novel."—Andrew Smith, author of Grasshopper Jungle "I am so in love with this book."—Nina LaCour, author of Hold Still "Feels timelessly, effortlessly now."—Tim Federle, author of Better Nate Than Ever "The best kind of love

story."—Alex Sanchez, Lambda Award-winning author of Rainbow Boys and Boyfriends with Girlfriends Sixteen-year-old and not-so-openly gay Simon Spier prefers to save his drama for the school musical. But when an email falls into the wrong hands, his secret is at risk of being thrust into the spotlight. Now change-averse Simon has to find a way to step out of his comfort zone before he's pushed out—without alienating his friends, compromising himself, or fumbling a shot at happiness with the most confusing, adorable guy he's never met. Incredibly funny and poignant, this twenty-first-century coming-of-age, coming out story—wrapped in a

geek romance—is a knockout of a debut novel by Becky Albertalli. Plus don't miss Yes No Maybe So, Becky Albertalli's and Aisha Saeed's heartwarming and hilarious new novel, coming in 2020!

This new edition of the popular *The Strategy Pathfinder* updates the micro-cases of real-life problems faced by companies and executives. These micro-cases help readers to engage with the kinds of situations they will encounter in their working lives while provoking discussions about key theoretical themes. Original presentation and design makes this an essential companion for both the

business-school classroom and the executive briefcase. *The Strategy Pathfinder* brings experienced and potential executives alike an instant guide to the concepts and techniques they need to know. An innovative introduction to strategy. Makes readers active “producers” of strategy, rather than passive recipients of received wisdom. Presents essential pathways through the strategy jungle. Each case provokes discussion about a key theoretical theme. Encourages readers to form a view themselves, and then test it against the views of others, before offering recommendations about how best to

proceed. Cases are drawn from Africa, the Americas, Asia, Europe and Oceania.

Supported by online lecturer supplements. East African Publishers Teacher's Guide to correspond with theme New School Chemistry East African Publishers Previously published as Hot Property, the first installment of the Molly DeWitt Mysteries by #1 New York Times Bestselling Author Sherryl Woods is an engaging fan favorite that you don't want to miss! Finding a corpse in the card room of her elegant new Key Biscayne apartment complex was not what Molly DeWitt had in mind for a fresh new start—especially when the knife in the dead Ocean Manor's president's back appears to be her own.

But when charming homicide detective Michael O'Hara decides to get on her case, it's up to Molly to track down the real killer and clear her name.

Houghton Mifflin College Division

"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances

students' understanding of concepts through clear and effective illustrations, diagrams, and photographs.

Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.

The Physical Setting

Penguin Group

Australia

The Development of an Extraordinary Species

We human beings share 98 percent of our genes with

chimpanzees. Yet

humans are the dominant species on

the planet -- having founded civilizations

and religions,

developed intricate and diverse forms of

communication,

learned science, built

cities, and created

breathtaking works of

art -- while chimps

remain animals

concerned primarily

with the basic

necessities of survival.

What is it about that

two percent difference

in DNA that has

created such a

divergence between

evolutionary cousins?

In this fascinating,

provocative,

passionate, funny,

endlessly entertaining work, renowned Pulitzer Prize-winning author and scientist Jared Diamond explores how the extraordinary human animal, in a remarkably short time, developed the capacity to rule the world . . . and the means to irrevocably destroy it.

The Essential Element
Cambridge Scholars Publishing

"These notes are about the process of design: the process of inventing things which display new physical order, organization, form, in response to function." This book, opening with these words, presents an entirely new theory of the process of design. In the first part of the book, Christopher Alexander discusses the process by which a

form is adapted to the context of human needs and demands that has called it into being. He shows that such an adaptive process will be successful only if it proceeds piecemeal instead of all at once. It is for this reason that forms from traditional un-self-conscious cultures, molded not by designers but by the slow pattern of changes within tradition, are so beautifully organized and adapted. When the designer, in our own self-conscious culture, is called on to create a form that is adapted to its context he is unsuccessful, because the preconceived categories out of which he builds his picture of the problem do not correspond to the inherent components

of the problem, and therefore lead only to the arbitrariness, willfulness, and lack of understanding which plague the design of modern buildings and modern cities. In the second part, Mr. Alexander presents a method by which the designer may bring his full creative imagination into play, and yet avoid the traps of irrelevant preconception. He shows that, whenever a problem is stated, it is possible to ignore existing concepts and to create new concepts, out of the structure of the problem itself, which do correspond correctly to what he calls the subsystems of the adaptive process. By treating each of these subsystems as a separate subproblem,

the designer can translate the new concepts into form. The form, because of the process, will be well-adapted to its context, non-arbitrary, and correct. The mathematics underlying this method, based mainly on set theory, is fully developed in a long appendix. Another appendix demonstrates the application of the method to the design of an Indian village.

 Springer
Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn

between their personal ambitions and the humiliating duty to the Nasila tradition.

Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

[A History of Zimbabwe, 1890-2000 and Postscript, Zimbabwe, 2001-2008](#) Barrons Educational Series

This study combines in one volume the history of Zimbabwe from the advent of British settlers in 1890 to 2000, including women's rights and human rights in Zimbabwe. It is a political, social and economic history. The

Postscript examines the major developments in Zimbabwe from 2001 to 2008. The two previous major studies on the history of Zimbabwe, *The Past Is Another Country* by Martin Meredith (London, Andre Deutsch, 1979) and *The Road to Zimbabwe, 1890-1980* by Anthony Verrier (London, Jonathan Cape, 1986) are now out of date. This volume brings the historical study of Zimbabwe almost up to the present day.
