 This clearly articulated statement offers a hopeful and workable approach to conflict—that eternally beleaguering human situation. John Paul Lederach is internationally recognized for his breakthrough thinking and action related to conflict on all levels—person-to-person, factions within communities, warring nations. He explores why "conflict transformation" is more appropriate than "conflict resolution" or "management." But he refuses to be drawn into impractical idealism. Conflict Transformation is an idea with a deep reach. Its practice, says Lederach, requires "both solutions and social change." It asks not simply "How do we end something not desired?", but "How do we end something destructive and build something desired?" How do we deal with the immediate crisis, as well as the long-term situation? What disciplines make such thinking and practices possible? A title in The Little Books of Justice and Peacebuilding

Debates over the ethics of war, economic redistribution, resource consumption and the rights and responsibilities associated with membership of a political community are just some of the major conflicts of principle identified by Thomas Kane which characterize world politics today. According to the author, debates such as these are being drawn towards increasingly polarized positions represented by strongly universalist and particularist moral and political ideologies, such as cosmopolitanism and republicanism. Kane analyzes each of these areas, identifying that the potential for ideologically-driven conflict will constitute the greatest challenge facing scholars and policy makers in the twenty-first century.

"Guiding principles for stabilization and reconstruction presents the first-ever, comprehensive set of shared principles for building sustainable peace in societies emerging from violent conflict ... A product of the collaboration between the United States Institute of Peace and the United States Army Peacekeeping and Stability Operations Institute, this manual reflects the input of dozens of institutions across the peacebuilding community. It is based on a comprehensive review of major strategic policy documents from state ministries of defense, foreign affairs and development, along with major intergovernmental and nongovernmental organizations that toil in war-shattered landscapes around the globe"--Page 4 of cover.

European private international law, as it stands in the Rome I, II, and III Regulations and the recent Succession Regulation, presents manifold risks of diverging judgments despite seemingly harmonised conflict of law rules. There is now a real danger, in light of the rapid increase in the number of legal instruments of the European Union on conflict of laws, that European private international law will become incoherent. This collection of essays by twenty noted scholars in the field sheds clear light on the pivotal issues of whether a set of overarching rules (a 'general part') is required, whether an EU regulation is the adequate legal instrument for such a purpose, which general questions such an instrument should address, and what solutions such an instrument should provide. In analysing the possible emergence of general principles in European private international law over the past years, the contributors discuss such issues and factors as the following: - the relationship between conflict of laws and recognition; - the room for party autonomy; - the concept of habitual residence; - adaptation when interplay between different laws leads to deadlock; - public policy exceptions; - the desirability of a general escape clause; - the classic topics of characterisation, incidental question, and renvoi; and - right to appeal in case of errors in the application of foreign law. Practitioners dealing with these notoriously difficult cases will welcome this in-depth treatment of the issues, as will interested policymakers throughout the EU Member States and at the EU level itself. Scholars will discover an incomparable comparative analysis leading to expert recommendations in European private international law, opening the way to an effective European framework in this area.

"This Concise Hornbook guides students through the complex concepts and principles underlying the law of domestic and international conflicts. The book is an indispensable aid to students and practitioners seeking to better understand the basic principles of choice of law, recognition of judgments, and the law applied in federal courts, as well as more specific developments concerning conflicts in family law, cyberspace, and international transactions." -- Publisher.

Conflict of interest allegations have become a prominent part of the landscape of political and public sector ethics in Australia and overseas. The arena of policing has not been immune from this problem and this book is based on unique and unfettered access to ten years of internal investigation files held by Victoria Police. Through detailed analysis of actual complaint cases it gives the reader a comprehensive map by which to chart the particular kinds of interests involved, the nature of conflicts with official police duties, and the particular contexts from which conflicts of interest emerge. The book examines conflicts of interest across the private and public realm of the everyday lives of police officers. The author outlines how the problem of conflict of

interest is an important aspect of police ethics, arguing that recognition of, and accountability for, conflict of interest may be a significant element in preventing upstream police misconduct and corruption. *Conflict of Interest in Policing* seeks to provide a conceptual and practical understanding of how integrity and trust must be integrated into the profession of policing through processes of active responsibility, rather than more traditional passive obedience to prescriptive rules.

This book conducts a gendered critique of the 'principle of distinction' in international humanitarian law (IHL), with a focus on recent conflicts in Africa. The 'principle of distinction' is core to IHL, and regulates who can and cannot be targeted in armed conflict. It states that civilians may not be targeted in attack, while combatants and those civilians directly participating in hostilities can be. The law defines what it means to be a combatant and a civilian, and sets out what behaviour constitutes direct participation. Close examination of the origins of the principle reveals that IHL was based on a gendered view of conflict, which envisages men as fighters and women as victims of war. Problematically, this view often does not accord with the reality in 'new wars' today in which women are playing increasingly active roles, often forming the backbone of fighting groups, and performing functions on which armed groups are highly reliant. Using women's participation in 'new wars' in Africa as a study, this volume critically examines the principle through a gendered lens, questioning the extent to which the principle serves to protect women in modern conflicts and how it fails them. By doing so, it questions whether the principle of distinction is suitable to effectively regulate the conduct of hostilities in new wars. This book will be of much interest to students of international law, gender studies, African politics, war and conflict studies, and international relations.

Conflict economics contributes to an understanding of violent conflict in two important ways. First, it applies economic analysis to diverse conflict activities such as war, arms races, and terrorism, showing how they can be understood as purposeful choices responsive to underlying incentives. Second, it treats appropriation as a fundamental economic activity, joining production and exchange as a means of wealth acquisition. Drawing on a half-century of scholarship, this book presents a primer on the key themes and principles of conflict economics. Although much work in the field is abstract, the book is made accessible to a broad audience of scholars, students and policymakers by relying on historical data, relatively simple graphs and intuitive narratives. In exploring the interdependence of economics and conflict, the book presents current perspectives of conflict economics in novel ways and offers new insights into economic aspects of violence.

The present volume reproduces with slight changes the course of lectures given at The Hague in 1972 under the title of "The General Principles of Private International Law". The substance of these lectures has remained unaltered, but a number of

insertions serve to corrected some formal mistakes and misprints, added references to literature, some older, some more recent, without attempting to be exhaustive, and modified and supplemented the former exposition in two respects, where subsequent criticisms called for a review. The first concerns the place of public policy in Public International Law, the second deals with spatially-

Resolving a conflict is based on the art of helping people, with disparate points of view, find enough common ground to ease their fears, sheath their weapons, and listen to one another for their common good, which ultimately translates into social-environmental sustainability for all generations. Written in a clear, concise style, *Resolving Environmental Conflicts: Principles and Concepts, Third Edition* is a valuable, solution-oriented contribution that explains environmental conflict management. This book provides an overview of environmental conflicts, collaborative skills, and universal principles to assist in re-thinking and acting toward the common good, integrates a variety of new real-world conflicts as a foundation for building trust, skills, consensus, and capacity, and explains pathways to collectively construct a relationship-centric future, fostering healthier interactions with one another and the planet. The new edition illustrates how to successfully mediate actual environmental disputes and how to teach conflict resolution at any level for a wide variety of social-environmental situations. It adds a new chapter on water conflicts and resolutions, providing avenues to healthy, sustainable, and effective outcomes and provides new examples of conflicts caused by climate change with discussion questions for clear understanding. Land-use planners, urban planners, field biologists, and leaders and participants in collaborative environmental projects and initiatives will find this book to be an invaluable resource. University students in related courses will also benefit, as will anyone interested in achieving greater social-environmental sustainability and a more responsible use of our common natural resources for themselves and their children.

*Communication in an Era of Global Conflicts* assesses trends and issues in communication and their implications for conflicts in the African context. In doing so, the various chapters draw from culture, tradition, folklore, communication and conflict theories, principles and strategies, and from systems approach to conflict resolution. The underlying assumption of all the chapters is the pivotal role of communication—new media, traditional mass communication, interpersonal communication, intercultural communication, and communication technologies—in conflict and conflict resolution. This book is unique for its multidimensional

perspectives, a long overdue addition to the growing literature on conflicts in Africa.

Just war theory exists to stop armies and countries from using armed force without good cause. But how can we judge whether a war is just? In this original book, John W. Lango takes some distinctive approaches to the ethics of armed conflict. DT A revisionist approach that involves generalising traditional just war principles, so that they are applicable by all sorts of responsible agents to all forms of armed conflict DT A cosmopolitan approach that features the Security Council DT A preventive approach that emphasises alternatives to armed force, including negotiation, nonviolent action and peacekeeping missions DT A human rights approach that encompasses not only armed humanitarian intervention but also armed invasion, armed revolution and all other forms of armed conflict Lango shows how these can be applied to all forms of armed conflict, however large or small: from interstate wars to UN peacekeeping missions, and from civil wars counter-insurgency and counter-terrorism operations.
