The one-stop-shop for prospective handgun buyers. The market for new handguns is expanding rapidly, and that's good news for consumers. Each year more and more new models break cover and there has never been a better time to be in the market for a new handgun, whether you're a recreational shooter, a concealed carry permit holder, a hunter or a serious competitive shooter. Today's handguns offer superb machining and utilize some of the most technologically-advanced alloys, polymers and finishes to help make the current crop of handguns lightweight, accurate, durable, and affordable. This increase in product offerings stem from new interest in handguns, primarily as a result of nationwide issuance of concealed carry permits. As laws have been enacted that protect the rights of gun owners and defend our personal liberties, more and more new shooters are showing up on the range. But first-time shooters and new concealed carry permit holders are not the only segment of the handgun market that is seeing growth and interest. Pistol competitions have become more popular and more advanced, evolving from slow-fire matches at local gun clubs to modern IPSC, IDPA and 3-gun competitions. Handgun Buyer's Guide will help both the bewildered new shooter find their feet and purchase a handgun, find the best accessories, and locate a place to practice on hone their skills. You'll find all you need for owning a handgun in the Handgun Owner's Guide! Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives,

gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

In the past 12 months, there has been an explosion of interest in flying outdoor sized quadcopter and other multi-rotor machines – driven by the introduction of a number of excellent ready to fly aircraft and the diminishing cost of parts and kits for DIY builders as well. The majority of information available is aimed at the American market, where the hobby is slightly more mature and the opportunities for flying somewhat greater, and also for the DIY community, where kits and individual components are readily available to construct a good quality aircraft – provided you have the skills! This book is therefore aimed at the UK hobby flyer and concentrates predominantly on the ready to fly (RTF) machines available in the 1.5-2.5Kg medium lift category. This book aims to be a primer to those wanting to get started in the hobby, providing information regarding purchasing the right aircraft, basic flying techniques and aerial photography tips using GoPro cameras. Although written with UK based owners in mind from a legislative perspective, all other information will be of interest to prospective multi-rotor pilots around the world

Phantom Lady is a fictional superheroine, one of the first female superhero characters to debut in the 1940s Golden Age of Comic Books. Originally published by Quality Comics, the character was subsequently published by a series of now-defunct comic book companies, and a new version of the character currently appears in books published by DC Comics. As published by Fox Feature Syndicate in the late 1940s, the busty and scantily-clad Phantom Lady is a notable and controversial example of "good girl art," a style of comic art depicting voluptuous female characters in provocative situations and pin-up poses that contributed to widespread criticism of the medium's effect on children. Phantom Lady was created by the Eisner & Iger studio, one of the first to produce comics on demand for publishers. The character's early adventures were drawn by Arthur Peddy. The character was ranked 49th in Comics Buyer's Guide's "100 Sexiest Women in Comics" list. Phantom Lady first appeared in Quality's *Police Comics #1* (Aug, 1941), an anthology title the first issue of which also included the debut of characters such as Plastic Man and the Human Bomb. That issue established her alter ego as Sandra Knight, the beautiful Washington, D.C. debutante daughter of U.S. Senator Henry Knight. The issue established that it was not her first appearance as the Phantom Lady, but it did not go into her origin. Stories published decades later by DC Comics would give her a proper origin, which was altered several times to give Sandra a more active role. Her skimpy costume was eventually explained as a deliberate tactic to distract her usually male foes. Sandra Knight assumed the identity of Phantom Lady in a costume consisting of a green cape and the equivalent of a one-piece yellow swimsuit. She used a "black light projector," a device which allowed her to blind her enemies and make herself invisible. She drove a car whose headlights also projected black light when necessary. She was sometimes assisted by her fiance, Donald Borden, an agent of the U.S. State Department. Phantom Lady ran as one of the features in *Police Comics* through #23. Arthur Peddy continued as the artist through #13, with Joe Kubert drawing her feature in *Police Comics* #14-16; Frank Borth on #17-21; Arthur Peddy returned for #22,; and Rudy Palais on #23. Phantom Lady also appeared in *Feature Comics* #69-71 as part of a crossover with Spider Widow and the Raven

In a 2009 study of the debt collection industry, the Commission concluded that the "most significant change in the debt collection business in recent years has been the advent and growth of debt buying." "Debt buying" refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that

creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors, including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008,

with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also considered its prior enforcement and policy work related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than 5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:
