 The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance for case

writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students' own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines, as well as those training for Professional Development and Management Education qualifications. It

will also be useful for postgraduate, MBA and Executive Education students wanting to make the most of case studies in their learning and assessments.

Written expressly for undergraduate courses, *An Introduction to the Dark Side of Interpersonal Communication* provides students with a comprehensive yet approachable introduction to the nature, functions, antecedents, and outcomes of dark side events and behaviors in close relationships. The book features a balance of relatable examples and academic, theoretical, research-based approaches to help students thoughtfully and critically consider interpersonal processes and their impacts on relationships and communication. After a general introduction to the dark side perspective, the book discusses a number of events--and potential responses--that can arise within interpersonal relationships, including relationship transgressions such as hurtful communication, jealousy, deception, infidelity, aggression and violence, stalking, teasing, destructive conflict, and more. Students learn about the vital role of communication in these instances and how, in select cases, constructive communication practices can mitigate the incidences and the effects of dark side events in interpersonal relationships. Chapter introductions, vignettes, discussion questions, and theoretical considerations enhance the student learning experience and provide ample opportunities for in-class dialogue and critical thought. *An Introduction to the Dark Side of Interpersonal Communication* is an innovative and insightful textbook well suited for undergraduate courses in communication.

Organizational change impacts upon all organizations regardless of size and sector. In this unique organizational change textbook, important ongoing debates about managing change and leading change are combined, giving a broader perspective that encourages readers to engage with both management and leadership. In combination, management and leadership insights inform how organizations are changing and how we can make a positive difference in such processes of change. *Managing and Leading Organizational Change* speaks both to the applied and practical aspects of organizational change, as well as questioning the research and evidence base of organizational change practices. Chapters begin with real-world insights, followed by coverage of the major theories. The ongoing nature of these debates is signposted through the inclusion of questioning sections with research case studies showcased. This textbook will be particularly beneficial for final year undergraduates and postgraduates studying organizational change, strategic change, change management and change leadership modules.

The Dark Side Taylor & Francis

The COVID-19 pandemic demonstrated the necessity for establishing practical strategic global education collaboration throughout the world. The challenges are serious and come in many forms, including but not limited to educational policies, technology limitations, economic, mental health, linguistic barriers, and power struggles. Undoubtedly, international education has a profound impact on the world community, and both teachers and learners need to equip themselves with global critical ways and skills to navigate all kinds of challenges and bring about positive change in the world. *The Role of Educators as Agents and Conveyors for Positive Change in Global Education* highlights the role of educators as agents and conveyors for positive change in local, regional, and global arenas. As such, it analyzes various conventional and modern educational and learning theories and teaching pedagogies to promote global citizenship among students and teachers. Covering key topics such as learning engagement, curriculum, and online learning, this reference work is ideal for higher education faculty, administrators,

researchers, practitioners, academicians, instructors, and students.

The Dark Side of Transformational Leadership Edward Elgar Publishing

For more than a century management education has fostered the development of leaders of many of the world's industrial successes with their immense creation of output that we now see as unsustainable. If we wish to avoid a time of tumultuous environmental crises in the global ecosystem management education must move more to being part of the solution, rather than of the problem. The task of transforming management education to contribute to the challenge of moving to global sustainability is upon us.

Management Education for Global Sustainability provides a diverse and extensive set of perspectives on how management education can be transformed to be a significant part of the solution to the sustainability problem that business and other sectors of our world must grapple with. The spectrum of current integration of managing for sustainability into business school curricula is provided. A review of the current status sustainability oriented business degree options is completed. Approaches from around the world including China are offered. Management Education approaches through systems thinking, art, and stakeholder's theory are parsed. Specific examples of notable programs are covered, sustainable entrepreneurship for instance. A series of reports on program and institutional level initiatives that have been very successful are described. A new MBA program with a major in sustainability, integrating ocean science courses, is considered. Programs with action learning projects and industry concentrations as core elements will be analyzed. The sense of deeper purpose vibrancy and developing authentic relationships in management education for global sustainability is robust throughout this volume.

The Social Impacts of Mine Closure in South Africa Routledge

Von Psychopathen wie Charles Manson oder Serienmördern wie Jack the Ripper geht eine unheimliche Faszination aus. Doch woher kommt sie? Und warum verdrängen wir so gern das alltäglichere Böse - von den eigenen Gewaltphantasien bis zum Machtmissbrauch im Büro? Die Kriminalpsychologin und Bestsellerautorin Julia Shaw taucht das Phänomen des Bösen in neues Licht. Shaw sucht und findet das Böse nicht nur in den Gehirnen von Massenmördern, sondern in jedem von uns. Und sie erläutert mithilfe psychologischer Fallstudien und neuester

neurowissenschaftlicher Erkenntnisse, wie wir uns mit unserer dunklen Seite versöhnen. Ein augenöffnendes Buch, das die vertrauten Kategorien von Gut und Böse völlig über den Haufen wirft.

The Dark Side of the Earth Cognella Academic Publishing

The way organizations manage their value chain has changed dramatically over the past decade. Today, organizations take account of economic issues, but they also adopt a broader perspective of their purpose including social and environmental issues. Yet despite its global spread, sustainable value chain management remains an uncertain and poorly defined ambition, with few absolutes. The social and environmental issues that organizations should address easily can be interpreted as including virtually everything. Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity, human rights, safety, philanthropy, community, and environment. However, the penetration of social and environmental considerations into value chain management is described as 'desire lacking reality' thereby making the idea a patchy success. The objective of this research anthology is to investigate different angles of sustainable value chain management. The book's 27 chapters fill holes and explore new fields; the chapters are organised in five sections: Sustainable value chains - context, drivers, and barriers; Sustainable value chains - managing activities; Sustainable value chains - managing networks and collaboration; Sustainable value chains - integrative perspectives; and Sustainable value chains - specific sectorial and industry perspectives.

The Routledge Companion to Leadership IAP

Leadership has never been more important - and divisive - than it is today. The idea and discourse of the leader remains a critical factor in organizational and societal performance, but there is evident tension between the persistent focus on the critical importance of individual leaders and the increasing emphasis on collective leadership. The Routledge Companion to Leadership provides a survey of the contentious and dynamic discipline of leadership. This collection covers key themes in the field, including advances in leadership theory, leadership in a range of contexts and geographies, leadership failure, leadership process, and leadership development. Topics range from micro studies to wider political analyses of leadership, taking in unusual but important aspects such as

portrayals of leadership in architecture, media, and science fiction. Contributions from 61 internationally renowned authors from 16 countries make available the full range of perspectives, approaches, and insights on the idea of leadership.

Providing both a social sciences and a psychological approach, these go beyond common themes to offer diverse perspectives on such topics as emotion and leadership, portrayals of leadership. This volume situates leadership debates and evidence within contemporary leadership crises, while ensuring that the explorations of the issues are of enduring relevance. With wide and critical coverage of the key topics and potent contextualization of themes in current events, *The Routledge Companion to Leadership* is the ideal resource for graduate study in leadership.

Academy of Management Annual Meeting Routledge

The progressive convergence of global economic and social structures calls for a rethinking of management practices as they relate to cultural diversity and moral values. A key element for coping with this transformational phenomenon is the Aristotelian concept of Practical Wisdom, which helps us to do the right thing, in the right way, at the right time and for the right reasons. Expert academics and practitioners share their insights into contemporary theories and conventions for ethical decision-making in diverse cultural contexts. About the Editors Martina Stangel-Meseke - professor of business psychology. Christine Boven - professor of intercultural management. Gershon Braun - lecturer of business ethics. André Habisch - professor of economics. Nicolai Scherle - professor of intercultural management and diversity. Frank Ihlenburg - managing partner of a change management consultancy.

The Art of Strategy Oxford University Press, USA

This book investigates the relationship between mining, mine closure and housing policy in post-apartheid South Africa, using concepts from new institutional economics and evolutionary governance theory. Mine closures present a major challenge to the mining industry and governments, with this being particularly noticeable in the Global South. This book argues that the dependencies created by the mining industry and mine housing policies while a mine is operational cause serious societal problems when it closes. To demonstrate this, the book applies the concepts of place attachment, asset-based development and social disruption. Conceptually, the book challenges the

view that place attachment and asset-based development are the most appropriate and often the only policy responses in mining areas. In South Africa, the mining industry and the government have created comprehensive housing programmes linked to homeownership to promote place attachment, stability and wealth among mine workers. These programmes do not consider the disruption that mine closure might bring. The book challenges the blind application, during boom periods, of policies which create long-term dependencies that are difficult to manage when a mine closes. This book will be of interest to students and scholars researching the social impacts of mining and the extractive industries, social geography and sustainable development, as well as policymakers and practitioners working with mine closure or social impact assessments.

Organizational Change Routledge

Through incisive critical argument and illustrative case studies this book offers a rare critical perspective on transformational leadership theory and presents an alternative approach.

Until Antietam SIU Press

This volume features representative studies focusing on the evolution of text genres in corporate and professional communication. Genre change is explored in various contexts in light of the increasing importance of new media and the profound social changes that have occurred in the last few decades. Major theoretical issues are raised and discussed, highlighting the need to reconsider the repertoire of conventions traditionally identified in each specific genre, and to reassess and update the analytical tools used to investigate them, about three decades after the emergence of genre analysis.

This companion takes the student through the different approaches to working with cases in the classroom, virtually and for research purposes. Capturing insights and best practices shared by scholars of the case method from around the world, this book aims to: • equip students to work with and analyse case studies as part of their programme of study; • adapt student approaches to online learning with cases; • guide students on how to use case studies as a form of assessment; • help students looking to adopt a case study approach to a research project. These aims are framed in the sections of the book. Each section contains reflections

from academics across the world, personal insights and lessons learnt from case sessions, templates, and exercises to develop your own skills in learning or researching with cases. Full examples showcase the nature of cases by type and format: short incident, exercise case, situation case; single, sequential and digital cases. This text is for undergraduate and postgraduate Business and Management students, those studying as part of executive education programmes, MBA students, and academics who are using or preparing to use case studies in their learning or research. Online resources include

PowerPoint slides, video material and example case studies from around the world.
