Bishop - Häftad ... The theoretical background of hydroelasticity has been discussed in many places; an extensive summary with bibliography was given by Bishop et al. Rather than dwelling on the details of theory, this paper presents a practical application of hydroelasticity to non-beamlike ships, namely small waterplane area twin-hulled (SWATH) ships. Hydroelasticity of non-beamlike ships in waves ... The investigation methodology of hydroelasticity of ship

structures is presented. A mathematical model which combines ship geometry, mass distribution, 1D hull model, dry natural vibrations, hydrostatic model and hydrodynamic model is worked out. Investigation of ship hydroelasticity - ScienceDirect The aim of this paper is to investigate the wave-body interaction of flexible floating bodies by coupling RANS/CFD and Finite Element software. A combination of overset and morphing approaches

and finite volume solution to allow for the motion of a barge at the free surface is used.
