## LOGAN JUSTICE

**Library of Congress Catalogs** Rowman & Littlefield Publishers  
In the midst of unprecedented attention to gender based violence (GBV), prompted in part by the #MeToo movement, Collaborating for Change: Transforming Cultures to End Gender-Based Violence in Higher Education provides a groundbreaking analysis of higher education culture and how it can be transformed to eradicate GBV. This book builds on existing scholarship and practice, offering unique reflections from faculty, staff, and students about potential avenues for change that go beyond programs and policies. It recognizes the important work achieved to date on this topic but argues that transformation of cultures, rather than reform of practices, is now required. Starting from the premise that cultural change must be embedded in groups of people working together, the contributors to the book offer insights into what makes for constructive, effective collaborations between activists in universities and the wider community, as well as with university leaders, managers, and policy-makers. The volume is an interdisciplinary, international account/analysis of attempts to transform higher education cultures in an attempt to eradicate GBV. The chapters, contributed by leading scholars and practitioners in the field, span the experiences of GBV in Canada, the United States, Scotland, England, France, and India. Collaborating for Change reveals the different institutional, political, and cultural contexts in which activists, scholars, and practitioners endeavor to eradicate GBV and provides insights for others engaged in this work around the globe. The book argues that nothing short of a transformation is required to make higher education safe for all.

**World Social Report 2020** Cambridge University Press  
Forced Marriage: Introducing a social justice and human rights perspective brings together leading practitioners and researchers from the disciplines of criminology, sociology and law. Together the contributors provide an international, multi-disciplinary perspective that offers a compelling alternative to prevailing conceptualisations of the problem of forced marriage. The volume

examines advances in theoretical debates, analyses existing research and presents new evidence that challenges the cultural essentialism that often characterises efforts to explain, and even justify, this violation of women's rights. By locating forced marriage within broader debates on violence against women, social justice and human rights, the authors offer an intersectional perspective that can be used to inform both theory and practical efforts to address violence against diverse groups of women. This unique book, which is informed by practitioner insights and academic research, is essential reading for practitioners and students of sociology, criminology, gender studies and law. *International Civil Engineering Monthly* Oxford University Press  
*Building Histories: the Proceedings of the Fourth Annual Construction History Society Conference* Lulu.com  
*Restructuring Relations* Commonwealth Secretariat  
In the first book-length treatment of the application of feminist theories of international law, Charlesworth and Chinkin argue that the absence of women in the development of international law has produced a narrow and inadequate jurisprudence that has legitimated the unequal position of women worldwide rather than confronting it. The boundaries of international law provides a feminist perspective on the structure, processes and substance of international law, shedding new light on treaty law, the concept of statehood and the right of self-determination, the role of international institutions and the law of human rights. Concluding with a consideration of whether the inclusion of women in the jurisdiction of international war crimes tribunals represents a significant shift in the boundaries of international law, the book encourages a dramatic rethinking of the discipline of international law. With a new introduction that reflects on the profound changes in international law since the book's first publication in 2000, this provocative volume is essential reading for scholars, practitioners and students alike.  
Zed Books Ltd.

Worldwide, patterns of violence against women differ markedly from violence against men. For example, women are more likely than men to be sexually assaulted or killed by someone they know. The United Nations has defined violence against women as "gender-based" violence, to acknowledge that such violence is

rooted in gender inequality and is often tolerated and condoned by laws, institutions, and community norms. Violence against women is not only a profound violation of human rights, but also a costly impediment to a country's national development. While gender-based violence occurs in many forms throughout the life cycle, this review focuses on two of the most common types-physical intimate partner violence and sexual violence by any perpetrator. Unfortunately, the knowledge base about effective initiatives to prevent and respond to gender-based violence is relatively limited. Few approaches have been rigorously evaluated, even in high-income countries. And such evaluations involve numerous methodological challenges. Nonetheless, the authors review what is known about more and less effective-or at least promising-approaches to prevent and respond to gender-based violence. They present definitions, recent statistics, health consequences, costs, and risk factors of gender-based violence. The authors analyze good practice initiatives in the justice, health, and education sectors, as well as multisectoral approaches. For each of these sectors, they examine initiatives that have addressed laws and policies, institutional reforms, community mobilization, and individual behavior change strategies. Finally, the authors identify priorities for future research and action, including funding research on the health and socioeconomic costs of violence against women, encouraging science-based program evaluations, disseminating evaluation results across countries, promoting investment in effective prevention and treatment initiatives, and encouraging public-private partnerships.

*The boundaries of international law* UNICEF  
Annotation. The Core Commitments for Children in Humanitarian Action the CCCs constitute UNICEF's central policy on how to uphold the rights of children affected by humanitarian crisis. They are a framework for humanitarian action, around which UNICEF seeks to engage with partners. The intent of the updated CCCs remains to promote predictable, effective and timely collective humanitarian action, and to clearly outline the areas in which UNICEF can best contribute to results. Initially developed in 1998 and reviewed in 2004, this latest edition of the CCCs brings UNICEF's humanitarian policy in line with evolving humanitarian

contexts, including humanitarian reform and the cluster approach, informed by field-based evidence and practice. *Government Reports Annual Index* Zed Books Ltd.

The Judicial Bench Book on Violence Against Women in Commonwealth East Africa situates VAW in Kenya, Rwanda, Tanzania and Uganda. By placing VAW within the socio-cultural and legal context of the region, the bench book will enhance the ability of judicial officers to handle cases of VAW, both within a human rights as well as a gender perspective.

#### **Terrorizing Women** World Bank Publications

Adopted in 2007, the UN Declaration on the Rights of Indigenous Peoples establishes self-determination--including free, prior, and informed consent--as a foundational right and principle. Self-determination, both individual and collective, is among the most important and pressing issues for Indigenous women worldwide. Yet Indigenous women's interests have been overlooked in the formulation of Indigenous self-government, and existing studies of Indigenous self-government largely ignore issues of gender. As such, the current literature on Indigenous governance conceals patriarchal structures and power that create barriers for women to resources and participation in Indigenous societies. Drawing on Indigenous and feminist political and legal theory--as well as extensive participant interviews in Canada, Greenland, and Scandinavia-- this book argues that the current rights discourse and focus on Indigenous-state relations is too limited in scope to convey the full meaning of "self-determination" for Indigenous peoples. The book conceptualizes self-determination as a foundational value informed by the norm of integrity and suggests that Indigenous self-determination cannot be achieved without restructuring all relations of domination nor can it be secured in the absence of gender justice. As a foundational value, self-determination seeks to restructure all relations of domination, not only hegemonic relations with the state. Importantly, it challenges the opposition between "self-determination" and "gender" created and maintained by international law, Indigenous political discourse, and Indigenous institutions. Restructuring relations of domination further entails examining the gender regimes present in existing Indigenous self-government institutions, interrogating the relationship between Indigenous self-determination and gender violence, and considering future visions of Indigenous self-determination, such as repatriation of

Indigenous governance and an independent statehood.

The Oxford Handbook of Comparative Regionalism - the first of its kind - offers a systematic and wide-ranging survey of the scholarship on regionalism, regionalization, and regional governance. Unpacking the major debates, leading authors of the field synthesize the state of the art, provide a guide to the comparative study of regionalism, and identify future avenues of research. Twenty-seven chapters review the theoretical and empirical scholarship with regard to the emergence of regionalism, the institutional design of regional organizations and issue-specific governance, as well as the effects of regionalism and its relationship with processes of regionalization. The authors explore theories of cooperation, integration, and diffusion explaining the rise and the different forms of regionalism. The handbook also discusses the state of the art on the world regions: North America, Latin America, Europe, Eurasia, Asia, North Africa and the Middle East, and Sub-Saharan Africa. Various chapters survey the literature on regional governance in major issue areas such as security and peace, trade and finance, environment, migration, social and gender policies, as well as democracy and human rights. Finally, the handbook engages in cross-regional comparisons with regard to institutional design, dispute settlement, identities and communities, legitimacy and democracy, as well as inter- and transregionalism.

Offering nuanced insights into violence, humanitarian protection, gender relations, and coping of refugees in a Ugandan refugee camp, this book shows how risks prevail for refugees despite and partly due to their settlement in the camp and the system established to protect them, and hones in on the strategies used by people to protect themselves.

#### **Concrete** Oxford University Press

Passed in 2000, the United Nations Security Council Resolution 1325 and subsequent seven Resolutions make up the Women, Peace, and Security (WPS) agenda. This agenda is a significant international normative and policy framework addressing the gender-specific impacts of conflict on women and girls, including protection against sexual and gender-based violence, promotion of women's participation in peace and security processes, and

support for women's roles as peace builders in the prevention of conflict and rebuilding of societies after conflict. Implementation within and across states and international organizations - and within peace and security operations - has been slow despite significant transnational advocacy in support of the WPS agenda. The Oxford Handbook of Women, Peace, and Security brings together scholars, advocates, and policymakers to provide an overview of what we know concerning what works to promote women's participation in peace and security, what works to protect women and girls from sexual and gender-based violence and other human rights violations, and what works to prevent conflict drawing on women's experiences and knowledge of building peace from local to global levels. Just as importantly, it addresses the gaps in knowledge on and the future direction of scholarship on WPS. The handbook particularly aims to build on the findings from the 2015 Global Study of Resolution 1325, commissioned by the UN-Secretary General. Over the course of six sections, the handbook addresses the concepts and early history behind WPS; the theory and practice of WPS; international institutions involved with the WPS agenda; the implementation of WPS in conflict prevention, peace operations, peace building, arms control, human-rights protection, and protection of civilians; connections between WPS and other UN resolutions and agendas; and the ongoing and future challenges of WPS.

#### **Engineering Journal** CRC Press

On 21 May 2019, it was officially recognized that we are now living in the Anthropocene, our earth's latest geological epoch, named for the 'unmistakable imprint of human activities'. This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing, *Silent Spring*, and next year (2022) it will be 50 years since the first UN Conference on the Human Environment, held in Stockholm in June 1972. This book, *Our Earth Matters: Pathways to a Better Common Environmental Future*, is a special issue of the journal *Environmental Policy and Law*, which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world, which examine existing global regulatory approaches, processes, instruments and institutions for the protection of the global environment. The articles are grouped under four headings: Prognoses, Processes, Problematique and Prospects, and in them the authors have sought to explore

answers to the existential environmental crisis. They urge us to ponder our reckless destruction of natural spaces, endangering of plant and animal species, poisoning of the environment, and general disturbance of our essential ecological processes. The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision-makers to re-examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond. The book will be of interest to all those working to secure the sustainable future of the human race on our only abode, planet Earth. Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law, Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi; Editor-in-Chief of the journal *Environmental Policy & Law* (Amsterdam: IOS Press) and of the *Yearbook of International Environmental Law* (Oxford: OUP).

**Physico-Mathematical Theory of High Irreversible Strains in Metals** Manchester University Press

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

*Building Histories: the Proceedings of the Fourth Annual Construction History Society Conference* CRC Press

Backed up by a detailed analysis, tables and color maps, the authors argue that violence against women adversely affects all levels of society, and ultimately the security of a nation, and offer

ways to heal the wounds of violence against women on both a micro and macro level.

**Congressional Record** IOS Press

Presents a new physical and mathematical theory of irreversible deformations and ductile fracture of metals that acknowledges the continuous change in the structure of materials during deformation and the accumulation of deformation damage. Plastic deformation, viscous destruction, evolution of structure, creep processes, and long-term strength of metals and stress relaxation are described in the framework of a unified approach and model. The author then expands this into a mathematical model for determining the mechanical characteristics of quasi-samples of standard mechanical properties in deformed semi-finished products.

This annual report examines changing trends in foreign direct investment (FDI) flows worldwide, at the regional and country levels and emerging measures to improve its contribution to development. The 2006 report highlights the changing role of developing countries and transition economies in global foreign direct investment and the international production system. It examines their emergence as significant sources of foreign direct investment as well as the underlying factors and broader implications.

Consists of English translations of articles originally published in other languages in various journals.

*Gender, Violence and Security* Oxford University Press

More than 600 women and girls have been murdered and more than 1,000 have disappeared in the Mexican state of Chihuahua since 1993. Violence against women has increased throughout Mexico and in other countries, including Argentina, Costa Rica, Guatemala, and Peru. Law enforcement officials have often failed or refused to undertake investigations and prosecutions, creating

a climate of impunity for perpetrators and denying truth and justice to survivors of violence and victims' relatives. *Terrorizing Women* is an impassioned yet rigorously analytical response to the escalation in violence against women in Latin America during the past two decades. It is part of a feminist effort to categorize violence rooted in gendered power structures as a violation of human rights. The analytical framework of femicide is crucial to that effort, as the editors explain in their introduction. They define femicide as gender-based violence that implicates both the state (directly or indirectly) and individual perpetrators. It is structural violence rooted in social, political, economic, and cultural inequalities. *Terrorizing Women* brings together essays by feminist and human rights activists, attorneys, and scholars from Latin America and the United States, as well as testimonios by relatives of women who were disappeared or murdered. In addition to investigating egregious violations of women's human rights, the contributors consider femicide in relation to neoliberal economic policies, the violent legacies of military regimes, and the sexual fetishization of women's bodies. They suggest strategies for confronting femicide; propose legal, political, and social routes for redressing injustices; and track alternative remedies generated by the communities affected by gender-based violence. In a photo essay portraying the justice movement in Chihuahua, relatives of disappeared and murdered women bear witness to femicide and demand accountability.
