*Roberts Academic Medicine Handbook* Springer

This collection of essays asserts the specific value of world history research and teaching, showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public. The twelve contributors, each with their own academic areas of interest, are experienced scholars and classroom teachers. Uniting them together in this volume is their professional relationship with Jerry H. Bentley (1949-2012). This shared connection served as a catalyst to showcase Bentley's enduring legacy: a commitment to investigating large-scale questions with detailed empirical evidence that explains the human condition—documenting both patterns of similarity and difference in ways that account for regional and temporal variations. The volume continues Bentley's meticulous attention to world historical methods: focus on scale, cross-cultural encounter, comparison, periodization, critical geography, and interdisciplinarity. *Encounters Old and New in World History* responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities. Contributors interrogate the institutional settings, disciplinary proclivities, methodological choices, and diverse source bases of world history research and teaching. Several essays address the ways in which present-day concerns influence research on local and global scales. Other essays pay particular attention to the production and circulation of knowledge across regional, temporal, and class boundaries, as well as between the academy and the wider public. Claiming the centrality of globally informed and focused approaches to historical inquiry, researchers continue the conversations that Bentley carried on through his own scholarship, teaching, editing of the *Journal of World History*, participating in public forums, and contributing to public discussions about the place of history in understanding today's global integration. The stakes involved in asking questions about the shared history of humankind continue to increase in the current era of intensified globalization. It is incumbent upon scholars with the skills to work across linguistic, geographic, temporal, and disciplinary boundaries to show the ways that cross-cultural encounters happened historically, and to point out how such interactions play out in the institutions, classrooms, and public debates where historical interpretations are created and shared.

**Affective and Emotional Aspects of Human-computer Interaction** Academic Encounters Level 3 Student's Book Reading and Writing

This book outlines the status quo of worldwide wildlife tourism and its impacts on planning, management, knowledge, awareness, behaviour and attitudes related to wildlife encounters. It sets out to fill the considerable gaps in our knowledge on wildlife tourism, applied ecology, and

environmental education, providing comprehensive information on and an interdisciplinary approach to effective management in wildlife tourism. Examining the intricacies, challenges, and lessons learned in a meaningful and rewarding tourism niche, this interdisciplinary book comprehensively examines the major potentials and controversies in the wildlife tourism industry. Pursuing an insightful, provocative and hands-on approach, it primarily addresses two questions: 'Can we reconcile the needs of the wildlife tourism industry, biodiversity conservation, ecological learning and animal ethics issues?' and 'What is the Future of the Wildlife Tourism Industry?'. Though primarily intended as a research text, it also offers a valuable resource for a broad readership, which includes university and training students, researchers, scholars, tourism practitioners and professionals, planners and managers, as well as the staff of government agencies.

Diese Sammlung von Schriften aus der Zeit von 1970 bis 1990 des brasilianischen Pädagogen Paulo Freire (1921-1997) gibt einen Einblick in die Grundlagen und Prinzipien seiner Bildungsarbeit auf der Basis der Pädagogik der Befreiung. In den ausgewählten Texten werden nicht nur pädagogische Probleme und inhaltlich-methodische Fragen der Bildungsarbeit thematisiert. Sie enthalten ebenso Analysen und Bewertungen von Politik, Kultur, Religion, Ethik und Veränderungsmöglichkeiten von Gesellschaft - eine Erweiterung, die sich gegen eine Vorstellung wendet, Pädagogik sei von Gesellschaft und Politik losgelöst zu behandeln. Scharfsinnig hat Freire u.a. die verheerenden Folgen des Neoliberalismus für Individuum und Gesellschaft analysiert und zum widerständigen Denken und Handeln ermuntert. Eine Auswahl repräsentativer alter und neuer Texte von Paulo Freire: Wer sie zur Hand nimmt, entdeckt rasch, dass uns dieser brasilianische Pädagoge nicht nur für die Theorie und Praxis unserer Erziehungsarbeit, sondern für unser Überleben Entscheidendes zu sagen hat. Sebastian Ullrich untersucht personalisierte Internetauftritte. Ziel ist es, Erkenntnisse über die Wirkungen von personalisierten Internetauftritten schwacher und starker Marken zu gewinnen. Dabei sollen sowohl affektive als auch kognitive Prozesse betrachtet werden. Anschließend werden die Konstrukte der Zufriedenheit und Vertrauen in ihrer Funktion als Mediatoren für Bindungsprozesse erörtert. Auf Basis der theoretischen Erkenntnisse werden die Hypothesen zur Wirkungsweise von personalisierten Internetauftritten formuliert. Abschließend werden Implikationen für weitere Forschungsmöglichkeiten im Bereich personalisierter Internetauftritte gegeben und Handlungsempfehlungen für die Praxis abgeleitet.

Mit über 200.000 verkauften Exemplaren dominierte „Power – Die 48 Gesetze der Macht“ von Robert Greene monatelang die Bestsellerlisten. Nun erscheint der Klassiker als Kompaktausgabe: knapp, prägnant, unterhaltsam. Wer Macht haben will, darf sich nicht zu lange mit moralischen Skrupeln aufhalten. Wer glaubt, dass ihn die Mechanismen der Macht nicht interessieren müssten, kann morgen ihr Opfer sein. Wer behauptet, dass Macht auch auf sanftem Weg erreichbar ist, verkennt die Wirklichkeit. Dieses Buch ist der Machiavelli des 21. Jahrhunderts, aber auch eine historische und literarische Fundgrube voller Überraschungen.

Heritage Ecologies presents an ecological understanding of heritage that furthers a concern for how its making and unmaking always involves a wide range of human and other-than-human actors. Recognizing the entangled nature-cultures of heritage is essential in the Anthropocene era, where uncertainty and rapid environmental change force us to recast common conceptions of inheritance and to envision new strategies for preservation. Heritage sites are meant to be open and shared spaces, and a recurring argument in the cases presented here is that this openness inevitably also overrides our selections, orders and appreciations. Through a diverse range of case studies, the chapters collected in this book aim to explore the affects and memories engendered by diverse heritage ecologies where humans are neither the sole makers nor the only inheritors. The common call is that the experiential, perceptive and informational plenitude enabled through contributions of other-than-human actors is key to an ecological rethinking of heritage in the twenty-first century.

Heritage Ecologies is unique in bringing heritage studies into closer proximity with a wide variety of non-representational and object-oriented theories and is an important volume for students and researchers in archaeology and heritage studies.

Fisher & Frey's answer to close and critical reading Learn the best ways to use text-dependent questions as scaffolds during close reading and the big understandings they yield. But that's just for starters. Fisher and Frey also include illustrative video, texts and questions, cross-curricular examples, and an online facilitator's guide—making the two volumes of TDQ a potent professional development tool across all of K-12. *Academic E-Books: Publishers, Librarians, and Users* provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both

the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

This book describes the most important kinds of texts in English and introduces the methodological techniques used to analyse them. Three analytical approaches are introduced and compared, describing a wide range of texts from the perspectives of register, genre and style. The primary focus of the book is on the analysis of registers. Part 1 introduces an analytical framework for studying registers, genre conventions, and styles. Part 2 provides detailed descriptions of particular text varieties in English, including spoken interpersonal varieties (conversation, university office hours, service encounters), written varieties (newspapers, academic prose, fiction), and emerging electronic varieties (e-mail, internet forums, text messages). Finally, Part 3 introduces advanced analytical approaches using corpora, and discusses theoretical concerns, such as the place of register studies in linguistics, and practical applications of register analysis. Each chapter ends with three types of activities: reflection and review activities, analysis activities, and larger project ideas.

Uniting forensics, law, and social science in meaningful and relevant ways, *Forensic Science and the Administration of Justice*, by Kevin J. Strom and Matthew J. Hickman, is structured around current research on how forensic evidence is being used and how it is impacting the justice system. This unique book—written by nationally known scholars in the field—includes five sections that explore the demand for forensic services, the quality of forensic services, the utility of forensic services, post-conviction forensic issues, and the future role of forensic science in the administration of justice. The authors offer policy-relevant directions for both the criminal justice and forensic fields and demonstrate how the role of the crime laboratory in the American justice system is evolving in concert with technological advances as well as changing demands and competing pressures for laboratory resources.
