What makes a leader stand out? What are the keys to truly making a difference? And how can you become the influencer you were created to be? With more than 40 years of leadership experience, Stan Toler knows what it takes to empower people to reach organizational and personal goals. He cuts through the mystery and confusion and provides clear guidelines to help you accomplish vital leadership tasks, including... defining your vision, developing your plan, and communicating clearly to help people buy in to your shared goal overcoming common leadership challenges to create a culture of success building strong relationships and effective teams that make working hard worthwhile You'll find all the tools, tips, and practical guidance you need to help individuals and groups reach their highest potential and fulfill their God-given purpose.

*Concrete Box-girder Bridges* John Wiley & Sons

This text presents the theoretical and practical aspects of analysis and design, complemented by

numerous design examples.

**Reinforced and Prestressed Concrete** Intelligene

This book covers a wide range of topics in fracture and damage mechanics. It presents historical perspectives as well as recent innovative developments, presented by peer reviewed contributions from internationally acknowledged authors. The volume deals with the modeling of fracture and damage in smart materials, current industrial applications of fracture mechanics, and it explores advances in fracture testing methods. In addition, readers will discover trends in the field of local approach to fracture and approaches using analytical mechanics. Scholars in the fields of materials science, engineering and computational science will value this volume which is dedicated to

Meinhard Kuna on the occasion of his 65th birthday in 2015. This book incorporates the proceedings of an international symposium that was organized to honor Meinhard Kuna's contributions to the field of theoretical and applied fracture and damage mechanics.

An Avalon Novel Routledge

Dynamics of Smart Structures is a practical, concise and integrated text that provides an introduction to the fundamental principles of a field that has evolved over the recent years into an independent and identifiable subject area. Bringing together the concepts, techniques and systems associated with the dynamics and control of smart structures, it comprehensively reviews the differing smart materials that are employed in the development of the smart structures and covers several recent developments in the field of structural dynamics. Dynamics of Smart Structures has been developed to complement the author's new interdisciplinary programme of study at Queen Mary, University of London that includes courses on emerging and new technologies such as biomimetic robotics, smart composite structures, micro-electro-mechanical systems (MEMS) and their applications and prosthetic control systems. It includes chapters on smart materials and structures, transducers for smart structures, fundamentals of structural control, dynamics of

continuous structures, dynamics of plates and plate-like structures, dynamics of piezoelectric media, mechanics of electro-actuated composite structures, dynamics of thermo-elastic media: shape memory alloys, and controller designs for flexible structures.

In the sequel to one of Wahida's most successful titles [Payback is a Mutha], old scores are settled and before long, new tensions arise. Still recovering from the suicide of her best friend, Shan now pregnant by a married man is forced to make major decisions in her life. Ready to leave the fast life behind, Shan believes a move to Detroit will help her become a stronger woman-but someone wants revenge against Shan's brother and is willing to destroy Shan in the process. Torn over his love for his sister and his desire to get back on top of the drug game, Shan's brother, Peanut knows the danger of the streets. Old beefs become new scores and before long, a turf war is raging. With the stakes as high as they've ever been, only a few people will be left standing-and Shan is determined to be one of them.

**Is Sp 34 : Handbook On Concrete Reinforcement And Detailing** CABI

\* Presents the basics of seismic-resistant design of concrete structures. \* Provides a major focus on the seismic design of precast bracing systems.

**Political Discourse Analysis** CRC Press

This textbook first published in 1992 now appearing in its third edition retains the best features from the earlier editions and adds significantly to the contents, which include developments in the 1990s.

Stash is a crochet term for leftover or oddball yarn. Stash-Busting is finding a project that use small amounts of yarns. In this amazing book you will find over 40 designs all made with small amounts of different sizes of yarns for home, baby and accessories! Designs include gnome coasters, little gnomes, easy doilies, afghans, hot pads, baby blankets, baby slippers, a ladies shawllette, jewelry and more!

I feel elevated in presenting the New edition of this standard treatise. The favourable reception, which the previous edition and reprints of this book have enjoyed, is a matter of great satisfaction for me. I wish to express my sincere thanks to numerous professors and students for their valuable suggestions and recommending the patronise this standard treatise in the future also.

This practice-oriented book, now in its second edition, presents a lucid yet comprehensive coverage of the engineering properties and uses of the materials commonly used in building construction in India. Profusely illustrated with tables and diagrams, the book brings into light the basics of building materials and their specifications. Besides giving information regarding the traditional building materials, the text now acquaints the reader with up-to-date and in-depth information pertaining to modern materials available in the market. The references to IS codes and standards make this text suitable for further study and field use. The second edition possesses some substantial changes in Chapters 12, 13, 14 and 20. Now, the book offers a new section on durability of concrete in Chapter 12; a modified section regarding revision of IS 10262 (1982) code on concrete mix design to IS 10262 (2009) and a new section on classification of exposure conditions in Chapter 13; and a new section relating to large advances made in concrete construction and repair chemicals in Chapter 14. Besides, the content of Chapter 20 has been

completely updated, with a particular emphasis on the extensive use of aluminium in building construction. Primarily intended for the students pursuing undergraduate degree (B.E./B.Tech.) and diploma courses in civil engineering and architecture, the book, on account of lecture-based presentation of the subject, should also prove eminently utilitarian for the young teachers to use it in their classroom lectures as well as for practising engineers to get a clear understanding of the fundamentals of the subject. NEW TO THE SECOND EDITION Review questions at the end of each chapter enable the reader to recapitulate the topics. Considerable attention is given on field practice. Syllabus of laboratory work on construction materials and a model question paper (Anna University) are given in appendices to guide the reader.

**Building Planning and Drawing** IABSE

The book covers the topics in depth, yet at the same time in a concise and student friendly way.

The content has been arranged in a very organized and graded manner- (e.g. Chapter 6 on Tension Members) The flow is very well structured and topics have been.

Earthquake-resistant Design of Structures 2e is designed for undergraduate students of civil engineering.

**The Elements of Structures** Rethinking Schools

In recent years issues such as ethics, tourist safety, human rights, ethnocentrism, cultural sensitivity, behavior codes, green consumerism, and the perceptions of "sustainability" have become increasingly important in tourism studies. This book focuses on the concepts of welfare and well-being in tourism and provides an explanation, definition and a critique of welfare within tourism studies. Subjects covered include the welfare of tourists, employees in the tourism industry, residents in tourism destinations, animals as tourist attractions and the natural environment.

**Matrix Analysis of Structures** Thomas Telford

This book deals with good ventilation, thermal comfort, and acoustic requirements when planning a building. As well as satisfying minimum standards and the regulations of local authorities, economics and future expansions are considered. The book discusses building drawings created through computer aided design. To understand the commands of AutoCAD and use them, the sequential procedure and steps involved while drawing plan, elevation and section are stored as screen captures and collection of these screen shots are placed in a CD which is enclosed with this book. The practising engineer will also find it as an excellent reference book.

**Higher Surveying** John Wiley & Sons

In this accessible new textbook, Isabela and Norman Fairclough present their innovative approach to analysing political discourse. Political Discourse Analysis integrates analysis of arguments into critical discourse analysis and political discourse analysis. The book is grounded in a view of politics in which deliberation, decision and action are crucial concepts: politics is about arriving cooperatively at decisions about what to do in the context of disagreement, conflict of interests and values, power inequalities, uncertainty and risk. The first half of the book introduces the authors' new approach to the analysis and evaluation of practical arguments, while the second half explores how it can be applied by looking at examples such as government reports, parliamentary debates, political speeches and online discussion forums on political issues. Through the analysis of current events, including a particular focus on the economic crisis and political responses to it, the authors provide a systematic and rigorous analytical framework that can be adopted and used

for students' own research. This exciting new text, co-written by bestselling author Norman Fairclough, is essential reading for researchers, upper undergraduate and postgraduate students of discourse analysis, within English language, linguistics, communication studies, politics and other social sciences.

**The Design Life of Structures** Routledge

The Sociology of Knowledge Approach to Discourse (SKAD) has reoriented research into social forms, structuration and processes of meaning construction and reality formation; doing so by linking social constructivist and pragmatist approaches with post-structuralist thinking in order to study discourses and create epistemological space for analysing processes of world-making in culturally diverse environments. SKAD is anchored in interpretive traditions of inquiry and allows for broadening - and possibly overcoming - of the epistemological biases and restrictions still common in theories and approaches of Western- and Northern-centric social sciences. An innovative volume, this book is exactly attentive to these empirically based, globally diverse further developments of approach, with a clear focus on the methodology and its implementation. Thus, The Sociology of Knowledge Approach to Discourse presents itself as a research program and locates the approach within the context of interpretive social sciences, followed by eleven chapters on different cases from around the world that highlight certain theoretical questions and methodological challenges. Presenting outstanding applications of the Sociology of Knowledge Approach to Discourse across a wide variety of substantive projects and regional contexts, this text will appeal to postgraduate students and researchers interested in fields such as Discourse Studies, Sociology, Cultural Studies and Qualitative Methodology and Methods.

**Seismic Design of Reinforced and Precast Concrete Buildings** New Age International

The whole area of durability, integrity and quality control of structures is starting to be taken very seriously by the construction industry. Central to this is the design life concept, which looks at the materials used, methods of construction, safety factors, maintenance and repair, and change of use, all from a holistic viewpoint. This new book

**Ten Principles for Rethinking the Mall** Tuttle Publishing

This book takes a fresh, student-oriented approach to teaching the material covered in the senior- and first-year graduate-level matrix structural analysis course. Unlike traditional texts for this course that are difficult to read, Kassimali takes special care to provide understandable and exceptionally clear explanations of concepts, step-by-step procedures for analysis, flowcharts, and interesting and modern examples, producing a technically and mathematically accurate presentation of the subject. "It's simple. No sight. No questions. Forty-eight hours." An intensely charged erotic journey, perfect for anyone who was seduced by 50 Shades of Grey. When thirty-seven-year-old psychologist Alexandra Blake leaves her comfortable suburban existence to travel for a series of lectures, she meets up with Dr. Jeremy Quinn, the man who opened her eyes and body to the world in ways she never thought possible. After a few glasses of champagne in his luxurious hotel penthouse, he presents her with an extraordinary proposition. Alexandra knows that they never promise each other something they can't commit to and that he will challenge her every inhibition. But she soon finds herself seduced into a level of surrender—and danger—she could never have imagined. Destined to Play is the first book in the Avalon Trilogy exploring the intricate relationships between trust and betrayal, desire and love, risk . . . and reward.
