Children

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. There are three sections to each guide: Introduction - includes advice on how to use the guide, an explanation of the skills being tested by the assessment objectives, an outline of the unit or module and, depending on the unit, suggestions for how to revise effectively and prepare for the examination questions. Content Guidance - provides an examiner's overview of the module's key terms and concepts and identifies opportunities to exhibit the skills required by the unit. It is designed to help students to structure their revision and make them aware of the concepts they need to understand the exam and how they might analyse and evaluate topics. Question and Answers - sample questions and with graded answers which have been carefully written to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

**A Level Mathematics for OCR A Student Book 1 (AS/Year 1)**  
Oxford University Press - Children

Student Unit Guides are perfect for revision. The Practical Chemistry section deals with experimental results and practical techniques, explaining how to obtain and record results and how to process them. The Practical Units section describes the skills required for choosing and planning your investigation and the skills required. The Appendix contains some useful theory and the Answers section provides answers to the questions that are set throughout the guide.

Exam Board: OCR B (Salters) Philip Allan

Written by experienced author Mike Smith, this Student Guide for Chemistry: - Helps students identify what they need to know with a concise summary of the topics examined in the AS and A-level specifications - Consolidates understanding with tips and knowledge check questions - Provides opportunities to improve exam technique with sample answers to exam-style questions - Develops independent learning and research skills - Provides the content for generating individual revision notes

*A-Level Chemistry for OCR A* Oxford University Press - Children  
Exam Board: AQA, Edexcel, CCEA, OCR, WJEC Eduqas Level: A-level Subject: Chemistry First teaching: September 2015 First exams: Summer 2017 Master the skills you need to set yourself apart and hit the highest grades; this year-round course companion develops the higher-order thinking skills that top-achieving students possess, providing step-by-step guidance, examples and tips for getting an A grade. Written by experienced author and teacher Sarah Longshaw, Aiming for an A in A-level Chemistry: - Helps you develop the 'A grade skills' of analysis, evaluation, creation and application - Takes you step by step through specific skills you need to master in A-level Chemistry, including scientific reading, quantitative and practical skills, so you can apply these skills and approach each exam question as an A/A\* candidate - Clearly shows how to move up the grades with sample responses annotated to highlight the key features of A/A\* answers - Helps you practise to achieve the levels expected of top-performing students, using in-class or homework activities and further reading tasks that stretch towards university-level study - Perfects exam technique through practical tips and examples of common pitfalls to avoid - Cultivates effective revision habits for success, with tips and strategies for producing and using revision resources - Supports all exam boards, outlining the Assessment Objectives for reaching the higher levels under the AQA, Edexcel, OCR, WJEC/Eduqas and CCEA specifications.

**OCR(B) A2 Chemistry (Salters) Student Unit Guide: Unit F335 Chemistry by Design** Philip Allan

Letts AS Chemistry Success gives complete study support throughout the year. This Study Guide matches the curriculum content and provides in-depth course coverage plus invaluable

advice on how to get the best results in the AS exam. \*Provides frequent progress checks and exam practice questions to consolidate learning \*Contains invaluable advice and practice questions for the exam \*Includes examiner's tips and reveals how to achieve higher marks

NEW COLORED EDITION! These concise revision notes (flashcards) contain all the necessary exam knowledge in a short, easy to memorize form. Each page covers the key facts, such as definitions, of a single topic, without the distraction of unnecessary information. Created with great care, they include important information specific to exam questions.

Condensed Revision Notes - Designed to Facilitate Memorisation  
Coordination Group Publication

This is an OCR endorsed resource Stretch and challenge your students' knowledge and understanding of Chemistry, build their mathematical and practical skills, and provide plenty of assessment guidance with this OCR Year 2 Student Book. - Build understanding with a summary of prior knowledge and diagnostic questions at the start of each chapter to help bring students up to speed - Support practical assessment with Practical Skill summaries that help develop your students' knowledge and skills - Test understanding and provide plenty of practice to assess progression, with Test Yourself Questions and multiple choice questions - Provide mathematical support with examples of method integrated throughout and a dedicated 'Maths in Chemistry' chapter - Develop understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries

**Chemical Storylines.** Philip Allan

Please note this title is suitable for any student studying: Exam Board: AQA Level: A Level Subject: Biology First teaching: September 2015 First exams: June 2017 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward

explanations to develop true subject knowledge and allow students to link ideas together while developing essential exam skills.

*A-level Chemistry Condensed Revision Notes Ocr B Year 1 & As (2015)* Cambridge University Press

Tired of writing your own revision notes? Unsure what to put in and what to leave out? Use professional ones! These condensed revision notes (flashcards) are designed to facilitate memorization. They have been created by a very experienced, professional Chemistry tutor. Dr C. Boes has successfully taught over fifty A-level students in the last ten years. Many of these have achieved excellent grades in their exams and went on to study medicine. These notes contain all the necessary exam knowledge in a short, easy to memorize form. Each page covers the key facts, such as definitions or equations, of a single topic, without the distraction of unnecessary information. Knowing them by heart makes it easy to get top grades. Tried, tested and proven by past tuition students, they are an effective and successful tool to prepare for exams. They have been adapted to the new OCR B (Salters) Chemistry A-level Year 1 & AS syllabus (from Sept 15). This book is organized in chapters according to the syllabus and allows natural progression in sync with your school work. Created with great care, it includes important information specific to exam questions. The low price offers great value and gives many students the opportunity to experience its benefits. This small book will save you hours of painstaking note writing. It is less messy than loose paper sheets and easy to carry around. Memorize on the bus or while you wait. Try it now!
