During the last decade, many changes have taken place in the Singapore financial marketplace. The Monetary Authority of Singapore has implemented numerous reforms to liberalize financial services sector. Since 2002, two new laws have come into effect. The Securities and Futures Act and the Financial Advisors Act have important impact on the financial community. Institutions must hold the Capital Market Services (CMS) licence and the Financial Advisors licence and their representatives must pass the CMFAS examinations. This book discusses the changes in detail. Part A provides details of the reforms and discusses the impact of the new laws and regulations. Part B highlights the wide range of financial services and products provided by the institutions. In this edition, two new chapters have been added. They focus on issues related to wealth management which has

become the recent focus of many banks that provide services to high net worth individuals or HNWIs. This book should be of interest to all financial institutions and professionals. It is also a must-read for investors who have to choose from a wide range of financial products. It will be especially useful to students and professionals in banking and finance.

The recent financial crisis has troubled the US, Europe, and beyond, and is indicative of the integrated world in which we live. Today, transactions take place with the use of foreign currencies, and their values affect the nations' economies and their citizens' welfare. Exchange Rates and International Financial Economics provides readers with the historic, theoretical, and practical knowledge of these relative prices among currencies. While much of the previous work on the topic has been simply descriptive or theoretical, Kallianiotis gives a unique and intimate understanding of international exchange rates and their place in an increasingly globalized world.

*Foundations of Airport Economics and Finance* analyzes the impact key economic indicators play on an airport's financial performance. As rapidly changing dynamics, including liberalization, commercialization and globalization are changing the nature of airports worldwide, this book presents the significant challenges facing current and future airports. Airports are evolving from quasi-monopolies to commercial companies operating in a global environment, with ever-increasing passenger and cargo volumes and escalating security costs that put a greater strain on airport systems. This book highlights the critical changes that airports are experiencing, providing a basic understanding of both the economic and financial aspects of the air transport industry. Identifies the economic roots of airport financial performance and how the interplay of its major parameters affects profitability Bridges the gap between the latest airport academic research and real-world airport financial management Covers cases and scenarios of numerous airports from around the world Includes learning aids, such as chapter introductions and summaries, glossary and appendices

Sixth Edition Named a 2013 Doody's Essential Purchase! A detailed road map of essential knowledge for obtaining licensure and employment as a nursing home administrator, the Seventh Edition of this classic text is updated to reflect the 2014 National Association of Boards of Examiners of Nursing Home Administrators (NAB) Domains of Practice. With more than 50 new topics, it comprehensively addresses all new regulations for managing a nursing facility along with a detailed overview of the skills and knowledge required to be a successful administrator. The Seventh Edition responds to the many changes that have recently occurred in the long-term care field. It provides a completely new Minimum Data Set 3.0 (MDS), 2015 Federal Requirements for Electronic Records, the new International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), new Quality Measures, updated Instructions for Making Data as per the Centers for Medicare and Medicaid, the impacts of the Affordable Care Act (ACA), and several new federal regulations. The Seventh Edition clearly describes what nursing home managers do, how they think, and how they lead. It breaks down the art of management into its basic tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—and examines them in depth. The text pinpoints all of the separate components of nursing home administration—management, human resources, team dynamics, conflict resolution, finance and business, industry laws and

regulations, and patient care—and describes how they fit together to form the coordinated activity set required of a successful nursing home administrator. Abundant real-life case studies, chapter objectives, and critical thinking questions greatly enhance learning. Mastering this text will prepare students to take—and pass with a depth of understanding—the nationally required NAB examination. New to the Seventh Edition: 2014 updated NAB Domains of Practice: Management, Human Resources, Finance, Environment, and Resident Care Introduces over 50 new topics including team dynamics, conflict resolution, and basic principles of nursing and social work Vast changes wrought by new technology and patient data New information on safety and disaster preparedness Updates signs and symptoms of abuse, neglect, and exploitation Provides new technology vocabulary Reorganized for quick access to information A completely new Minimum Data Set 3.0 (MDS) 2015 Federal Requirements for Electronic Records International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) New quality measures Impacts of the ACA on long-term care Updated tables and figures New federal regulations for quality of care approaches for residents with dementia; additional medication issues; infection control; residents' rights to establish advance directives; and defining unnecessary drugs Key Features: Provides in-depth coverage of all aspects of nursing home administration Includes current data on the field of long-term care Replete with real-life case studies, learning objectives, and critical thinking questions Formatted according to licensing examination and guidelines of the National Association of Boards of Examiners of Nursing Home Administrators Prepares students for the nationally required NAB exam Accompanying Instructor's Manual

The primary contribution of this book is to integrate the important disciplines which simultaneously impact the investment appraisal process. The book presents a study that develops a new approach to investment appraisal which uses a multiple objective linear programming (MOLP) model to integrate the selected disciplines which include capital markets, corporate governance and capital budgeting. The research covers two case studies, one in the e-commerce sector and another in the airline industry in which the above disciplines are integrated. Readers from the areas of corporate governance, regulation, and accounting would find the survey of different approaches and the new integrated optimization approach particularly useful.

There are few industries that have had a more profound impact on business and society over the last century than aviation. This book is an accessible, up-to-date introduction to the current state of the aviation industry which provides readers with the tools necessary to understand the volatile and often complicated nature of airline finance. Understanding finance is critical in any industry; however, the financial track record of the airline industry places even more importance on effective financial management. *Foundations of Airline Finance* provides an introduction to the basics of finance – including time value of money, the valuation of assets, and revenue management – and the particular intricacies of airline finance where there can be wild fluctuations in both revenues and costs. The third edition of this text has been extensively updated to reflect the many changes in the air transport industry that have taken place since the publication of the second edition, and features an expanded chapter on aircraft leasing and many new international case examples. This thorough introduction to aviation finance is valuable reading as a general, introductory financial text, or as reading in specialized airline finance classes.

Inhaltsangabe: Einleitung: Die Unternehmensbewertung spielt in der Theorie und für die Praxis eine bedeutende Rolle. In der wissenschaftlichen Literatur werden viele Untersuchungen beschrieben, in deren Fokus vor allem etablierte Unternehmen liegen. Die traditionellen Verfahren eignen sich jedoch wenig zur Bewertung von Wachstums- und Startup- Unternehmen. Die besonderen Charakteristika dieser Unternehmen stellen andere Ansprüche an die Wertermittlung. Die spezifische Bewertung dieser Unternehmen hat insbesondere auch durch das fulminante Kurswachstum und den spektakulären Kurssturz an den Wachstumsbörsen ein beträchtliches Interesse bei den Analysten geweckt. Der Grundsatz der Zukunftsbezogenheit in der funktionalen Unternehmensbewertung führt zu unsicheren Bewertungsgrundlagen und hat insbesondere für die Bewertung junger Wachstumsunternehmen aufgrund des geringen Wertbeitrages der vorhandenen Vermögenssubstanz im Vergleich zum zukünftigen Entwicklungspotenzial einen großen Einfluss auf den Unternehmenswert. In der funktionalen Unternehmensbewertung bestimmt der jeweilige Bewertungszweck den zur Anwendung kommenden Wertansatz und die Zielrichtung des Kalküls zur Ermittlung eines Unternehmenswertes. Die Anlässe der Bewertung junger Wachstumsunternehmen sind der Kauf oder Verkauf von Unternehmen bzw. Unternehmensanteilen, die Beteiligungsfinanzierung durch Venture Capital, der Börsengang (IPO), ein Management Buy-In/-Out (MBI/MBO), die Preisfestlegung bei Vergabe von Aktienoptionen oder das Insolvenzverfahren. Häufig wird auch im Rahmen einer

Kreditwürdigkeitsprüfung eine Unternehmensbewertung durchgeführt, da junge Wachstumsunternehmen meist nur über eine geringe Substanz zur Kreditsicherung verfügen. Die Erfüllung der Zahlungsverpflichtungen ist in erster Linie abhängig von zukünftigen Zahlungsströmen, die auf der Grundlage einer Unternehmensbewertung offen gelegt werden können. Junge Wachstumsunternehmen werden häufig durch Produkt- und Prozessinnovationen, hohe Investitionen in immaterielle Vermögensgegenstände, aufsteigenden Kapitalbedarf und Risikokapitaleinsatz in einem dynamischen Wettbewerbsumfeld mit negativen und volatilen Cash Flows determiniert. Die Schätzung der Cash Flows unterliegt beträchtlicher Unsicherheit. In dieser spezifischen Bewertungssituation ist ein dynamisches, zeitkontinuierliches und stochastisches Verfahren, welches Unsicherheit und Handlungsflexibilität berücksichtigt, einem teilweise statischen, zeitdiskreten oder [...]
