For today's highly efficient stoves, a Hearth Classics non-combustible hearth pad will block the heat from passing through to your subfloor. Fully non-combustible, with an R-value of 2.24 or

1.592 (R-value information), it provides protection well above the minimum requirements for Type 2 hearth pads (minimum requirement of R-value=1.0). Heat Protection for Stoves - Hearth Classics Hearth Products

The word hearth derives from an Indo-European root, *ker-, referring to burning, heat, and fire (seen also in the word carbon). In archaeology, a hearth is a firepit or other fireplace feature of any period. Hearths are common features of many eras going back to prehistoric campsites and may be either lined with a wide range of materials, such as stone or left unlined.
