The Ruby Charm Colors Big Book of Color Charts is ideal for: Keeping your swatches organized Choosing the perfect hue or color combo Tracking what you have & what you need This colored pencil chart book for adult coloring book and colored pencil enthusiasts is useful for those

wanting all of their coloured pencils, pastels, inks, watercolor pencils, gel pens and markers swatched in one handy book. 27 pre-labeled charts for popular colored pencil brands Pre-labeled charts for pastel pencils, ink, watercolor pencils & markers Blank charts by color family (reds, oranges, etc.) Blanks charts for extra brands & color combos Black black charts for swatching light colors Room for notes A few fun designs to color Basic color theory (inside) with color wheel (back cover) COLORED PENCIL BRAND CHARTS: Arteza Expert Black Widow Blick Studio Bruynzeel

and Tim Holtz Distressed WATERCOLOR PENCIL CHARTS: Arteza; Bruynzeel; Caran d'Ache Museum, Neocolor II & Supracolor; Derwent Graphitint; Derwent Inktense; Derwent Watercolor; Faber-Castell Albrecht Dürer MARKER CHARTS: Arteza Real Brush Pens; Copics; Faber-Castell Pitt Artist Pens; Spectrum Noir Illustrator Markers; Tombow Dual Brush Pens Charts organized by color family let you swatch all your reds on one page, blues on another, etc. which is helpful when looking for the perfect hue regardless of brand. IMPORTANT: watercolor and marker pages have black-backed pages to minimize bleed-through. The paper in this book (depending on where it was printed) is fairly tough, but obviously thinner than watercolor paper. Colors can look splotchy until completely dry. We recommend using a sheet of card stock or plastic to help protect the pages underneath from colors bleeding through as well as potential rub-through of pencil pigments while swatching. You can make PERSONAL COPIES of the charts you plan to use onto your favorite paper or card stock if the paper in this book feels too thin for your needs, or, if you just want to put those

pages of the charts you are using into a ring binder for safe keeping. You can also deconstruct this book for ease of use, so feel free to take it apart, keep the pages you are using in one binder, and store the rest in case you need them later. Many office supply stores (and FedEx service centers) will remove the spine and even spiral-bind or punch holes in the book for you for a small fee. If you choose to do it yourself, I have a step-by-step tutorial using another book (Creative Companion Book Binding DIY) on my blog at rubycharmcolors.com. Or keep it as is--the choice is yours! It is meant to be a book that grows along with you and your artistic needs! Happy color swatching!

After facing a series of complex challenges in her life, Tova Raeburn ultimately realized that colors are full of life lessons and have the power to transform moods and emotions. Today, while happily existing in a world of color, she shares eight coaching and art exercises to help others see themselves in new ways. While using color and art as an inspiration to

view life in a new way, Tova relies on her experience as a life coach and artist to lead others on a journey inward where personal growth is encouraged through positive change, different perspectives, and a willingness to see the endless possibilities. Through the creation of a personal color wheel and seven other art exercises, Tova invites others to embrace: gratitude and abundance, remember that attitude is a choice, view the pie of our lives, create values and boundaries, be present and mindful, build strengths, practice forgiveness, and move forward. *Living in Color* is an uplifting guide that utilizes art exercises and insight to lead others on a reflective journey inward to discover what is important and then create a fulfilling life.

The second edition of this book builds all the code example within a single project by incorporating new advancements in C# .NET technology and open-source math libraries. It also uses C# Interactive Window to test numerical computations without compiling or running the complete project code. The second edition includes three new chapters, including "Plotting", "Fourier Analysis" and "Math Expression Parser". As in the first edition, this book presents an in-depth exposition of the various numerical methods used in real-world scientific and engineering computations. It emphasizes the practical aspects of C# numerical methods and mathematical functions programming, and discusses various techniques in details to enable you to implement these numerical methods in your .NET application. Ideal for scientists, engineers, and students who would like to become more adept at numerical methods, the second edition of this book covers the following content: - Overview of C# programming. - The mathematical background and fundamentals of numerical methods. - plotting the computation results using a

3D chart control. - Math libraries for complex numbers and functions, real and complex vector and matrix operations, and special functions. - Numerical methods for generating random numbers and random distribution functions. - Various numerical methods for solving linear and nonlinear equations. - Numerical differentiation and integration. - Interpolations and curve fitting. -

Optimization of single-variable and multi-variable functions with a variety of techniques, including advanced simulated annealing and evolutionary algorithms. - Numerical techniques for solving ordinary differential equations. - Numerical methods for solving boundary value problems. - Eigenvalue problems. - Fourier analysis. - mathematical expression parser and evaluator. In addition, this book

provides testing examples for every math function and numerical method to show you how to use these functions and methods in your own .NET applications in a manageable and step-by-step fashion.
