Regional health care
databases are being
established around the
country with the goal of
providing timely and
useful information to
policymakers, physicians,
and patients. But their
emergence is raising
important and sometimes
controversial questions
about the collection,
quality, and appropriate
use of health care data.
Based on experience with
databases now in
operation and in
development, Health Data
in the Information Age
provides a clear set of
guidelines and principles
for exploiting the potential
benefits of aggregated
health data--without
jeopardizing
confidentiality. A panel of
experts identifies
characteristics of
emerging health database
organizations (HDOs). The
committee explores how
HDOs can maintain the
quality of their data, what
policies and practices
they should adopt, how
they can prepare for
linkages with computer-
based patient records,

and how diverse groups from researchers to health care administrators might use aggregated data. Health Data in the Information Age offers frank analysis and guidelines that will be invaluable to anyone interested in the operation of health care databases.

Four British Folkways in America Springer

Presents the text of Alice Walker's story "Everyday Use"; contains background essays that provide insight into the story; and features a selection of critical response. Includes a chronology and an interview with the author. *Everyday Use* University of Toronto Press Widely acknowledged as a contemporary classic that has introduced thousands of readers to American literature, From Puritanism to Postmodernism: A History of American Literature brilliantly charts the fascinating story of American literature from the Puritan legacy to the advent of postmodernism. From realism and romanticism to modernism and postmodernism it examines and reflects on the work of a rich panoply of writers, including Poe,

Melville, Fitzgerald, Pound, Wallace Stevens, Gwendolyn Brooks and Thomas Pynchon. Characterised throughout by a vibrant and engaging style it is a superb introduction to American literature, placing it thoughtfully in its rich social, ideological and historical context. A tour de force of both literary and historical writing, this Routledge Classics edition includes a new preface by co-author Richard Ruland, a new foreword by Linda Wagner-Martin and a fascinating interview with Richard Ruland, in which he reflects on the nature of American fiction and his collaboration with Malcolm Bradbury. It is published here for the first time.

Florence Nightingale is famous as the "lady with the lamp" in the Crimean War, 1854–56. There is a massive amount of literature on this work, but, as editor Lynn McDonald shows, it is often erroneous, and films and press reporting on it have been even less accurate. The Crimean War reports on Nightingale's correspondence from the war hospitals and on the staggering amount of

work she did post-war to ensure that the appalling death rate from disease (higher than that from bullets) did not recur. This volume contains much on Nightingale's efforts to achieve real reforms. Her well-known, and relatively "sanitized", evidence to the royal commission on the war is compared with her confidential, much franker, and very thorough Notes on the Health of the British Army, where the full horrors of disease and neglect are laid out, with the names of those responsible. *A Standard Work of Reference in Art, Literature, Science, History, Geography, Commerce, Biography, Discovery and Invention. New Maps, and Fully Illustrated with Thousands of Portraits, Plates and Engravings Containing a Great Compilation of Original Articles by the World's Foremost Writers and Specialists. With New Supplemental Matter Added Covering the Latest Information on All Subjects* Psychology Press Among the hordes of starry-eyed 'argonauts' who flocked to the California gold rush of 1849 was an Australian named Edward Hargraves. He left America empty-handed, only to find gold

in his own backyard. The result was the great Australian rush of the 1850s, which also attracted participants from around the world. A South African named P.J. Marais was one of them. Marais too returned home in defeat - only to set in motion the diamond and gold rushes that transformed southern Africa. And so it went. Most previous historians of the gold rushes have tended to view them as acts of spontaneous nationalism. Each country likes to see its own gold rush as the one that either shaped those that followed or epitomized all the rest. In *The Gold Crusades: A Social History of Gold Rushes, 1849-1929*, Douglas Fetherling takes a different approach. Fetherling argues that the gold rushes in the United States, Canada, Australia, New Zealand, and South Africa shared the same causes and results, the same characters and characteristics. He posits that they were in fact a single discontinuous event, an expression of the British imperial experience and nineteenth-century liberalism. He does so with dash and style and with a sharp eye for the

telling anecdote, the out-of-the-way document, and the bold connection between seemingly unrelated disciplines. Originally published by Macmillan of Canada, 1988.

Drawing on expressive and material culture, Young shows that money was not enough to make the genteel middle class. It required exquisite self-control and the right cultural capital to perform ritual etiquette and present oneself confidently, yet modestly. She argues that genteel culture was not merely derivative, but a re-working of aristocratic standards in the context of the middle class necessity to work. Visible throughout the English-speaking world in the 1780s -1830s and onward, genteel culture reveals continuities often obscured by studies based entirely on national frameworks.

Kevin 'Dasher' Wheatley VC is one of the most extraordinary characters in Australian history. Dasher was a husband, father, champion footballer and one of the finest soldiers this country has ever produced. The story of his sacrifice is used by the ADF as a perfect example of valour and mateship to this day. Although he is one of the most famous Victoria Cross recipients of all time, his story has never been fully told. Until now. *Dasher: The Kevin Wheatley VC Story* was

written with first-hand accounts from Dasher's family and the men who served and fought alongside him. It tells not only the story of an unlikely lad from the mean streets of Sydney, but that of a soldier whose death devastated the ranks of three armies and changed the way Australia dealt with the overseas loss of service people forever. Everyone who met the man has a Dasher Wheatley story of larrikin behaviour, outstanding soldiering, stunning valour, or all three. Forwarded by Keith Payne VC and featuring the 2021 investiture of Dasher's American Silver Star, an award 56 years in the making, this book also investigates other gallantry awards Wheatley qualified for but was never given.

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United

States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
