Translation is at the heart of psychoanalysis: from unconscious to conscious, experience to verbal expression, internal to enacted, dream thought to dream image, language to interpretation, unrepresented to represented and transference of past to present. The book's first part discusses the question of translation, literal and metaphoric. Both linguistic and cultural translations are closely tied to specific and significant personalities who were involved in the early history of psychoanalysis and thus in the development of the IJP. There was a close relationship between the IJP and the visual arts via the Bloomsbury Group. The link between the visual arts and the IJP is indeed to be found in its logo, which is taken from a painting by Ingres. The second part of the book approaches transformations between psychoanalysis and the arts from conscious, unconscious and non-represented elements into non-verbal modes, specifically visual, poetic and musical; it also looks at the developments and transformations in psychoanalytic ideas about artistic expression as expressed within the pages of the IJP. This book will be of great interest to psychoanalysts and psychotherapists, and to those interested in the history of psychoanalysis and the IJP.

A two-volume set. Print edition available in cloth only. Awarded the Nicholas Hoare/Renaud-Bray Canadian Philosophical Association Book Prize, 2001 From the Preface: Hegel's Ladder aspires to be . . . a 'literal commentary' on Die Phänomenologie des Geistes. . . . It was the conscious goal of my thirty-year struggle with Hegel to write an explanatory commentary on this book; and with its completion I regard my own 'working' career as concluded. . . . The prevailing habit of commentators . . . is founded on the general consensus of opinion that whatever else it may be, Hegel's Phenomenology is not the logical 'Science' that he believed it was. This is the received view that I want to overthrow. But if I am right, then an acceptably continuous chain

of argument, paragraph by paragraph, ought to be discoverable in the text.

Architects and engineers both claim to be designers, though how they define design and the approaches they use to realize it, vary widely. However their interaction has also created some of the world's most memorable, enduring and impressive buildings. The unprecedented impact of digital technologies illuminates the complexity and non-linearity of the process that these designers go through while massively expanding both the ability to visualize and represent forms, and to analyze their structural behavior. It has obviously changed both architecture and engineering, and so also the potential for interaction between them. Interdisciplinary Design began as a course at Harvard GSD attended by graduate students in architecture and also by MIT graduate students in structural engineering and computation. In this course students and instructors examined a series of built projects in order to develop new viewpoints and communication across disciplinary boundaries in teaching, practice and construction.

Through the lens of psychoanalytic thought about sexuality, the book examines changes in the area of procreation and generation, the disjunction between sexuality and procreation introduced by biotechnology and some new methods of reproduction, and their impact on the essential moments of existence (birth, illness, death) and the most intimate aspects of personal identity (sexuality, procreation, body). At the centre of this book is the thesis that the disjunction between sexuality and procreation brought about by biotechnology represents a new scenario and introduces elements of discontinuity. What kind of effects on individuals will the modifications introduced by biotechnologies in the field of procreation have? How can these changes affect even the most profound aspects of personal identity, including body and sexuality? How might they interfere with the sphere of desire? The book investigates the new scenarios and the consequences which are emerging, such as an

alteration of personal boundaries, both in spatial and temporal terms, which is reflected in our way of thinking about ourselves and our relationships and the assertion of an unconscious fantasy that the limits imposed by sexuality and death can be surpassed. Offering a psychoanalytic reading of changes introduced in this field, this book will appeal to training and practising psychoanalysts, as well as philosophers, psychologists and gynaecologists.

This book brings together a selection of classic psychoanalytical papers related to ageing, dying and death that have appeared in the renowned International Journal of Psychoanalysis (IJP). Two papers address the analysis of an elderly patient directly and bring the work and the challenges it brings vividly to life. Also explored are such issues as death and the midlife crisis, loneliness and the ageing process, ageing and psychopathology, fear of death, transference and countertransference issues, and the final stage of the dying process. 'The idea behind this monograph is to alert interested psychoanalysts, students and those working from an interdisciplinary standpoint to the possibility of a better understanding of the ageing process as well as a group of potential analysis that seem to exist in the shadow of our professional communications. 'Each stage of life has its own somatic and psychic normality as well as pathology.

How did Freudian Theory come together as a body of ideas, and how did these ideas attract followers who spread this model of mind throughout the West? Makari contextualises Freud's early psychological work amid the great changes occurring in late-

nineteenth-century European science, philosophy, and medicine, showing how Freud was a creative, inter-disciplinary synthesizer whose immersion in pre-existing domains of study led to the creation of Freudian Theory. He looks at how Freud's followers built a heterogeneous movement in the years leading to 1914, at the growth of the movement, and its subsequent collapse with the departures of Bleuler, Jung and Adler. Finally, Makari examines the critical, but neglected, Weimar period, when there was an attempt to rebuild a more pluralistic psychoanalytic community. This reformation resulted in the broader theoretical reach of psychoanalysis and its greater acceptance across the Western world outside Europe, where the rise of fascism was to lead to the destruction of psychoanalysis and the culture that once sustained it.

Steffen Dobbert gibt Antworten auf einige der drängendsten Fragen unserer Zeit: Weshalb kämpft sie so furchtlos für Selbstbestimmung und Freiheit? Woher kommt das Nationalbewusstsein des ukrainischen Volkes? Und warum steht im größten in Europa liegenden Land auch die europäische Nachkriegsordnung auf dem Spiel? Dieses Buch ist eine Reise durch die wechselvolle Geschichte der Ukraine, des wohl derzeit

mutigsten Landes unseres Kontinents. Zerstörung des Kosakenstaates, Holodomor, blutige Revolutionen und Putins Invasion – die Ukraine musste eine Menge verkraften, vielleicht mehr als jede andere Nation Europas. Viel zu lange haben wir die Ukraine nicht verstanden, wussten nichts mit der Kyjiwer Rus, mit Iwan Masepa, dem Holodomor oder dem Budapester Memorandum anzufangen. Steffen Dobbert beschreibt einen brutalen Weg zur Freiheit und die Entwicklung eines ukrainischen Nationalbewusstseins – von den Ursprüngen des ersten Kosakenstaats, über die Ausrufung der Ukrainischen Volksrepublik, bis zum aktuellen Verteidigungskrieg. Eine prägnante Überblicksdarstellung in zugänglicher Sprache, die das erforderliche Wissen vermittelt, um die Vorgänge in der Ukraine einordnen und verstehen zu können.

The Maternalists is a study of the hitherto unexplored significance of utopian visions of the state as a maternal entity in mid-twentieth century Britain. Demonstrating the affinities between welfarism, maternalism, and psychoanalysis, Shaul Bar-Haim suggests a new reading of the British welfare state as a political project. After the First World War, British doctors, social thinkers, educators, and policy makers became increasingly interested in the contemporary turn being made in psychoanalytic theory toward the role of motherhood in child development. These public figures used new notions of the "maternal" to criticize modern European culture, and especially its patriarchal domestic structure. This strand of thought was pioneered by figures who were well placed to disseminate their ideas into the higher echelons of British culture, education, and medical care. Figures such as the anthropologists Bronislaw Malinowski and Geza Róheim, and the psychiatrist Ian Suttie—to mention only a few of the "maternalists" discussed in the book—used psychoanalytic vocabulary to promote both imagined perceptions of motherhood and their idea of the "real" essence of the "maternal." In the 1930s, as European fascism took hold, the "maternal" became a cultural discourse of both collective social anxieties and fantasies, as well as a central concept in many strands of radical, and even utopian, political thinking. During the Second World War, and even more so in the postwar era, psychoanalysts such as D. W. Winnicott and Michael Balint responded to the horrors of the war by drawing on interwar maternalistic thought, making a demand to "maternalize" British society, and providing postwar Britain with a new political idiom for defining the welfare state as a

project of collective care.
