*Kōura* | NIWA Freshwater Crayfish Aquaculture In North America, Europe, and Australia is the first text to summarize the methods of culture for the eight most important crayfish species in the world. Methods developed

to culture crayfishes around the world differ significantly, and this book enables readers to develop workable strategies for cultivating different crayfish species in specific environments. Freshwater Crayfish Aquaculture in North America, Europe ... Our freshwater crayfish range from the largest to some of the smallest in existence. The giant Tasmanian crayfish (*Astacopsis gouldii*) grown to 6.3 kg and the Murray

River crayfish (*Euastacus armatus*) grows to 2.7 kg. These species and spiny crayfishes in general, are considered to have little aquaculture potential because of their slow growth and low meat yield. Freshwater crayfish - aquaculture prospects Paranephrops is a genus of freshwater crayfish found only in New Zealand. They are known by the English common names freshwater crayfish and koura, the latter from their Māori name of kōura.

The two species are the northern koura, *Paranephrops planifrons*, found mainly in the North Island, but also in Marlborough, Nelson, and the West Coast of the South Island, and the southern koura ...*Paranephrops* - Wikipedia  
 The crayfish will be processed in a plant in Nanaimo, about 80 km to the north. Initial markets are high-end restaurants in the Victoria and Vancouver areas but their sights are on Europe. "Aquaculture is something new to the Malahat nation," says Parker.  
 Crayfish farming taking root in BC - Aquaculture North America  
 Virtually all crawfish culture also relies on natural reproduction rather than stocking hatchery-reared juveniles. The predominant cultured species in North America, the red swamp (*Procambarus clarkii*) and white river crawfish (*P. zonangulus*), are classified as "temperate" species; that is, they will tolerate cold winter conditions. Both species, however, possess a number of traits that are usually associated with animals that live in warm waters.  
 Crawfish - Freshwater

Aquaculture  
 Tasmanian giant freshwater crayfish. The Tasmanian giant freshwater crayfish (*Astacopsis gouldi*), also called Tasmanian giant freshwater lobster, is the largest freshwater invertebrate in the world. The species is only found in the rivers below 400 metres (1,300 ft) above sea level in northern Tasmania, an island-state of Australia.  
 Tasmanian giant freshwater crayfish - Wikipedia  
 The red claw crayfish (*Cherax quadricarinatus*), referred to throughout the rest of this fact sheet simply by its Australian synonym 'redclaw', is a tropical species native to the rivers of north-west Queensland and the Northern Territory in Australia. Although well known to the local inhabitants of this isolated region, it remained effectively unknown to the rest of the world until the late 1980s, when it was trialled for aquaculture.  
 How to farm red claw crayfish | The Fish Site  
 Freshwater crayfish aquaculture is in an early development stage with no farm currently producing large volumes of saleable stock (<500kg combined total annual production in New Zealand). In 2015 there

were 17 licensed freshwater crayfish farms but only four (all in the South Island) were in production. All are selling on the domestic market.  
 Freshwater Crayfish Farming- The term freshwater crayfish refers to the yabby (*Cherax destructor*), marron (*Cherax tenuimanus*) and redclaw (*Cherax quadricarinatus*) - Yabby production is predominantly undertaken in farm dams. - Marron and redclaw production is almost entirely based on semi-intensive aquaculture utilising purpose built ponds.  
 Freshwater crayfish (Redclaw) | AgriFutures Australia  
 In our pond-based aquaculture farm we grow the tropical North Queensland crayfish called red claw (*Cherax quadricarinatus*) which is a native freshwater crayfish from the region. We produce redclaw for the local market, but we have specialised in all things pre grow-out; so that's broodstock, egg production, crayling production and soon a nursery.
