*English for Business Communication* Pearson Education India  
Business Communication: Concepts, Skills, Cases, and Applications builds on the strengths of the previous edition and has been updated to reflect the latest research and technological developments in business communication. Divided into three parts, this revised edition focuses on the development of communication skills in business, and the structured applications of business communication. Topics such as reading and writing skills have been augmented, and

contemporary channels of business communication, such as social media, have been examined in detail.

Agricultural Communications in Action: A Hands-On Approach Irwin/McGraw-Hill

This book examines the major business communication theories, delving into their relationships and practical applications. Many business communication studies lack a strong theoretical grounding—a deficit that creates difficulties for researching business communication phenomena and building upon previous studies. The book addresses this issue by cataloging and briefly describing the major business communication theories, as well as giving a typology of these theories to better integrate them. This book provides value to business communication researchers (who can use it to build upon and develop their work), experts in practice (who can apply it to improve business communications), and academics (who can use it to enhance their instructional designs). It also offers insights into

new developments on the business communication theory horizon.

A Competency Based Approach Cengage Learning

About the Book:

Communication skills have emerged as a major required skill-set for young graduates and citizens in India today. This book on Business Communication is geared to give the reader a comprehensive view about all aspects of communication-oral, written, body language, and technology-based. Business Communication forms a part of the syllabus of not only business related courses, but also of other degrees and postgraduate programmes. This book offers an in-depth study and practice exercises that will help all to improve their communication skills to a great extent. It is appropriately partitioned into various sections, each of which is independent of each other. The highlight of this textbook is that it also contains a section on communication equipment, i.e. fax, telephones, video conferencing, franking machines, etc. The section on grammar is

interestingly divided into exclusive chapters on essential parts of good English knowledge. The part on Internet technology and basic knowledge on Microsoft office is rarely found in other texts of business communication. In all, this book will be a valuable aid for students interested in academic pursuits as well as anyone else who wants to upgrade his/her knowledge. Contents: Part 1-Concepts of Communication Part 2-Business Communication Technology Part 3-Oral Communication Part 4-Written Communication Part 5-Using Software Applications & the Internet Part 6-Grammar Part 7-Dictionary Usage. *Business Communication, 3/e* New Age International Digital technologies and social media have changed the processes, products, and interactions of professional communication, reshaping how, when, with whom, and where business professionals communicate. This book examines these changes by asking: How does rhetorical theory need to adapt and develop to address the changing practices of professional communication? Drawing from classical and

contemporary rhetorical theory and from in-depth interviews with business professionals, the authors present a case-based approach for exploring the changing landscape of professional communication. The book develops a rhetorical theory based on networked interaction and rhetorical ethics: seeing professional communication as involving new kinds of networked interactions that require an integrated view of rhetoric and ethics. The book applies this frame to a variety of communication cases involving, for example, employee missteps on social media, corporate-consumer interactions, and the developing use of artificial intelligence agents (AI bots) to handle online communication.
