These proceedings review progress in the development of
lubricants and in the understanding of the phenomena of
lubrication. The contents include papers on the impact of
automotive technology and environmental factors upon lubricant

requirements, elasto-hydrodynamic lubrication, boundary
lubrication, machine elements, bio-tribology, metal forming,
rheology, lubricated wear and very thin film (nano metre)
lubrication. Presented by leading scientists from 22 different
countries, these proceedings provide an up-to-date review of
developments in this field.

Second- and third-generation Corvettes may well be the stuff of
some collectors' dreams, but if you're an owner or enthusiast
who'd like to drive your dream car, this guide to repairing and
rebuilding will put you and your 'Vette on the road. With step-by-
step notes and photographs, George McNicholl documents the
complete rebuilding of four Corvettes—1965 and 1967
convertibles, and 1969 and 1972 coupes—putting the process
within reach of any do-it-yourself mechanic. McNicholl's focus is

on rebuilding the second- and third-generation Corvette rolling chassis for daily use, with clear and concise information on engines, transmissions, differentials, frames, front suspensions, brakes, wheels, and fuel, exhaust, and cooling systems for models from 1963 to 1982.
