DEANDRE AYDIN

Book 2 Persephone Trilogy CRC Press
This book explores the nexus between gender, ageing and culture in dancers practicing a variety of genres. It challenges existing cultural norms which equate ageing with bodily decline and draws on an interdisciplinary theoretical framework to explore alternatives for developing a culturally valued mature subjectivity through the practice of dance.

My Personal Relationship with the Creator Zeta Books

We fly in a moving medium of air. We live in a moving medium of feelings. In *Flying Lessons*, clinical psychologist Dr. John Snyder weaves together these two realms, drawing on his experiences as a licensed pilot to illuminate the existential truths that have helped him transform the lives of troubled men and women for more than 35 years. Part adventure story, part philosophical meditation in the tradition of Saint-Exupery, *Flying Lessons* offers a fresh perspective on timeless problems of anxiety, depression, and relational conflict. Each of the book's eight chapters begins with a dramatic incident from Dr. Snyder's 2000-hour flight log: the sheer terror of a total power loss, the disconcerting moment when the sky above becomes indistinguishable from the sea below, the sensation of spiraling toward the earth in a stall, the shock of emerging from a cloud bank to find a mountain peak rising dead ahead. Dr. Snyder uses each of these flying stories to generate a metaphorical lesson about the nature of human relationships, illustrating general principles for sustaining joy and intimacy with case histories from his clinical practice. Written in a straightforward, unpretentious, personal style, *Flying*

Lessons is designed for everyone who desires a more exciting and intimate life and for everyone in the helping professions who would like to be more effective in their practice.

Land, Weather, Seasons, Insects

Springer Science & Business Media
In Amanda Skenandore's provocative and profoundly moving debut, set in the tragic intersection between white and Native American culture, a young girl learns about friendship, betrayal, and the sacrifices made in the name of belonging. On a quiet Philadelphia morning in 1906, a newspaper headline catapults Alma Mitchell back to her past. A federal agent is dead, and the murder suspect is Alma's childhood friend, Harry Muskrat. Harry—or Asku, as Alma knew him—was the most promising student at the "savage-taming" boarding school run by her father, where Alma was the only white pupil. Created in the wake of the Indian Wars, the Stover School was intended to assimilate the children of neighboring reservations. Instead, it robbed them of everything they'd known—language, customs, even their names—and left a heartbreaking legacy in its wake. The bright, courageous boy Alma knew could never have murdered anyone. But she barely recognizes the man Asku has become, cold and embittered at being an outcast in the white world and a ghost in his own. Her lawyer husband, Stewart, reluctantly agrees to help defend Asku for Alma's sake. To do so, Alma must revisit the painful secrets she has kept hidden from everyone—especially Stewart. Told in compelling narratives that alternate between Alma's childhood and her present life, *Between Earth and Sky* is a haunting and complex story of love and loss, as a quest for justice becomes a journey toward understanding and,

ultimately, atonement.

Between Earth and Sky Oxford University Press

The Dairy Farmer's Guide to the Universe Volume IV explores the environment, with the Midwest as an example, using traditional Jungian and Hillmanian approaches to deepen our connection with the land, the seasons, and insects. The Dalai Lama said how we relate to insects is very important for what it reveals much about a culture's relationship with the psyche and nature. . . " I had several Big Dreams in my last year of training at the Jung Institute in Zurich, including a single image dream of a typical Wisconsin pasture or meadow scene. This was the most beautiful landscape I have ever seen because it shown with an inner light, what Jung called a numinous or sacred dream. Since returning to Wisconsin I have let the mystery and power of that dream inspire me to learn and experience as much as possible about the land and the seasons of the upper Midwest, a process of turning a landscape into a soulscape. The means of doing this are presented in Land, Weather, Seasons, Insects: An Archetypal View, volume IV of The Dairy Farmer's Guide to the Universe-Jung, Hermes, and Ecopsychology. This involves the use of science, myths, symbols, dreams, Native American spirituality, imaginal psychology and the I Ching. It is an approach that can be used to develop a deep connection with any landscape, meeting one of the goals of ecopsychology. Carl Sagan believed that unless we can re-establish a sense of the sacred about the earth, the forces leading to its destruction will be too powerful to avert." —Dennis L. Merritt
Front Cover: A Monarch butterfly on 'Buddleia' in Olbrich Gardens, Madison,

Wisconsin. This "King of the Butterflies" is probably the best known of the North American butterflies and is the chosen image for the Entomological Society of America. The caterpillar feeds on the lowly milkweed, genus 'Asclepias, ' named after the Greek god of healing. The plant and the insect are toxic to most organisms. The insect is known for its uniquely long and complicated migrations. Photo by Chuck Heikkinen.
Defending the Future of Winter
Cambridge University Press
All men born into this world are visitors from the angelic world. The human soul is a theological topic of discussion throughout the world. Many religionists including Christian study the subject of the soul. However, they do not reach a unified opinion, but only discuss it or teach it in their own ways. Wherever you go you can not hear any thesis or sermon which is definite, convincing and consistent. It is because the biblicists today do not realize the fundamental principle of the soul. If you realize completely how all the heavenly hosts and angels, the sons of God and the souls of men were created by God, then you will fully understand the soul---its past, present and future. This book will give you understanding of how the human soul and angels were created and will also give you insight into the angelic world, this human world and the next world. It will clearly show you where the human soul came from and where it will return to. If anyone preaches without knowledge of where the human soul comes from and where it returns to , he has no confidence in his sermon. Without knowing where you are from, how can you say that you know where you will return to? However, of you study this book, you will realize that you were close friends with the son of God and the

angels of heaven before you came into this world; and you will believe that the angels and the sons of God, who have not sinned, are waiting for you to repent of your sins and return to heaven. Now, you can neither see nor understand all these things clearly, because you have put on a veil of sin. But if you gain thorough knowledge of the soul, you will look forward to meeting them all again with joy and hope. This book reveals undeniable truths about the soul based on the Bible. Please study this book seriously

Storm, Love and Tears of the Sky

University of Chicago Press

This volume brings together scholars based predominantly in Asia to contribute provocative and experimental essays on the dynamic relationship between animation and philosophy. In an inventive and playful philosophical way, they address not only the mainstay of Japanese animation, but also Korean film, picture books and Mickey Mouse to understand what we might call film-philosophy in Asia. In thinking animation with concepts from the technicolour philosophies of Deleuze, Guattari, Stiegler, Benjamin, Kristeva and Heidegger, the book sees animation not as a representation of a philosophical idea per se, but conceptualizes it as a philosophical thinking-device. In the images themselves, what is at work is not just the thinking of a particular director or manga artist, but, rather, thinking as such, through and by the images themselves. The scholars in this collection are committed to thinking images themselves as thought-experiments and thinking machines.

The Oxford Handbook of Dance and Theater BalboaPress

"Compelling...Bounous is passionate about mountains, and it shows."

—BACKCOUNTRY MAGAZINE "In this affecting environmental meditation, debut author and activist Bounous muses on the threat climate change poses to the winter season, placing an issue with planet-wide ramifications into a personal context...readers interested in an intimate take on climate change will find a thoughtful book that effectively makes the global personal."

—PUBLISHERS WEEKLY "A love letter and an elegy to a time when innocence could exist before the era of climate change...written with a muscularity of experience by a woman whose character was formed on the ski slopes in the Wasatch Mountains of Utah. Ayja Bounous is an emerging writer of conscience. She has a beautiful voice on the page and in place, this place 'shaped by snow.'" —TERRY TEMPEST WILLIAMS, author of *The Hour of Land* "Those who love winter will love this book. But as we steadily erase the season that sets us free from friction, *Shaped by Snow* will appeal to anyone who has ever looked up and thrilled at the first flakes fat in the autumn sky."

—BILL MCKIBBEN, author of *The End of Nature* "The best people grow in open air, Walt Whitman told us, eat and sleep with the earth. Ayja Bounous is that person: raised on snow, seasoned on rivers, bound by conscience, called to action. This Utah oracle reminds us what's at stake, what we are fighting for." —MARK SUNDEEN, author of *The Unsettlers* "In this poignant and engaging love letter to snow, Ayja Bounous beautifully interlaces science, family history, and her anxiety around climate change. This book bears witness to the changing nature of Utah and the Wasatch Front, and is a call to all of us to pay more attention, to choose our actions with thought, and to live with love." —SYLVIA

TORTI, author of *Cages* "There is no snow on earth like what funnels into Little Cottonwood Canyon and sustains the passionate powder hunters of Alta, Snowbird, and their adjacent peaks and bowls. Shaped by Snow is an intimate window into a heavenly place, by a writer whose family has rocked this cradle of skiing culture for three generations." —NATHANIEL VINTON, author of *The Fall Line* "Bounous vulnerably shares her pragmatic yet emotional views on bringing children into the world we are crumbling, taking the reader through an introspective journey, connecting our passions to our past and our wishes to a very real future." —BRODY LEVEN, professional skier "Musings on powder, skiing, and the future of the Greatest Snow on Earth from a member of one of the Wasatch Range's royal families that is sure to appeal to Utah skiers." —JIM STEENBURGH, author of *Secrets of the Greatest Snow on Earth* "A provocative read celebrating each and every snowflake yet leaving us with the question of environmental justice over the economics of the skiing industry and the future of life itself." —BOBBI LYNN SMITH, *Between the Covers Bookstore* "In 2019 young people take climate personally, and Ayja Bounous's Utah snow is personal terrain with a public dimension. Bounous mixes memory and desire to carve a bold line through the anthropocene slopes that surround her." —JEFFREY MCCARTHY, Director of the Environmental Humanities Graduate Program, University of Utah Skier and debut author Ayja Bounous explores threats to the winters and watershed in the face of climate change and the far-reaching impacts of a diminishing snowpack on the American West—not only from ecological and economic

perspectives, but also in regard to emotional and psychological health, as she realizes how deeply her personal relationships are tied to the snow-covered mountains of Utah's Wasatch range.

Urban and Rural Vision in Early Modern Europe Berghahn Books

The Square and the Circle of the Indian Arts is a major contribution in Indian art history. More than a book on the theories of arts, it has far-reaching implications for the way one thinks about the future of indology and art history. It provides a model to be emulated for inter-disciplinary research, not only between the arts but also the sciences and the arts. The book begins by re-examining the imagery of the Vedas and the Upanisads, highlighting some aspects of early speculative thought which influenced the enunciation of aesthetic theories, particularly of Bharata in the *Natyasastra*. The next chapter introduces a new methodology of analyzing the rituals (*yajna*) as laid down in the *Yajurveda* and the *Satapatha Brahmana*, the best way to focus the relationship between the text and the practice. Four chapters follow - one each on drama (*natya*), architecture (*vastu*), sculpture (*silpa*), and music (*sangita*). Each presents some fundamental concepts of speculative thought, concerned with each of the arts and purposefully correlates these with actual examples both of the past and the present. The afterward to this second edition remains an event not only because the book benefits from the works published since the first edition, but also because it presents the author's integral vision and her unique adventure into the boundaries of several disciplines. It demonstrates the efficacy

of her earlier approach of investigating the imagery and the metaphors as basic to the discourse of the Indian tradition. She proposes a multi-layered cluster of concepts and metaphors which enable one to uncode the complex multi-dimensional character of the Indian Arts. Also significantly she suggests a deeper comprehension of the relevance of the developments in the field of traditional mathematics and biology for the study of the language of form of the Indian Arts. *Truth, Language, and History* Routledge

Theorizing a New Agenda for Architecture: An Anthology of Architectural Theory collects in a single volume the most significant essays on architectural theory of the last thirty years. A dynamic period of reexamination of the discipline, the postmodern era produced widely divergent and radical viewpoints on issues of making, meaning, history, and the city. Among the paradigms presented are architectural postmodernism, phenomenology, semiotics, poststructuralism, deconstruction, and feminism. By gathering these influential articles from a vast array of books and journals into a comprehensive anthology, Kate Nesbitt has created a resource of great value. Indispensable to professors and students of architecture and architectural theory, *Theorizing a New Agenda* also serves practitioners and the general public, as Nesbitt provides an overview, a thematic structure, and a critical introduction to each essay. The list of authors in *Theorizing a New Agenda* reads like a "Who's Who" of contemporary architectural thought: Tadao Ando, Giulio Carlo Argan, Alan Colquhoun, Jacques Derrida, Peter Eisenman, Marco Frascari, Kenneth Frampton, Diane Ghirardo, Vittorio Gregotti, Karsten Harries, Rem

Koolhaas, Christian Norberg-Schulz, Aldo Rossi, Colin Rowe, Thomas Schumacher, Ignasi de Sol-Morales Rubi, Bernard Tschumi, Robert Venturi and Denise Scott Brown, and Anthony Vidler. A bibliography and notes on all the contributors are also included.

Our Intimate Connections to Trees

Fisher King Press

This volume is the result of an interdisciplinary exchange between philosophers of identity, moral philosophers, philosophers of education, moral psychologists, and post-modern deconstructivists on the subject of personal and moral identity. This interdisciplinary character makes the book special, compared to other publications on the subject. The contributions to the first part of the book reflect on the implications of discussions in philosophy of identity for moral theory and the view of moral identity. In the second part the focus shifts to the philosophical and psychological perspectives on the concepts of self, personal and moral identity and their interrelation. It is argued that both perspectives are needed for giving an account of the emergence of moral identity as part of someone's development into a mature person. The contributions to the third part absorb the criticism of (de)constructivist theories on essentialist conceptions of personal and social identity. This book will be of interest for philosophers and psychologists active in research on identity, self, (moral) development, and related areas.

Understanding Religion as Everyday Life
Springer Science & Business Media

"Bevis has done a wonderful job building the worlds that the gods occupy as well as giving them a place in the modern world." Amazon Top Reviewer

and author, Margaret Lesh "I stayed up way too late, again! I had to know what happened! You might call me irresponsible, and that may be true. But when a series comes along and grabs you like Daughters of Zeus, it really can't be helped." Amazon Top Reviewer and author, Rachel Wagner "I need to calm down before I write this review because I am still reeling from the book. OMG! I thought book 1: Persephone was good, but this was WAY BETTER! Lastly, OMG!!! I need book 3 so badly . . ." Amazon Top Reviewer and author, Mary Smith The Daughters of Zeus Series, Book Two Some vows can never be broken, especially when you've recently found out you're a goddess. In the flick of an eyelash Persephone has gone from being a high school junior in Athens, Georgia to the wife of Hades, god of the Underworld. Under his platonic protection, she's waiting for springtime, when Boreas, the sinister god of winter, will stop stalking her. But even Hades can't keep Boreas and his minions from threatening her. Finally she escapes back to the world of the living. Maybe she can just go back to normal--and forget that she's fallen in love with Hades. She's wrong. Thanatos--a friend from the Underworld, has betrayed her. Persephone can't tell anyone about Thanatos' betrayal, and it drives a wedge between her and Hades. And then there's Aphrodite, the gorgeous goddess who was born among the ocean waves with more charm than she can control. Persephone's dearest ally, Melissa, is furious and jealous when Aphrodite starts winning Persephone's friendship. Persephone turns to a human boy for friendship. But will their relationship put him in danger? Persephone must choose between her human life and her responsibilities as a

goddess. If she doesn't, she could lose that life and Hades, too. But either way, she may not survive her father's schemes. After all, she's Zeus's daughter. Kaitlin Bevis spent her childhood curled up with a book and a pen. If the ending didn't agree with her, she rewrote it. Because she's always wanted to be a writer, she spent high school and college learning everything she could to achieve that goal. After graduating college with a BFA and Masters in English, Kaitlin went on to write The Daughters of Zeus series. www.kaitlinbevis.com"

Moore Ruble Yudell *Between Earth and Sky* Our Intimate Connections to Trees Symbolic Landscapes presents a definitive collection of landscape/place studies that explores symbolic, cultural levels of geographical meanings. Essays written by philosophers, geographers, architects, social scientists, art historians, and literati, bring specific modes of expertise and perspectives to this transdisciplinary and interdisciplinary study of the symbolic level human existential spatiality. Placing emphasis on the pre-cognitive genesis of symbolic meaning, as well as embodied, experiential (lived) geography, the volume offers a fresh, quasi-phenomenological approach. The editors articulate the epistemological doctrine that perception and imagination form a continuum in which both are always implicated as complements. This approach makes a case for the interrelation of the geography of perception and the geography of imagination, which means that human/cultural geography offers only an abstraction if indeed an aesthetic geography is constituted merely as a sub-field. Human/cultural geography can only approach spatial reality through

recognizing the intimate interrelative dialectic between the imaginative and perceptual meanings of our landscapes/place-worlds. This volume reinvigorates the importance of the topic of symbolism in human/cultural geography, landscape studies, philosophy of place, architecture and planning, and will stand among the classics in the field.

University of Chicago Press

Urban Futures brings together commentaries from a wide range of contemporary disciplines and fields relevant to urban culture, form and society. The book concerns cities in the broadest sense, not just as buildings and spaces, but also as processes and events or sites of occupation, in which meanings are constructed in many ways. The contributors draw on their specialist areas of research to inform current debate, but they also speculate as to how cities will be shaped in the 21st century. Specific areas of research include homeless people's organisations and restoration ecology in brownfield sites in the USA, post-industrial urban landscapes, post-industrial economics, tourism and cultural planning. The book allows each writer to state their own conclusions, but together they suggest that tomorrow's cities will, while remaining locations of difference and contestation, be rapidly evolving systems in which dwellers assume increasing responsibilities and power.

Yams, Art and Technology amongst the Nyamikum Abelam of Papua New Guinea

Author House

What gives artefacts their power and beauty? This ethnographic study of the decorated long yams made by the Nyamikum Abelam in Papua New Guinea examines how these artefacts acquire their specific properties through

processes that mobilise and recruit diverse entities, substances and domains. All come together to form the 'finished product' that is displayed, representing what could be an indigenous form of non-verbal 'sociology'. Engaging with several contemporary anthropological topics (material culture, techniques, arts, aesthetics, rituals, botany, cosmology, Melanesian ethnography), the text also discusses in depth the complex position of the study of 'technology' within anthropology.

An Archetypal View LIT Verlag Münster

Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, *Geography of the Gaze* will interest everyone from scientists to artists.

Children of Earth and Sky Oxford University Press

Religion is more than a matter of worshipping a deity or spirit. For many people, religion pervades every part of their lives and is not separated off into some purely private and personal realm. Religion is integral to many people's relationship with the wider world, an aspect of their dwelling among other beings - both human and other-than-human - and something manifested in the everyday world of eating food, having sex and fearing strangers. "Food, Sex and Strangers" offers alternative ways of thinking about what religion involves and how we might better understand it. Drawing on studies of contemporary religions, especially among indigenous peoples, the book argues that religion serves to maintain and enhance human relationships in and with the larger-than-human world. Fundamentally, religion can be better understood through the ways we negotiate our lives than in affirmations of belief - and it is best seen when people engage in intimate acts with themselves and others.

Earth, Sky, Gods and Mortals Routledge

"This book looks at the combination of art, creativity and expression through the use and combination of computer science, and how technology can be used creatively for self expression using different approaches"--Provided by publisher.

Developing an Ecological Spirituality

Amazon Children's Publishing

At the outer reaches of the imagination, you'll find Olympus. It's a colorful planet, illuminated day and night by twin suns and three moons. While the suns burn brightly in the Olympian sky, the brightest stars of this strange and wonderful place are seven young, out-of-

this-world characters. This adventurous group is led by a young boy named Hector, who is wise beyond his years. He and his friends stumble into one entertaining adventure after another, always to discover there's a valuable lesson to be learned. In this exciting, brightly illustrated installment of the adventures of Hector and his friends, the Olympians, Hector helps readers learn all about how to do good things. From being grateful to mom and dad to sharing, Hector demonstrates the great things that come from being kind and doing good deeds. With engaging illustrations and fun, easy-to-read text, *The Earth is Round the Sky is Blue* is the perfect book to read with your little ones any time of day.

Spirit Winds of Peace Routledge

This book includes ten essays that trace the notion of unconcealment as it develops from Heidegger's early writings to his later work, shaping his philosophy of truth, language and history.

'Unconcealment' is the idea that what entities are depends on the conditions that allow them to manifest themselves. This concept, central to Heidegger's work, also applies to worlds in a dual sense: first, a condition of entities manifesting themselves is the existence of a world; and second, worlds themselves are disclosed. The unconcealment or disclosure of a world is the most important historical event, and Heidegger believes there have been a number of quite distinct worlds that have emerged and disappeared in history. Heidegger's thought as a whole can profitably be seen as working out the implications of the original understanding of unconcealment.

A Reader Springer

Informing the designs of architects as diverse as Peter Zumthor, Steven Holl,

Hans Scharoun and Colin St. John Wilson, the work of Martin Heidegger has proved of great interest to architects and architectural theorists. The first introduction to Heidegger's philosophy written specifically for architects and students of architecture introduces key themes in his thinking, which has proved highly influential among architects as well as architectural historians and theorists. This guide familiarizes readers

with significant texts and helps to decode terms as well as providing quick referencing for further reading. This concise introduction is ideal for students of architecture in design studio at all levels; students of architecture pursuing undergraduate and postgraduate courses in architectural theory; academics and interested architectural practitioners. Heidegger for Architects is the second book in the new Thinkers for Architects series.
