This work is a revealing study of the enigmatic Indus civilization and how a rich repertoire of archaeological tools is being used to probe its puzzles. The Ancient Indus Valley: New Perspectives takes readers back to a civilization as complex as its contemporaries in Mesopotamia and Egypt, one that covered a far larger region, yet lasted a much briefer time (less than a millennium) and left few visible traces. Researchers have tentatively reconstructed a model of Indus life based on limited material remains and despite its virtually indecipherable written record. This volume describes what is known about the roots of Indus civilization in farming culture, as well as its far-flung trading network, sophisticated crafts and architecture, and surprisingly war-free way of life. Readers will get a glimpse of both a remarkable piece of the past and the extraordinary methods that have brought it back to life.

Water Civilization: From Yangtze to Khmer Civilizations comprises three major topics: 1) Discovery of the origin of rice agriculture and the Yangtze River civilization in southern China was mainly based on investigation of the Chengtoushan archaeological site, the earliest urban settlement in East Asia.

The origin of rice cultivation can be traced back to 10000 BC, with urban settlement starting at about 6000 BP; 2) The Yangtze River civilization collapsed around 4200 BP. Palaeoenvironmental studies including analyses of annually laminated sediments in East and Southeast Asia indicate a close relationship between climate change and the rise and fall of the rice-cultivating and fishing civilization; and 3) Migrations from southern China to Southeast Asia occurred after about 4200 BP. Archaeological investigation of the Phum Snay site in Cambodia, including analyses of DNA and human skeletal remains, reveals a close relationship to southern China, indicating the migration of people from southern China to Southeast Asia. This publication is an important contribution to understanding the environmental history of China and Cambodia in relation to the rise and fall of the rice-cultivating and fishing civilization, which we call water civilization.

The civilizations of ancient India had their own different governments. In the Indus Valley Civilization, priest kings were at the head of government. The Maurya Empire boasted a stable, centralized government that allowed the flourishing of trade and culture. That government had weakened by the time of the Gupta Empire, opening the gates to foreign invaders and civil wars. This

informative volume charts the changes in leadership in ancient India and ends with a comparison to India's government today. With engaging text, rich and colorful illustrations, and an enhanced e-book option, this title is a valuable resource for student reports.
