Prospects and Challenges in the Regional
Context of CAFTA World Scientific
Publishing Company
This book identifies the main challenges
Chinese agriculture is confronting and
considers how these challenges might be
met. The performance of China's
agricultural production is
comprehensively assessed while the

factors that affect agricultural
productivity are examined through
detailed econometric analysis and up to
date nationally representative data.
Challenges and Prospects OECD
Publishing
This volume examines the Chinese
foreign policy framework today and
traces its evolution since the post-Mao
era. Through the consideration of China's
relations with the major powers and its
management of various challenges
ranging from territorial disputes to

energy security, it investigates China's pursuit of major power status and influence in peaceful international scenarios. The author critically analyzes China's foreign policy from Chinese leaders' evolving worldview of the changing international environment. As China emerges as a major power and the second largest economy in the world, anyone interested in international politics and scenarios as well as China's foreign policy needs a basic, insightful reference book like this.

Development, Challenges and Prospects of Clean Coal in China Routledge

This book considers a wide range of illicit industries in China, exploring what drives such activities, why consumers tolerate them to differing degrees, how attempts to regulate them are

implemented and how such regulation is resisted. Industries considered include human smuggling, human organs trade, illicit pharmaceuticals, smuggling of animal parts, illegal logging and trade of woods, food safety and shadow banking. Throughout, the book describes how the shadow economy works, analyses the degree to which illicit activities are regarded as criminal and highlights the importance of the shadow economy for certain regions of China and certain sections of Chinese society. In doing so, it reveals the challenges of human security posed by these industries not only for China, but also for the global community, and considers a robust governance mechanism at both national and global levels to address these challenges. Overall, the book provides a

very rich picture of a key aspect of China's contemporary economy which is difficult to research.

Chinese Environmental Governance

Springer Science & Business Media

Collected in this special volume are 36 invited and contributed papers first presented at the Second Asian Pacific Psychological Forum held at the Chinese University of Hong Kong at the turn of the century. These papers were subsequently updated to bring to fore the latest development in algal research in the Asian Pacific Region. This volume thus provides one of the most comprehensive pictures of advances in algal research in this part of the world.

Renewable Electricity Development in China Routledge

In this book Cai Fang explores the

contribution of demographic transition to economic growth in China's reform period, depicts the population factors causing the economic slowdown since the second decade of the twenty-first century, analyses the challenges facing its long-term sustainability when the demographic dividend is disappearing, and proposes important policy remedies. He suggests that in order to avoid the middle-income trap, China's economic growth has to transform from an inputs-driven pattern to a productivity-driven pattern, which requires eliminating several institutional obstacles.

The Development of Greater China
Routledge

How will China reform its economy as it aspires to become the next economic superpower? It's clear that China is the

world's next economic superpower. But what isn't so clear is how China will get there by the middle of this century. It now faces tremendous challenges such as fostering innovation, dealing with ageing problem and coping with a less accommodative global environment. In this book, economists from China's leading university and America's best-known think tank offer in depth analyses of these challenges. Does China have enough talent and right policy and institutional mix to transit from input-driven to innovation-driven economy? What does ageing mean, in terms of labor supply, consumption demand and social welfare expenditure? Can China contain the environmental and climate change risks? How should the financial system be transformed in order to

continuously support economic growth and keep financial risks under control? What fiscal reforms are required in order to balance between economic efficiency and social harmony? What roles should the state-owned enterprises play in the future Chinese economy? In addition, how will technological competition between the United States and China affect each country's development? Will the Chinese yuan emerge as a major reserve currency, and would this destabilize the international financial system? What will be China's role in the international economic institutions? And will the United States and other established powers accept a growing role for China and the rest of the developing world in the governance of global institutions such as the World

Trade Organization and the International Monetary Fund, or will the world devolve into competing blocs? This book provides unique insights into independent analyses and policy recommendations by a group of top Chinese and American scholars. Whether China succeeds or fails in economic reform will have a large impact, not just on China's development, but also on stability and prosperity for the whole world.

China's growth and integration into the world economy : prospects and challenges Cambridge University Press
 Post-1998 changes in Indonesia's domestic politics coincided with China's "good neighbour" policy and "charm diplomacy" toward Southeast Asia, and bilateral relations have been showing significant signs of improvement and

closer cooperation.

Prospects and Challenges Routledge
 This IMF occasional paper offers an analytical overview of China's prospects and challenges for its growth and integration into the world economy. Divided into eight chapters, each focusing on a different aspect of China's economic position and development, including international trade, pricing, fiscal federalism, and labour market performance, the paper assesses China's economic potential for integration, and what it will take to achieve this goal.

 This title by a native-born China scholar includes detailed historical analysis and reflections on current challenges and opportunities for evangelization in China.

Economic Challenges of a Rising Global Power Routledge

In 25 years, EU-China relations have come far, further than many could have imagined - but how much further can these relations be taken? Today, their bilateral relations are at a crossroads. In effect, it has been 25 years since the EU and China agreed upon the legally binding Trade and Economic Cooperation Agreement, which sets the basis for their diplomatic relations. In an ever increasingly complex and globalised international environment, these actors

have become mutually interdependent on a variety of levels. In 2007, they agreed to revise and update the 1985 accord and replace it with an all-encompassing Partnership and Cooperation Agreement. However, more than three years passed, and there are many points of contention which need to be negotiated. What obstacles are blocking this agreement? How can these obstacles be overcome? What concessions should be made and where? This book will provide an up-to-date analysis of the problematic concerns, and the means to resolve these issues, that range from human rights, to international trade conflicts and climate change.

China's Foreign Policy Prospects and Challenges on China's 'one Belt, One

Road'A Risk Assessment ReportAging
ChinaThe Demographic Challenge to
China's Economic Prospects
South Korea's post-war economic
success is a well-known story. However,
its development in the past two decades
is relatively less investigated. By
reviewing key economic issues in South
Korea's economy today, this book offers
an input to the research of contemporary
South Korea, in particular the country's
economic development and its external
economic relations.This book provides
an analytical overview of key issues in
contemporary South Korean economy.
The timely and in-depth study presented
in the book examines the main reasons
behind South Korea's economic
slowdown in recent years, the economic
and social impact following chaebol's

growing business expansion, free trade
agreements with China and the United
States, the development of income
inequality, the ageing demography and
the Korean government's policy
response to overcome the current
economic difficulties.

Challenges and Prospects World Scientific

Beginning in 2000, the Chinese
government launched the "Western
Development Strategy" to foster the
regional development of the inland
regions and actively sought foreign
investment to support the effort. This
collection of papers presented at an
October 2001 conference reviews
regional patterns of foreign direct
investment (FDI) inflows in China,
outlines investment requirements,

compares the advantages of China's regions, and details the types of FDI sought for the Chinese hinterland.

Lessons learned from the experiences of Canada, Turkey, Germany, and Brazil are discussed. There is no subject index.

Dynamics, Challenges, and Prospects in a Changing Society Brookings Institution Press

This book is a thorough examination of the recent leadership transition in China. In the aftermath of the Sixteenth Congress of the Chinese Communist Party, this volume focuses scholarly attention on the various "prospects and challenges" for China's new leaders in the areas of elite politics, political reform, democratization, the economy,

the military, Sino-U.S. relations, and cross-Strait interactions. Addressing the major issues and personalities involved, the book offers several analyses, from various perspectives, of circumstances in post-congress China. Students and scholars in Asian studies, policy creation and development, political and social reform, and international relations will find the present volume engaging and enlightening.

Challenges and Prospects Peter Lang
The main objective of this study was to examine the prospects and challenges facing ACFTA (Asean-China free trade area). It examined what ought to be done by the ASEAN member nations to match China's competitive ability having recently joined the World Trade Organization. The study also examined

the compatibility of the ACFTA with the World Trade Organization rules and mode of dispute settlement under ASEAN and NAFTA as well as profound issues relating to ACFTA.

China's Accession to the WTO Taylor & Francis

Since being established in 1949 — and especially since the reform and opening up 30 years ago — China has experienced the most drastic changes ever in its 5000-year history. During this period, China has transformed from an agricultural society into an emerging, dynamic, and industrialized nation and has undergone rapid urbanization. The standard of living of the Chinese continues to rise and is taking rapid strides forward to a higher level of comprehensive well-being. China's

development over the past 60 years has indicated that the livelihood of the people is a key factor in economic and social construction in contemporary China. Having sufficient food and clothing is the first step in improving the livelihood of the people. A higher level of well-being can be achieved only after the basic needs are met. This “higher level of well-being” comprises of employment as the foundation, education as the key point, income distribution as the source, social security as the support, and public safety as an assurance. This book offers fresh perspectives by prestigious scholars from the Chinese Academy of Social Sciences. Based on a unique source of data which is available only to Chinese scholars, this book showcases key issues

on people's livelihood and social construction in Contemporary China, including income disparity, social security system, employment situation, post-80s generation and so on. Contents: Introduction: The Changing Chinese Society (Li Peilin) The People's Livelihood in China (Li Peilin and Li Wei) China in the Mass Consumption Stage (Tian Feng) Characteristic and Change of Current Employment (Fan Lei) Urban and Rural Residents' Social Security (Zhang Liping) Urban and Rural Residents' Social Support (Diao Pengfei) Evolution Process and the Trend of Income Differential (Chen Guangjin) Children of the Reform and Opening Up (Tian Feng) Readership: Undergraduates, graduates, academics and researchers who are interested in

issues on people's livelihood and social construction in Contemporary China, including income disparity, social security system, employment situation and so on. Keywords: Livelihood; Social Construction; People's Livelihood; Urban and Rural Residents; Mass Consumption; Employment; Social Security; Social Support; Chinese General Survey; New Growth Stage Key Features: Fresh Chinese perspectives by prestigious scholars in Chinese Academy of Social Sciences, based on unique sources of data which is available only to Chinese scholars First English book based on the data collected in the Chinese General Social Survey (CSS) Elaborates key issues on the Chinese society from the perspective of people's livelihood Reviews: "A major book to

understand the next contemporary Chinese society.” Professor Laurence Roulleau-Berger ENS LSH / Université Lumière Lyon 2

What are the Prospects and Challenges? International Monetary Fund

Despite the People's Republic of China's remarkable growth over the post-1978 reform period, questions have arisen about the sustainability of its exchange rate policy and the soundness of its financial system. This book focuses on the key monetary challenges to China's continued advancement and addresses such topical issues as the buildup of foreign exchange reserves, monetary control, credit allocation difficulties, and the expanding role of China's asset markets and stock exchanges. Current

and past monetary policy strategies are examined in detail as are the banking sector reforms leading up to full foreign competition in December 2006. The analysis also assesses the People's Republic's role within Greater China (including Hong Kong and Taiwan) and the potential for future renminbi monetary hegemony within Asia. The treatment of these issues is intended to be accessible to non-economists and does not assume prior immersion in the underlying formal models.

Prospects and Challenges for EU-China Relations in the 21st Century Springer

The Chapters in this book written by Chinese and Indian academics and researchers from United Service Institution of India and Sichuan University, explaining the inter-

disciplinary approaches and comparative perspectives, that may help to understand the essence and implication of China's One Belt One Road, initiative by identifying the convergences of interest in terms of social and economic development, political and cultural exchanges and remove the potential hindrance. The Chapters explained the scope of the One Belt One Road initiative as the mega development project and framework proposed by China, focusing on connectivity and cooperation among the regional countries, which till date received mixed reactions. There have been debates across the world regarding different facets of the OBOR initiative from whether it is an economic or strategic initiative or only a re-branding or a slogan for already existing ideas

and projects. The views and vision expressed by the authors on OBOR in this volume focused on OBOR's economic approach and nature with parallel initiative to cultural aspects, along with the educational and health care sectors cooperation. The Chapters in this Book focussed on OBOR connectivity both on Land and Sea routes, as OBOR initiative has proposals to connect the Nations by road, rail, and sea. It is quite obvious that OBOR is an ambitious project aimed at spurring the growth of Chinese economy; however, it is natural that such a vast project and ambition needs to provide adequate security guarantees and confidence building measures. The authors highlighted in the Chapters that to ensure proper consideration of both core

and specific interests of individual countries for active participation in the OBOR projects there is a need to promote active interaction for studying the implications and benefits. The authors also elaborated in the Chapters the challenges, opportunities, basic principle and rules of action for such trans-regional project like OBOR for achieving success. In this Volume the authors tried to provide both China s and India s perspective highlighting the significance of reviving the ancient Silk Road connectivity that extends on the world map connecting East with the West. The Chapter s highlighted opinion expressed by the policy makers, strategic analysts and academics in India and China, concerning various implications attached with the OBOR

initiative. Chapters in this volume highlighted various opportunities, concerns and challenges looking into the policy options as well as academic considerations, however, the argument clearly indicates that there is a need to act strategically on issues related to OBOR both on the land and Sea roads. The arguments given focuses on the suspicion that still exists in understanding the OBOR s aspirations clearly, hence, it is felt that further clarification on OBOR, alongside with a range of issues between India and China is necessary to facilitate an objective understanding on OBOR and formulate the structure based on mutual benefits."

Proceeding of The Second Asian Pacific Phycological Forum, held in Hong Kong, China, 21-25 June 1999

De Sitter Publications

This book provides a comprehensive understanding of the various dimensions of India's international positioning and foreign relations. Already a dominant player in South Asian politics, India has gained a strong footing in the international pecking order with the signing of the Indo-US nuclear agreement and significant support for its claim for a permanent seat in the Security Council. The chapters presented here look at myriad aspects — India's relations with its neighbours and global powers farther afield including the US, the European Union, Russia and China; India's policies, influences and strengths; developments in economy, knowledge and innovation amid evolving global realities as well as geostrategic

equations and alliances; its present and future plans vis-à-vis its standing in the world; and how international politics is likely to emerge in the coming years. The volume will be useful to academics, researchers and students of politics and international relations as also to policy practitioners and those in media interested in Indian affairs, foreign policy and international relations.

China S One Belt One Road World Scientific

This book examines the Senkaku/Diaoyu dispute between Japan and China and the Dokdo/Takeshima dispute between Japan and Korea, in order to offer new perspectives on the possible approaches towards amelioration and resolution of these conflicts. Japan's Island Troubles with China and Korea addresses the

prospects of and challenges to achieving resolutions in the island disputes, rather than focusing solely on the origins and the political roles they play in the domestic politics of the three nations. Furthermore, in taking an interdisciplinary approach, this book transcends existing studies, which focus on the domestic contexts of the disputes, and therefore avoids the pitfalls of nationalistic narratives.

Instead, this book fills a theoretical and methodological lacuna in the academic literature, exploring how the islands could become a point of co-operation, rather than contention. Providing a fresh examination of Japan's relations with its two closest neighbours, this book will be invaluable to students and scholars of Asian politics and international relations, security studies, and Asia-Pacific studies more generally.
