A Community-Based Approach

Routledge

Employing a broad definition of community development, this book shows how asset building can help increase the capacity of residents to improve their quality of life. It provides students and practitioners with theoretical and practical guidance on how to mobilize community capital (physical, human, social, financial, environmental, political, and cultural) to effect positive change. Authors Gary Paul Green and Anna Haines show that

development controlled by community-based organizations provides a better match between these assets and the needs of the communities.

Tourism and Sustainable

Development Goals Psychology Press

The book represents the first accessible examination of the complex connections between tourism and sustainability in southern African context. The edited book introduces relationships between tourism, sustainability and development with a range of case studies from the region, focusing especially on natural resource dependent communities in processes of transition.

Tourism and Sustainable Community Development CRC Press

This is a structured, edited book of nineteen Chapters which provides, from an inter-disciplinary perspective, latest thinking on, and practical case study exemplification of rural tourism and sustainable business development from Europe, North America, Australasia, the Middle East and Japan.

Asset Building & Community

Development Routledge

Provides a single reference that integrates community planning, business planning and tourism planning, from a global and Australian perspectives. It's an important text for the many courses that incorporate aspects of community tourism into their business, tourism, social science, and art programs. Beeton from La Trobe.

Conservation and Promotion of Heritage Tourism CRC Press

Culture and heritage tourism provide an important direction in sustainable funding and tourism. Assessing the potential of cultural and heritage assets, including physical and experiential values, is crucial for the sustainability of tourism attractions and regional development. *Conservation and Promotion of Heritage Tourism* is a collection of innovative methods and applications to utilize historical resources to increase tourism for long-term economic security and advancement. Highlighting a range of topics including cultural tourism, community development, and tourism branding, this book is ideally designed for historians, city planners, curators, business professionals, educators, engineers, managers, tourism researchers, graduate-level students, policymakers, and academicians seeking current research on the connections between culture, conservation, sustainable development, and tourism.

Prospects and Challenges of Community-Based Tourism and Changing Demographics Routledge

First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Local Communities and Natural Resources in Transition Routledge

This volume explores the links between the rapidly growing phenomenon of social entrepreneurship (SE) and the international tourism and hospitality industry. This unique industry is particularly ripe for transformation by SE and the book's authors delve deeply into the reasons for this. The book has three parts. The first creates a conceptual and theoretical framework for understanding the uniqueness of SE in the tourism context. The second examines different communities of practice where SE is being applied in tourism. The third is a rich collection of case studies from eight countries where tourism SE is already having an impact. The book's authors address the topic from many different angles, disciplinary backgrounds and geographic areas. Many case study authors are practicing social entrepreneurs who share their successes, challenges and experience with tourism-related projects. The book also proposes a research agenda and educational programmatic changes needed to support tourism SE. As these are developed, tourism SE will bring innovation to destinations, transformation of their economic and social structures, and contribution to a better world. The book has many insights and resources for

scholars and practitioners alike to usher in this transformation.

Rural Tourism Development Routledge

The dynamics of trust and distrust are central to understanding modern society, social relations, and development processes. However, numerous studies suggest that societal trust and citizen's trust in government and its institutions are on the decline, challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development. Recognizing its importance, the authors for the first time situate trust within the context of tourism development and planning. This volume discusses trust in tourism from different yet intrinsically connected perspectives. Chapters review how diminishing societal trust may have adversely affected tourism planning systems, the role of trust in good tourism governance and sustainable tourism, how trust can be used as a facilitator of participatory tourism planning, political trust in tourism institutions, power and how tourism development can be a basis for trust creation among society members by using social capital theory. In addition, a final section on 'Researching Trust in Tourism Development' means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector, but also methodological aspects of research on trust in the context of tourism development and planning. This significant volume is valuable reading for students, academics and researchers interested in tourism development and planning.

This Handbook offers an up-to-date and comprehensive overview of core themes and concepts in community-based tourism management. Providing interdisciplinary insights from leading international scholars, this is the first book to critically examine the current status of community-based tourism. Organised into five parts, the Handbook provides cutting-edge perspectives on issues such as Indigenous communities, tourism and the environment, sustainability, and the impact of digital communities. Part 1 introduces core concepts and methodologies, and distinguishes community products from other tourism and hospitality goods. Part 2 explores communities' attitudes towards tourism development and their engagement with and ownership of the process. It also delves into the role of community-based tourism, under the influence of

governmental policies, in the economic and social development of a region. In Part 3 various management, marketing, and branding initiatives are identified as a means of expanding the tourism business. Part 4 examines the negative impacts of mass tourism and its threats to culture, tradition, identity, the built environment, and natural heritage. In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered, and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. This Handbook fills a void in the current research and thus will appeal to scholars, students, and practitioners interested in tourism management, tourism geography, business studies, development policy and practice, regional development, conservation, and sustainability.

Exploring the Role of Volunteer Tourism in Sustainable Community Development Springer

This book analyses community-based approaches to developing and regenerating tourism destinations in the developing world, addressing this central issue in sustainable tourism practices. It reviews a variety of systems useful for analysing and understanding management issues to offer new insight into the skills and resources that are needed for implementation, ongoing monitoring and review of community-based tourism. Adopting a multidisciplinary approach, this book explores alternatives to the dominant interpretation which argues against tourism as a benefit for community development. International case studies throughout the book illustrate and vouch for tourism as a transformative force while clarifying the need to manage expectations in sustainable tourism for community development, rejuvenation and regeneration. Emphasis is placed on accruing relevant decision-support material, and creating services, products and management approaches that will endure and adapt as change necessitates. This will be of great interest to upper-level students, researchers and academics in the fields of tourism impacts, sustainability, ethics and development as well as the broader field of geography.

Tourism Development and the Environment Routledge

As the tourist industry becomes increasingly important to communities around the world, the need to develop tourism sustainably has also become a primary concern. This collection of

international case-studies addresses this crucial issue by asking what local communities can contribute to sustainable tourism, and what sustainability can offer local communities. Individually these investigations present a wealth of original research and source material. Collectively the book illuminates the term 'community', the meaning of which, it is argued, is vital to understanding how sustainable tourism development can be implemented in practice.

Tourism Development and the Environment: Beyond Sustainability? challenges the sustainable tourism development paradigm that has come to dominate both theoretical and practical approaches to tourism development over the last two decades. It extends the sustainable tourism debate beyond the arguably managerialist 'blueprint' and destination-focused approach that continues to characterise even the most recent 'sustainability' agenda within tourism development. Reviewing the evolution of the sustainable tourism development concept, its contemporary manifestations in academic literature and policy developments and processes, the author compares its limitations to prevailing political-economic, socio-cultural and environmental contexts. He then proposes alternative approaches to tourism development which, nevertheless, retain environmental sustainability as a prerequisite of tourism development. This book also acts as an introduction to the Earthscan series *Tourism, Environment and Development*. About the series: 'Tourism, Environment and Development' aims to explore, within a variety of contexts, the developmental role of tourism as it relates explicitly to its environmental consequences. Each book will review critically and challenge 'traditional' perspectives on (sustainable) tourism development, exploring new approaches that reflect contemporary economic, socio-cultural and political contexts.

Community Development Through Tourism SAGE

This new volume addresses the growing interest to understand tourism and hospitality in Southeast and South Asia, two regions that have seen tremendous growth in international tourists in recent years. It explores the current development of hospitality and tourism industry in the regions of Hong Kong, Macao and Taiwan as well as other key countries in Southeast and South Asia. The Hospitality and Tourism Industry in ASEAN and East Asian Destinations: New Growth, Trends, and

Developments provides updated findings and case studies that highlight opportunities and issues of tourism and hospitality development in ASEAN. Chapters cover such diverse topics as: Online marketing strategies Sustainable hospitality development Diversification efforts of the tourism industry Innovations in independent hotels Wildlife tourism in urban destinations The Vietnamese national park system Consumers' positive and negative images of certain destinations Much more While academicians will benefit from the updated research findings summarized by the respected scholars, hospitality professionals will also find the book a valuable source of information as the chapters delve into the most recent topical and industry focused issues.

Giving New Life to Old or Forgotten Communities - Understand the branding of small communities for improved tourism, economic development and placemaking. In this book, David Twigg discusses tourism in destination communities, destination branding for small cities and community development through tourism. This book intends to layout the components of creating an Integrated Tourism System for Destination Communities. These concepts can be used to develop destination communities in urban as well as rural settings for truly sustainable communities. To build an understanding of this process the following areas will be discussed: - Opportunities Resulting From Value and Behavioral Shifts In Specific Target Markets - Using Complementary Subcultures as Basis for Building Specific Destinations - Understanding Subcultures and Human Capital - Cataloging System Assets and Creating Narrative of Place - Growth and Maturation of Destination Communities **Why You Need to Read Destination Community:** This book begins with where does the concept of "destination community" come from, how does it work and where to go from here, how it develops and matures. We see the shifts in cultural values in the American society since the 1950's, which results from the economic prosperity and technology advancement. The culture shift brings forward the changes in people's lifestyle, when people became more and more distant from the agrarian based living. Later, the shift in community models and tourism experience is discussed. As the formula community, as David calls it, rises and declines, the concept of Destination Community, as a more sustainable tourism based community, is introduced. The new

generation of in-migration is becoming smarter in choosing their community. We explore the main characteristics of a destination community, why David calls it "handmade" experience, and why people are attracted by it. It all comes down to connecting authentic and versatile "subcultures" fostered by a supportive business environment. Later we look at theory and examples to explain a supportive business environment, namely "Integrated Tourism System," and how to design such a system. In David's opinion, this is a key to the success of a destination community. We lay out the vision of the future growth beyond the initial phases of building a destination community, where all readers are invited to imagine with us, work with us and proceed with hope, creativity, passion, and thoughtfulness.

Tourism has become a major economic agent and an important social and cultural element in contemporary southern Africa. As such, tourism has a wide range of impacts on environment, economy, cultures, and the everyday life of people. These processes have highlighted the role of sustainability in tourism development. This book represents an accessible examination of the connections between tourism and sustainability in southern Africa. It introduces connections between tourism, sustainability and development with a range of case studies and examples from the region. While the book and the individual chapters are emphasising the key role of tourism in the transition processes of local communities and environments, the social, cultural, economic and political contexts of tourism and communities are also highlighted.

Introduction to Tourism Emerald Group Publishing

With the exponential rise in leisure mobility, tourism has increasingly become of great economic significance. Cultural heritage, such as museums, churches, historical landscapes, urban parks, and exhibitions attract many visitors and countries, regions and cities which house such historic-cultural amenities have seen increasingly large waves of tourists. While an avalanche of tourists has a positive impact on the local economy, such modern mass tourism also brings about negative externalities such as congestion, decline in quality of life, low access to cultural amenities and loss of local identity; to the extent that the sustainability conditions of a locality might be endangered. This tourism dilemma is particularly pronounced in cities with a rich cultural past, such as Venice, Naples

and Amsterdam. Bringing together an interdisciplinary team of leading scholars from North America and Europe, this book examines the interface of local cultural resources and modern mass tourism from a sustainability perspective. It puts forward innovative methodologies and best case practice for future cultural conservation policies.

This book examines the need for a new way of describing sustainable tourism and also looks at the frameworks needed to rethink how to apply this to communities, private operators and protected area managers. It makes it clear that tourism is just one of many human activities that affects host communities. The work includes informative and provocative case studies with realistic applications.

References included in the book will help graduate students formulate new hypotheses and suggest literature for them. Tools and techniques useful to tourism practitioners suggest innovative approaches to marketing, management and community development.
