Communication, Media, and Identity: A Christian Theory of Communication is the first comprehensive theoretical look at the nature of communication from a biblical Christian perspective. This groundbreaking new work discusses the implications of such a theory for interpersonal relations, use of media, and the development of digital culture in the wake of the computer. It also draws widely from the literature of the secular world, critiquing perspectives where necessary and adopting perspectives that are in line with Christian anthropology, epistemology, and ontology. Through this unique lens, the reader is able to understand communication as an art, as a tool for evangelism, and as a unique human activity that allows people to have a stake in the creation. It covers both mediated and non-mediated forms of communication, is sensitive to theological differences within the Christian faith, and examines closely the problem of technology, and especially digital technology, for the practice of communication. As the newest book in the Communication, Culture, and Religion Series, Robert Fortner's work illuminates the theological aspects of communication. One of Woolf's most experimental novels, *The Waves* presents six

characters in monologue - from morning until night, from childhood into old age - against a background of the sea. The result is a glorious chorus of voices that exists not to remark on the passing of events but to celebrate the connection between its various individual parts.

In *On Decoloniality* Walter D. Mignolo and Catherine E. Walsh explore the hidden forces of the colonial matrix of power, its origination, transformation, and current presence, while asking the crucial questions of decoloniality's how, what, why, with whom, and what for. Interweaving theory-praxis with local histories and perspectives of struggle, they illustrate the conceptual and analytic dynamism of decolonial ways of living and thinking, as well as the creative force of resistance and re-existence. This book speaks to the urgency of these times, encourages delinkings from the colonial matrix of power and its "universals" of Western modernity and global capitalism, and engages with arguments and struggles for dignity and life against death, destruction, and civilizational despair.

No Permanent Waves boldly enters the ongoing debates over the utility of the 'wave' metaphor for capturing the complex history of women's rights by offering fresh perspectives on the diverse movements that comprise U.S. feminism, past and present. Seventeen essays - both original and reprinted - of this title address continuities, conflicts, and transformations among women's movements in the United States from the early nineteenth century through today. In this title, a respected group

of contributors from diverse generations and backgrounds argue for new chronologies, more inclusive conceptualizations of feminist agendas and participants, and fuller engagements with contestations around particular issues and practices. Race, class, and sexuality are explored within histories of women's rights and feminism as well as the cultural and intellectual currents and social and political priorities that marked movements for women's advancement and liberation. These essays question whether the concept of waves surging and receding can fully capture the complexities of U.S. feminisms and suggest models for reimagining these histories from radio waves to hip-hop.

The Master of Happy Endings is a powerful new novel about memory, belonging, helping others, and the vagaries of the human heart. It is also a compelling story about how a man in his late seventies manages to conjure one more great adventure for himself. Axel Thorstad lives in a shack on a remote island off the coast of British Columbia. Once a popular school teacher and thespian who touched the lives of hundreds of his students, he now lives in retirement and mourns the recent death of his wife. But even this stoical giant of a 77-year-old finds the isolation too much. He begins to run want ads in newspapers offering his services as a tutor, and meets the indomitable Mrs. Montana. She hires Axel to coach her precocious teenage-TV-actor son Travis for his school exams while he shoots a new episode in Hollywood.

Life in L.A. is far removed from his isolated life in rural B.C., and soon Thorstad finds himself caught up in the drama of his young student's life, and the return of an old flame. Set amidst the fleshpots, sound-stages and dining rooms of L.A., this engaging novel of lives and loves lost and found also gestures to the courage one needs in the face of the vulnerabilities of older age that all too soon beset.

"A majestic study of a most important epoch of intellectual

history."—Brian Pippard, Times Literary Supplement "The authors'

use of archival sources hitherto almost untouched gives their story a startling vividness. These volumes are among the finest works produced by historians of physics."—Jed Z. Buchwald, Isis "The authors painstakingly reconstruct the minutiae of laboratory budgets, instrument collections, and student numbers; they disentangle the intrigues of faculty appointments and the professional values those appointments reflected; they explore collegial relationships among physicists; and they document the unending campaign of scientists to wring further support for physics from often reluctant ministries."—R. Steven Turner, Science "Superbly written and exhaustively researched."—Peter Harman, Nature
