The rating achieved depends on the effectiveness of your QMS. The IEC 61508 certificate indicates the systematic capability of a product. SIL based on Systematic Capability e.g. SC3 (SIL 3 Capable) Back to Basics 14 - Systematic Capability | exida Rosemount 644 is IEC 61508 Certified Temperature Transmitter and is SIL 3 Capable assessed by exida. Rosemount 644 - IEC 61508 Certified Temperature ... - exida IEC 61508 Functional Safety Assessment Project: Mark Vle PPRa Protection Module Customer: GE Energy Salem, VA USA Contract No.: Q08/10-57 Report No.: GE 08-10-57 R003 Version V1, Revision R3, July 19, 2013 Iwan van Beurden 61508 SIL 3 CAPABLE © 61508 SIL 3 CAPABLE - exida by John Yozallinas, CFSE; Thursday, April 14, 2011 ; Certification; Stepping stones to SIL 3. Imagine. Marketing has just approached the engineering department and says your new safety product must have SIL 3 Capable certification instead of SIL 2 to be successful. You are in the engineering group developing this new product. exida explains Blog 3. This product was previously certified to IEC 61508 SIL 2 and SIL 3, depending upon its configuration, by TÜV Nord (Report No.: SAS-136/2006T) and exida. Based on this certification, it can be concluded that the GE Energy development process meets the requirements of IEC 61508 for SIL 3. 61508 SIL 3 CAPABLE - exida exida reviewed and assessed field failures since the last certification renewal. The functional safety assessment was performed to the requirements of IEC 61508, SIL 3. A full IEC 61508 Safety Case was previously prepared, using the exida SafetyCaseDB tool, when TÜV certified these transmitters. 61508 SIL 3 CAPABLE - Spartan Control through an audit against the requirements of IEC 61508. - exida-certification reviewed and assessed a detailed Failure Modes, Effects, and Diagnostic Analysis (FMEDA) of the device to document the hardware architecture and failure s behavior. The functional safety assessment was performed to the requirements of IEC 61508, . SIL 3 61508 SIL 3 CAPABLE - DGFG Accredited global certification company, exida, has certified Moore Industries' STA logic solver for functional safety, ensuring that it meets the functional safety requirements for Safety Integrity Level (SIL) 3 capable per IEC 61508. exida's certifying assessor Iwan van Beurden cited Moore Industries' strong development process in the evaluation. Control Engineering | Logic solver passes SIL 3 safety ... IEC 61508 certification programs are being offered globally by several well recognized CBs including exida, TÜV Rheinland, TÜV Sud, and TÜV Nord. Most certifications of currently manufactured automatic protection equipment (sensors, logic solvers, and final element devices) have been completed by exida and TÜV Rheinland.
