Not allocating an adequate amount of budget to a project at the start will obviously lead to either budget overrun or failure. Assuming that a project will be a success, not allotting enough budget is downright wishful thinking. 6 Evident

Reasons for Budget Overruns When one makes this kind of price reduction without fundamental work reductions, they have created a cost overrun at the very beginning of a project. This contest also happens inside an organization. In this case, the project has to be sold to upper management, and one is competing with other organization managers for authorization. Reasons for Project Overruns The results showed that, slow decision making, poor schedule management, increase in material/machine prices, poor contract management, poor design/ delay in providing design, rework due to wrong work, problems in land acquisition, wrong

estimation/ estimation method, and long period between design and time of bidding/tendering are the major causes of cost overrun. Causes of Cost Overrun In Construction | Semantic Scholar For example, unusually bad weather can cause delays to a construction project. Risk can also include factors such as the performance of a vendor. Risk management, the process of identifying and treating risk helps to prevent cost overrun. The potential costs of risks can also be considered in cost contingency. 4 Types of Cost Overrun - Simplicable Causes of Cost Overrun What causes cost overrun? There are various factors—from material

costs to labor shortages—that impact construction projects and could affect not only their progress and timeline but also could overrun the budget into the red.

Construction Project Cost Overruns: 7 Examples

A cost overrun, also known as a cost increase or budget overrun, involves unexpected incurred costs. When these costs are in excess of budgeted amounts due to an underestimation of the actual cost during budgeting, they are known by these terms. Cost overruns are common in infrastructure, building, and technology projects.

Cost overrun - Wikipedia

There are often a number of reasons factoring in to this, although the

majority of project budgets that experience overrun are due to poor planning, combined with a lack of visibility in cost and budget management.

1) Lack of proper planning when the project starts
