It was a simple incident in the life of James Clavell—a talk with his young daughter just home from school—that inspired this chilling tale of what could happen in twenty-five quietly devastating minutes. He writes, "The Children's Story came into being that day. It was then that I really realized how vulnerable my child's mind was—any mind, for that matter—under controlled circumstances. Normally I write and rewrite and re-rewrite, but this story came quickly—almost by itself. Barely three words were changed. It pleases me greatly because I kept asking the questions... Questions like, What's the use of 'I pledge allegiance' without understanding? Like Why is it so easy to divert thoughts? Like What is freedom? and Why is so hard to explain? The Children's Story keeps asking me all sorts of questions I cannot answer. Perhaps you can—then your child will...."

These are just some of the questions you will find answered in this delightful collection of stories recounting real-life incidents from the life of Sudha Murty-teacher, social worker and bestselling writer. There is the engaging story about one of her students who frequently played truant from school. The account of how her mother's advice to save money came in handy when she wanted to help her husband start a software company, and the heart-warming tale of the promise she made-and fulfilled to her grandfather, to ensure that her little village library would always be well supplied with books. Funny, spirited and inspiring, each of these stories teaches a valuable lesson about the importance of doing what you believe is right and having the courage to realize your dreams.

This collection of monographs provides useful information for educational administrators in the recruitment and training of science and technology teacher educators in the light of the recent orientation of science education at the basic level. Furthermore, this volume is a valuable resource for science and technology teacher educators. It aims to improve their own

pedagogical skills and also provides strategies which could be used by them with their trainees to make them better science and technology teachers. Effective delivery of science and technology education requires co-ordination at different levels. These monographs provide guidelines and practical suggestions on achieving such co-ordination at the teacher training institution as well as at the school level. These monographs were produced by experienced science educators of Asia under the Training of

Trainers Programme in Science, Technology and Mathematics Education (STME) of the Commonwealth Secretariat.
