coincidence in time, a psychic factor which is independent of space and time. This revolutionary concept of synchronicity both challenges and complements the physicist's classical view of causality. It also forces us to a basic reconsideration of the meaning of chance, probability, coincidence and the singular events in our lives.

In the 1930s C. G. Jung embarked upon a bold investigation into childhood dreams as remembered by adults to better understand their significance to the lives of the dreamers. Jung presented his findings in a four-year seminar series at the Swiss Federal Institute of Technology in Zurich. *Children's Dreams* marks their first publication in English, and fills a critical gap in Jung's collected works. Here we witness Jung the clinician more vividly than ever before--and he is witty, impatient, sometimes authoritarian, always wise and intellectually daring, but also a teacher who, though brilliant, could be vulnerable, uncertain, and humbled by life's great mysteries. These seminars represent the most penetrating account of Jung's insights into children's dreams and the psychology of childhood. At the same time they offer the best example of group supervision by Jung, presenting his most detailed and thorough exposition of Jungian dream analysis and providing a picture of how he taught others to interpret dreams. Presented here in an inspired English translation commissioned by the Philemon Foundation, these seminars reveal Jung as an impassioned educator in dialogue with his students and developing the practice of analytical psychology. An invaluable document of perhaps the most important psychologist of the twentieth century at work, this

splendid volume is the fullest representation of Jung's views on the interpretation of children's dreams, and signals a new wave in the publication of Jung's collected works as well as a renaissance in contemporary Jung studies.

**The Symbolic Quest** Inner City Books

An account of Jung's handling of the transference between psychologist and patient in the light of his conception of the archetypes. Based on the symbolic illustrations in a sixteenth century alchemical text.

This volume has become known as perhaps the best introduction to Jung's work. In these famous essays, "The Relations between the Ego and the Unconscious" and "On the Psychology of the Unconscious," he presented the essential core of his system. Historically, they mark the end of Jung's intimate association with Freud and sum up his attempt to integrate the psychological schools of Freud and Adler into a comprehensive framework. This is the first paperback publication of this key work in its revised and augmented second edition of 1966. The earliest versions of the Two Essays, "New Paths in Psychology" (1912) and "The Structure of the Unconscious" (1916), discovered among Jung's posthumous papers, are published in an appendix, to show the development of Jung's thought in later versions. As an aid to study, the index has been comprehensively expanded.

In this book Alfred Ribi reaches back across two millennia, gathering and engaging an extraordinary collection of

writings. With authority and fluency, Ribí draws together the antique texts of Hellenism, Gnosticism, Hermeticism and Alchemy, and illustrates how these nurture the visionary work of C. G. Jung. Into this tapestry Alfred Ribí weaves personal insights gained over half a century of experience as an analytical psychologist. He illuminates how the dreams and visions of modern individuals intertwine with the tradition that Jung indicated to be a spiritual antecedent of his psychology. This is the second volume of a two-volume work. The first volume, *The Search for Roots: C. G. Jung and the Tradition of Gnosis* was published in an English translation in 2013. That volume served as a general introduction to the more detailed and multifaceted exposition presented in this second volume. This volume is addressed to serious students of Hermeticism, Gnosticism, and the works of C. G. Jung. It will richly reward those who give it their diligent attention.

About the Author Alfred Ribí was born in 1931. He studied medicine in Zurich, followed by specialization in Psychiatry and Psychotherapy FMH. In 1963, he began analysis with Marie-Louise von Franz—a close associate of C.G. Jung—and subsequently worked for many years as a colleague with Dr. von Franz. He is a diplomat of the C.G. Jung Institute, Zurich, where he has served as Director of Studies, a teaching and control analyst, and a lecturer and examiner of the Institute. He is past President of both the Foundation for Jungian Psychology and of the Psychological Club in Zurich. The book was edited and includes a Foreword by Lance S. Owens. It was translated into English by Mark Kyburz.

**The Act of Living** Princeton University Press

Fables, folklore, and fantasy--this compendium of all things alchemical and mystical gathers centuries of esoteric mythology in the form of writings, drawings, paintings, and prints. From early Christian mystics to the illustrations of William Blake and the Romantics, this collection spans science, philosophy, and otherworldly mystery over the ages.

*The Black Sun* Princeton University Press  
*Jungian Metaphor in Modernist Literature* argues for the centrality of Carl Jung's theory of individuation and alchemy in modernist poetics. Through analysis of the uses of a mythic method in modernist literary works, the book develops a related alchemical model which serves to expand understanding of modernist uses of language. The book is an innovative exploration of modernist literary creativity under a Jungian lens, spanning both the literary and scholarly Jungian field. The literary works of Hilda Doolittle, James Joyce and W.B Yeats are read in the light of Jung's central theme of an 'alchemical marriage' with attempts at developing a related alchemical model, a Jungian poetics, which serves to expand a reader's understanding of modernist uses of language. This provides a fresh new lens through which modernist literature is viewed and seeks to reevaluate the role of Jung in the humanities, namely in the field of modernist literature, an area from which Jung has long been shunned. This book will be of great interest for academics, researchers and post-graduate students in the fields of literature, modernism, psychoanalysis, gender studies, Jungian psychology, depth psychology, literary theory, and cultural studies. .

Although alchemy is popularly regarded as the science that sought to transmute base physical matter, many of the medieval alchemists were more interested in developing a discipline that would lead to the psychological and spiritual transformation of the individual. C. G. Jung discovered in his study of alchemical texts a symbolic and imaginal language that expressed many of his own insights into psychological processes. In this book, Marie-Louise von Franz examines a text by the sixteenth-century alchemist and physician Gerhard Dorn in order to show the relationship of alchemy to the concepts and techniques of analytical psychology. In particular, she shows that the alchemists practiced a kind of meditation similar to Jung's technique of active imagination, which enables one to dialogue with the unconscious archetypal elements in the psyche. Originally delivered as a series of lectures at the C. G. Jung Institute in Zurich, the book opens therapeutic insights into the relations among spirit, soul, and body in the practice of active imagination.

Notes from the Seminar Given in 1936-1940 Princeton University Press  
Jung's legendary American lectures on dream interpretation In 1936 and 1937, C. G. Jung delivered two legendary seminars on dream interpretation, the first on Bailey Island, Maine, the second in New York City. *Dream Symbols of the Individuation Process* makes these lectures widely available for the first time, offering a compelling look at Jung as he presents his ideas candidly and in English before a rapt American audience. The dreams presented here are those of Nobel Prize-winning physicist Wolfgang Pauli, who turned to Jung for therapeutic help because of troubling personal events, emotional turmoil, and

depression. Linking Pauli's dreams to the healing wisdom found in many ages and cultures, Jung shows how the mandala—a universal archetype of wholeness—spontaneously emerges in the psyche of a modern man, and how this imagery reflects the healing process. He touches on a broad range of themes, including psychological types, mental illness, the individuation process, the principles of psychotherapeutic treatment, and the importance of the anima, shadow, and persona in masculine psychology. He also reflects on modern physics, the nature of reality, and the political currents of his time. Jung draws on examples from the Mithraic mysteries, Buddhism, Hinduism, Chinese philosophy, Kundalini yoga, and ancient Egyptian concepts of body and soul. He also discusses the symbolism of the Catholic Mass, the Trinity, and Gnostic ideas in the noncanonical Gospels. With an incisive introduction and annotations, *Dream Symbols of the Individuation Process* provides a rare window into Jung's interpretation of dreams and the development of his psychology of religion.

Jung was intrigued from early in his career with coincidences, especially those surprising juxtapositions that scientific rationality could not adequately explain. He discussed these ideas with Albert Einstein before World War I, but first used the term "synchronicity" in a 1930 lecture, in reference to the unusual psychological insights generated from consulting the I Ching. A long correspondence and friendship with the Nobel Prize-winning physicist Wolfgang Pauli stimulated a final, mature statement of Jung's thinking on synchronicity, originally

published in 1952 and reproduced here. Together with a wealth of historical and contemporary material, this essay describes an astrological experiment Jung conducted to test his theory. Synchronicity reveals the full extent of Jung's research into a wide range of psychic phenomena. This paperback edition of Jung's classic work includes a new foreword by Sonu Shamdasani, Philemon Professor of Jung History at University College London.

"It was the genius of C.G. Jung to discover in the 'holy technique' of alchemy a parallel to the psychological individuation process. This book, by Jung's long-time friend and co-worker, completely demystifies the subject. Designed as an introduction to Jung's more detailed studies, and profusely illustrated, here is a lucid and practical account of what the alchemists were really looking for--emotional balance and wholeness"--back cover.

Stanton Marlan brings together writings which span the course of his career, examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul. Several chapters describe a telos that aims at the mysterious goal of the Philosophers' Stone, a move replete with classical and postmodern ideas catalysed by prompts from the unconscious: dreams, images, fantasies, and paradoxical conundrums. Psyche

and matter are seen with regards to soul, light and darkness in terms of illumination, and order and chaos as linked in the image of chaosmos. Marlan explores the richness of the alchemical ideas of Carl Jung, James Hillman, and others and their value for a revisioning of psychology. In doing so, this volume challenges any tendency to literalism and essentialism, and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's Alchemical Psychology. C.G. Jung and the Alchemical Imagination will be a valuable resource for academics, scholars, and students of Jungian and post-Jungian studies, Jungian analysis, and psychotherapy. It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training.

Jung and the Alchemical Imagination illustrates the spiritual nature of Jungian psychology and the debt it owes to the tradition of esoteric religion. Unlike other books on Jung and alchemy which contain a psychological interpretation of alchemical material, this work uses alchemy to understand the three cornerstones of Jungian spirituality--the self, the transcendent function, and active imagination. Through the interpretation of alchemical imagery,

Raff explains the nature of these three concepts and illustrates how together they form a new model of contemporary Western spirituality. This book is also unique in selecting alchemical texts for analysis that are relatively unknown and which, for the most part, have never been interpreted. In addition, he presents two new concepts--the ally and the psychoid realm. Through the addition of these ideas, and the new understanding that they offer, it is possible to apply alchemical imagery to transpsychic experience/ that is, to a world of spirits which may not be reduced to psychological concepts. By including this realm in the study of alchemy and Jungian thought, it is possible to gain insights into the nature of visionary and ecstatic experiences that form part of the path of individuation--the road to completion. Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the

influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. After joining the staff of the Burgholzli Mental Hospital in 1900, Jung developed and applied the word-association tests for studying normal and abnormal psychology. The studies have remained a significant phase in the development of Jung's conceptions and an important contribution to diagnostic psychology and psychiatry. Between 1904 and 1907 he published nine studies on the tests. These studies, together with two lectures on the association method given in 1909 at Clark University and three articles on psychophysical researches from American and English journals in 1907-1908, compose this volume. Jung's association studies showed the definite

influence of Bleuler and also of Freud, with whom he worked closely for several years. With this volume, the Collected Works are complete except for the Miscellany, Bibliography and Index volumes.

C. G. Jung and Erich Neumann first met in 1933, at a seminar Jung was conducting in Berlin. Jung was fifty-seven years old and internationally acclaimed for his own brand of psychotherapy. Neumann, twenty-eight, had just finished his studies in medicine. The two men struck up a correspondence that would continue until Neumann's death in 1960. A lifelong Zionist, Neumann fled Nazi Germany with his family and settled in Palestine in 1934, where he would become the founding father of analytical psychology in the future state of Israel. Presented here in English for the first time are letters that provide a rare look at the development of Jung's psychological theories from the 1930s onward as well as the emerging self-confidence of another towering twentieth-century intellectual who was often described as Jung's most talented student. Neumann was one of the few correspondence partners of Jung's who was able to challenge him intellectually and personally. These letters shed light on not only Jung's political attitude toward Nazi Germany, his alleged anti-Semitism, and his psychological theory of fascism, but also his understanding of Jewish psychology and mysticism. They affirm Neumann's importance as a leading psychologist of his time and paint a fascinating picture of the psychological impact of immigration on

the German Jewish intellectuals who settled in Palestine and helped to create the state of Israel. Featuring Martin Liebscher's authoritative introduction and annotations, this volume documents one of the most important intellectual relationships in the history of analytical psychology.

All the creative art psychotherapies (art, dance, music, drama, poetry) can trace their roots to C. G. Jung's early work on active imagination. Joan Chodorow here offers a collection of Jung's writings on active imagination, gathered together for the first time. Jung developed this concept between the years 1913 and 1916, following his break with Freud. During this time, he was disoriented and experienced intense inner turmoil --he suffered from lethargy and fears, and his moods threatened to overwhelm him. Jung searched for a method to heal himself from within, and finally decided to engage with the impulses and images of his unconscious. It was through the rediscovery of the symbolic play of his childhood that Jung was able to reconnect with his creative spirit. In a 1925 seminar and again in his memoirs, he tells the remarkable story of his experiments during this time that led to his self-healing. Jung learned to develop an ongoing relationship with his lively creative spirit through the power of imagination and fantasies. He termed this therapeutic method "active imagination." This method is based on the natural healing function of the imagination, and its many expressions. Chodorow clearly presents the texts, and sets them in the proper context. She also interweaves her discussion of Jung's writings and ideas with contributions from Jungian authors and artists.
