The emergence of the Balkan national states in the nineteenth and twentieth centuries has long been viewed through an Orientalist lens, and their birth and evolution traditionally seen by scholars as the effect of the Ottoman Empire's decline. As a result, the role played by the great European revolutions, wars and intellectual developments is often neglected. Rejecting these traditional Orientalist narratives, this work examines Balkan nationalist movements within their broader European historical contexts. Drawing on a range of unused archival research and ranging from the Napoleonic era to the Bolshevik Revolution, contributors variously consider the complex roles played by Europe's internal geo-political ruptures in forming the Balkan states, and demonstrate how the Balkan intelligentsia drew inspiration from, and interacted with, contemporary European thought. Shedding light onto the strong intellectual, political and military interconnections between the regions, this is essential reading for all those studying Balkan and European history, as well as anyone interested in the question of national identity. "Chinese Medicine and Healing is a comprehensive introduction to a rich array of Chinese healing practices as they have developed through time and across cultures. Contributions from fifty-eight leading international scholars in such fields as Chinese archaeology, history, anthropology, religion, and medicine make this a collaborative work of uncommon intellectual synergy, and a vital new resource for anyone working in East Asian or world history, in medical history and anthropology, and in biomedicine and complementary healing arts. This illustrated history explores the emergence and development of a wide range of health interventions, including propitiation of disease-inflicting spirits, divination, vitality-cultivating meditative disciplines, herbal remedies, pulse diagnosis, and acupuncture. The authors investigate processes that contribute to historical change, such as competition between different types of practitioner—shamans, Daoist priests, Buddhist monks, scholar physicians, and even government officials. Accompanying vignettes and illustrations bring to life such diverse arenas of health care as childbirth in the Tang period, Yuan state-established medical schools, fertility control in the Qing, and the search for sexual potency in the People's Republic. The two final chapters illustrate Chinese healing modalities across the globe and address the challenges they have posed as alternatives to biomedical standards of training and licensure. The discussion includes such far-reaching examples as Chinese treatments for diphtheria in colonial Australia and malaria in Africa, the invention of ear acupuncture by the French and its worldwide dissemination, and the varying applications of acupuncture from Germany to Argentina and Iraq." An interesting resource for learning about the cultural differences and characteristics of people across the globe, this encyclopedia covers the "do's" and "don'ts" of a breadth of countries and

major ethnic groups. Readers of this one-volume reference will gain useful knowledge of what travelers should and shouldn't do when in countries outside of the United States. After a general introduction, approximately 100 alphabetically arranged entries cover topics such as greeting and meeting, appearance and dress, table manners, body language, social situations and hospitality, verbal communications, business etiquette, religious etiquette, gift-giving, and even "netiquette" regarding social media. Sidebars and images throughout make the text more accessible and engaging, and additional readings at the end of each entry as well as the bibliography offer opportunities for further research on the subject. The content also directly supports the National Geography Standards and the AP Human Geography curriculum for high school students as they learn about the cultural differences and characteristics of people in major ethnic groups across the globe.

Lives in Transition Bloomsbury Publishing

For over 1500 years before the Empire Windrush docked on British shores, people of African descent have played a significant and far-ranging role in the country's history, from the African soldiers on Hadrian's Wall to the Black British intellectuals who made London a hub of radical, Pan-African ideas. But while there has been a growing interest in this history, there has been little recognition of the sheer breadth and diversity of the Black British experience, until now. This collection combines the latest work from both established and emerging scholars of Black British history. It spans the centuries from the first Black Britons to the latest African migrants, covering everything from Africans in Tudor England to the movement for reparations, and the never ending struggles against racism in between. An invaluable resource for both future scholarship and those looking for a useful introduction to Black British history, *Black British History: New Perspectives* has the potential to transform our understanding of Britain, and of its place in the world.

Transforming America [3 volumes] CQ Press

It was November 1806. The explorers had gone without food for one day, then two. Their leader, not yet thirty, drove on, determined to ascend the great mountain. Waist deep in snow, he reluctantly turned back. But Zebulon Pike had not been defeated. His name remained on the unclimbed peak—and new adventures lay ahead of him and his republic. In *Citizen Explorer*, historian Jared Orsi provides the first modern biography of this soldier and explorer, who rivaled contemporaries Meriwether Lewis and William Clark. Born in 1779, Pike joined the army and served in frontier posts in the Ohio River valley before embarking on a series of astonishing expeditions. He sought the headwaters of the Mississippi and later the sources of the Arkansas and Red Rivers, which led him to Pike's Peak and capture by Spanish forces. Along the way, he met Aaron Burr and General James Wilkinson; Auguste and Pierre Couteau, patriarchs of St. Louis's most powerful fur-trading family, who sought to make themselves indispensable to Jefferson's administration; as well as British fur-traders, Native Americans, and officers of the Spanish empire, all of whom resisted the expansion of the United States. Through Pike's life, Orsi examines how American nationalism thinned as it stretched west, from the Jeffersonian idealism on the Atlantic to a practical, materialist sensibility on the frontier. Surveying and gathering data, Pike sought to incorporate these distant territories into

the republic, to overlay the west with the American map grid; yet he became increasingly dependent for survival on people who had no attachment to the nation he served. He eventually died in that service, in a victorious battle in the War of 1812. Written from an environmental perspective, rich in cultural and political context, *Citizen Explorer* is a state-of-the-art biography of a remarkable man.

The African Union (AU) is a continental organization that comprises every African state except for Morocco, is indeed a pioneering undertaking. Its ambitious aim is to integrate all member states, with the ultimate goal of forming the United States of Africa. Despite several attempts to build a union, the AU has remained an intergovernmental organization, one reason being a perceived unwillingness of the AU states to pool their national sovereignties. This study seeks to comprehend why Africa's integration process has not moved towards a supranational organization, using a novel approach. It shifts the usual perspective away from the organization level and provides the first comprehensive and systematic analysis of the AU from the perspective of the states themselves. It includes 8 comprehensive case studies: Algeria, Burkina Faso, Ethiopia, Mauritius, South African, Swaziland, Uganda and Zimbabwe to help understand their foreign policy and provide key insights into why they are (un)willing to yield sovereignty. This work will be of great interest to students and scholars of African politics, international relations and international organizations.

Genesis for Ordinary People, Second Edition Clio in Hamburg

Greek Tragic Women on Shakespearean Stages argues that ancient Greek plays exerted a powerful and uncharted influence on early modern England's dramatic landscape. Drawing on original research to challenge longstanding assumptions about Greek texts' invisibility, the book shows not only that the plays were more prominent than we have believed, but that early modern readers and audiences responded powerfully to specific plays and themes. The Greek plays most popular in the period were not male-centered dramas such as Sophocles' *Oedipus*, but tragedies by Euripides that focused on raging bereaved mothers and sacrificial virgin daughters, especially *Hecuba* and *Iphigenia*. Because tragedy was firmly linked with its Greek origin in the period's writings, these iconic female figures acquired a privileged status as synecdoches for the tragic theater and its ability to conjure sympathetic emotions in audiences. When Hamlet reflects on the moving power of tragic performance, he turns to the most prominent of these figures: 'What's *Hecuba* to him, or he to *Hecuba*/ That he should weep for her?' Through readings of plays by Shakespeare and his contemporary dramatists, this book argues that newly visible Greek plays, identified with the origins of theatrical performance and represented by passionate female figures, challenged early modern writers to reimagine the affective possibilities of tragedy, comedy, and the emerging genre of tragicomedy.

A Best Book of the Year: Mother Jones • Bloomberg News • National Post • Kirkus In these pages, Nicholas Basbanes—the consummate bibliophile's bibliophile—shows how paper has been civilization's constant companion. It preserves our history and gives record to our very finest literary, cultural, and scientific accomplishments. Since its invention in China nearly two millennia

ago, the technology of paper has spread throughout the inhabited world. With deep knowledge and care, Basbanes traces paper's trail from the earliest handmade sheets to the modern-day mills. Paper, yoked to politics, has played a crucial role in the unfolding of landmark events, from the American Revolution to Daniel Ellsberg's Pentagon Papers to the aftermath of 9/11. Without paper, modern hygienic practice would be unimaginable; as currency, people will do almost anything to possess it; and, as a tool of expression, it is inextricable from human culture. Lavishly researched, compellingly written, this masterful guide illuminates paper's endless possibilities.

The environmental histories of the Arctic and Antarctica are characterised by contrast and contradiction. These are places that have witnessed some of the worst environmental degradation in recent history. But they are also the locations of some of the most farsighted measures of environmental protection. They are places where people have sought to conquer nature through exploration and economic development, but in many ways they remain wild and untamed. They are the coldest places on Earth, yet have come to occupy an important role in the science and politics of global warming. Despite being located at opposite ends of the planet and being significantly different in many ways, Adrian Howkins argues that the environmental histories of the Arctic and Antarctica share much in common and have often been closely connected. This book also argues that the Polar Regions are strongly linked to the rest of the world, both through physical processes and through intellectual and political themes. As places of inherent contradiction, the Polar Regions have much to contribute to the way we think about environmental history and the environment more generally.

This book is a unique contribution to the study of children's and youth ministry, displaying the rich theological thinking that is developing amongst Australian evangelical scholars. Many of the writers have previously presented at the Youthworks "House" conference, which promotes "theological reflection for best practice in youth and children's ministry in a community of youth and children's ministers." The themes explored in this book are vitally important to pastors seeking to nurture young people as disciples of Jesus. Thirteen evangelical scholars answer questions such as: How can biblical theology shape a young person's view of themselves? What is the biblical definition of church and how does this shape our understanding of intergenerational gatherings, family, and community? How should young Christians interact with the culture around them? And how do biblical teachings on sin, grace, and wisdom provide young people with the resources to live in today's world? You will be challenged to reconsider how theology and exegetical study of the Bible can mold your priorities, principles, and presumptions as you exercise ministry to and with young people.

Etiquette and Taboos around the World University of Missouri Press

Many new states entered the United States around 200 years ago, but only Missouri almost killed the nation it was trying to join. When the House of Representatives passed the Tallmadge Amendment banning slavery from the prospective new state in February 1819, it set off a two-year political crisis in which growing northern antislavery sentiment confronted the aggressive westward expansion of the peculiar institution by southerners. The Missouri Crisis divided the U.S. into slave

and free states for the first time and crystallized many of the arguments and conflicts that would later be settled violently during the Civil War. The episode was, as Thomas Jefferson put it, “a fire bell in the night” that terrified him as the possible “knell of the Union.” Drawn from the of participants in two landmark conferences held at the University of Missouri and the City University of New York, those who contributed original essays to this second of two volumes—a group that includes young scholars and foremost authorities in the field—answer the Missouri “Question,” in bold fashion, challenging assumptions both old and new in the long historiography by approaching the event on its own terms, rather than as the inevitable sequel of the flawed founding of the republic or a prequel to its near destruction. This second volume of *A Fire Bell in the Past* features a foreword by Daive Dunkley. Contributors include Dianne Mutti Burke, Christopher Childers, Edward P. Green, Zachary Dowdle, David J. Gary, Peter Kastor, Miriam Liebman, Matthew Mason, Kate Masur, Mike McManus, Richard Newman, and Nicholas Wood.

Collective histories and broad social change are informed by the ways in which personal lives unfold. *Lives in Transition* examines individual experiences within such collective histories during the nineteenth and twentieth centuries. This collection brings together sources from Europe, North America, and Australia in order to advance the field of quantitative longitudinal historical research. The essays examine the lives and movements of various populations over time that were important for Europe and its overseas settlements - including the experience of convicts transported to Australia and Scots who moved freely to New Zealand. The micro-level roots of economic change and social mobility of settler society are analyzed through populations studies of Chicago, Montreal, as well as rural communities in Canada and the United States. Several studies also explore ethnic inequality as experienced by Polish immigrants, French-Canadians, and Aboriginal peoples in Canada. *Lives in Transition* demonstrates how the analysis of collective experience through both individual-level and large-scale data at different moments in history opens up important avenues for social science and historical research. Contributors include Luiza Antonie (Guelph), Peter Baskerville (Alberta), Kandace Bogaert (McMaster), John Cranfield (Guelph), Gordon Darroch (York), Allegra Fryxell (Cambridge), Ann Herring (McMaster), Kris Inwood (Guelph), Rebecca Kippen (Melbourne), Rebecca Lenihan (Guelph), Susan Hautaniemi Leonard (Michigan), Hamish Maxwell-Stewart (Tasmania), Janet McCalman (Melbourne), Evan Roberts (Minnesota), J. The Indus civilization was one of the earliest civilizations of the ancient world. At its peak, it was more than ten times larger than Egypt and Mesopotamia combined and three times their population. Yet it remains a riddle of prehistory. Its script is the last great script to remain undeciphered. This concordance is an attempt to make the corpus of Indus inscriptions organized and searchable in a digital format. It covers 3,649 objects with 5,037 inscriptions from across 40 Indus sites. At more than 10,000 pages, it is a comprehensive reference for the domain. It allows the reader to efficiently search and navigate the corpus by location, object types, and writing direction. It is the only resource that allows you to search the collection by letters, words, and patronymics. In order to help the first-time reader, the Introduction provides a background of the Indus civilization and its script. It presents a unique analysis of the typography of the Indus seals and compares it to modern fonts. It systematically analyzes the script down into constituent forms and links to resources for a Unicode encoding and an open-source font for the script. The book itself serves as an example of those resources. This concordance is based on a complete decipherment of the Indus script that I will publish separately. It leverages that to identify characters and words and present a consistent and complete coverage of the inscriptions.

Aesthetics of Music: Musicological Approaches is an anthology of fourteen essays, each addressing a single key concept or pair of terms in the aesthetics of music, collectively serving as an authoritative work on musical aesthetics that remains as close to 'the music' as possible. Each essay includes musical examples from works in the 18th, 19th, and into the 20th century. Topics have been selected from amongst widely recognised central issues in musical aesthetics, as well as those that have been somewhat neglected, to create a collection that covers a distinctive range of ideas. All essays cover historical origins, sources, and developments of the chosen idea, survey important musicological approaches, and offer new critical angles or musical case studies in interpretation.

Covering wars and conflicts of Afghanistan from the modern founding of the country in the 1700s to the contemporary struggle with the Taliban, this single-volume reference analyzes the causes and results of Afghanistan's wars and examines leading political and military figures, weapons, and tactics. Afghanistan has been embroiled in war and conflict throughout the latter part of the 20th century as well as the current millennium, but due to its location at the crossroads of Central Asia,

Afghanistan has also endured repeated conquests throughout its turbulent earlier times. Examining Afghanistan's long military history through this book will enable readers to grasp the wider sociopolitical history of the country; appreciate the impact of these wars on Southwest Asia and superpowers such as Great Britain, the Soviet Union, and the United States; and understand why Afghanistan remains a controversial battleground today. The alphabetically organized entries examine the major wars and conflicts of Afghanistan from the modern founding of the country during the Durrani Dynasty in the 1700s through the contemporary struggle with the Taliban. The book spotlights the role of key individuals in starting, pursuing, or ending conflicts, as well as their broader contributions to—or negative impact on—Afghanistan and the international arena. The work also presents essays that examine key subtopics such as weapons, tactics, ethnic groups, religion, and foreign relations. This allows the reader—whether a student, scholar, or member of a nonacademic audience—to examine a topic in depth and see how the event, figure, or movement fits into the broader history of Afghanistan.
