In this book leading scholars from every relevant field report on all aspects of compositionality, the notion that the meaning of an expression can be derived from its parts. Understanding how compositionality works is a central element of syntactic and semantic analysis and a challenge for models of cognition. It is a key concept in linguistics and philosophy and in the cognitive sciences more generally, and is without question one of the most exciting fields in the study of language and mind. The authors of this book report critically on lines of research in different disciplines, revealing the connections between them and highlighting current problems and opportunities. The force and justification of compositionality have long been contentious. First proposed by Frege as the notion that the meaning of an expression is generally determined by the meaning and syntax of its components, it has since been deployed as a constraint on the relation between theories of syntax and semantics, as a means of analysis, and more recently as underlying the structures of representational systems, such as computer programs and neural architectures. The Oxford Handbook of Compositionality explores these and many other dimensions of this challenging field. It will appeal to researchers and advanced students in linguistics and philosophy and to everyone concerned with the study of language and cognition including those working in neuroscience, computational science, and bio-informatics.

This note analyzes the trajectory of the benchmark and its implications for the effort required of countries to remain on-track or get on-track toward achieving the goals and targets of the Malabo Declaration by 2025. It also analyzes the change in the overall score obtained by different countries between the 2018 and 2020 BRs by decomposing the contribution of different indicators to the change. This helps to explain why fewer countries were on-track in the 2020 BR compared to the 2018 BR. The note concludes with a look at the potential challenges countries may face, most notably those brought on by the COVID-19 pandemic, and prospects for them to remain or get on-track in future BRs.

Morgen war Krieg Poems on the Theme of Change Environmental Change and the World's Futures Climate change and ecological instability have the potential to disrupt human societies and their futures. Cultural, social and ethical life in all societies is directed towards a future that can never be observed, and never be directly acted upon, and yet is always interacting with us. Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience. The three key ideas of this book – ecologies, ontologies and mythologies – help us understand the ways people in many different societies attempt to predict and shape their futures. Each chapter places a different emphasis on the linked domains of environmental change, embodied experience, myth and fantasy, politics, technology and intellectual reflection, in relation to imagined futures. The diverse geographic scope of the chapters includes rural Nepal, the islands of the Pacific Ocean, Sweden, coastal Scotland, North America, and remote, rural and urban Australia. This book will appeal to researchers and students in anthropology, sociology, environmental studies, cultural studies, psychology and politics.

This book presents case studies of South Asian companies that have strategic business implications, highlighting the complex interplay of business and social dynamics in South Asia. This region is a wide agglomeration of very different countries that share somewhat common cultures and issues and yet it is torn apart by religion and politics. There is an abundance of local entrepreneurship but a widespread institutional void. The book investigates how local companies survive and thrive in this environment and discusses those companies that have withstood the competitive pressure of MNCs, depicting their management and business practices. In today's world, where multinationals are so omnipresent that their management and business practices are considered as the de facto recipe for success, there is a need to have an alternative view that challenges the ubiquitousness of multinational management practices. The case studies in this book focus on the business and management practices of local organizations in South Asia and thus provide that alternative viewpoint of how to achieve success in South Asia. Exposing readers to a local perspective on doing business in South Asia, it is a valuable resource for students and practitioners of management.

This book looks at the potential of sport to contribute to wide-ranging development outcomes, which have been recognized across international policy declarations, most significantly in the 2030 UN Agenda for Sustainable Development. It provides a theoretical approach to sport and development. It begins by addressing the basic concepts of sport development and sustainability and then discusses the potential contribution of sport to five prioritized SDGs (SDGs 3, 4, 5, 8 and 16) and the environment as one of the sustainable development pillars that may contribute to SDGs 6, 7, 11, 12, 13, 14 and 15. This academic resource provides a macro view to students and researchers of sports sciences to know more about the fundamental concepts of sustainable development goals, and to enhance their knowledge about sport as a conduit that can help achieve wider development outcomes rather than being an end in itself. This book is of interest to students and researchers of sports studies, from sociology to management, and researchers and policy makers interested in sport and sustainable development.

Beethoven wrote 32 sonatas for piano. The final installment, Volume 4, edited by Stewart Gordon, contains Sonatas 25-32, written between 1809 and 1822 and published shortly thereafter. Of the eight sonatas in this volume, autographs exist in whole or in part for all but Op. 106, missing since World War II. This edition is based on the existing autographs and the first editions. Dr. Gordon discusses a variety of topics including Beethoven's life; the pianos of his time and their limitations; Beethoven's use of articulation, ornamentation, tempi; and the age-old challenge of attempting to determine the definitive interpretation of Beethoven's music. Valuable performance recommendations, helpful fingering suggestions and ornament realizations are offered in this comprehensive critical body of Beethoven's sonatas. Where performance options are open to interpretation, other editors' conclusions are noted, enabling students and teachers to make informed performance decisions. Titles: * Op. 79 ("Sonatine") * Op. 81a * Op. 90 * Op. 101 * Op. 106 ("Hammer-Klavier") * Op. 109 * Op. 110 * Op. 111

Organizing Inclusion brings communication experts together to examine issues of inclusion and exclusion, which have emerged as a major challenge as both society and the workforce become more diverse. Connecting communication theories to diversity and inclusion, and clarifying that inclusion is about the communication processes of organizations, institutions, and communities, the book explores how communication as an organizing phenomenon underlies systemic and institutionalized biases and generates practices that privilege certain groups while excluding or marginalizing others. Bringing a global perspective that transcends particular problems faced by Western cultures, the contributors address issues across sub-disciplines of communication studies, ranging from social and environmental activism to problems of race, gender, sexual orientation, age and ability. With these various perspectives, the chapters go beyond demographic diversity by addressing interaction and structural processes that can be used to promote inclusion. Using these multiple theoretical frameworks, Organizing Inclusion is an intellectual resource for improving theoretical understanding and practical applications that come with ever more diverse people working, coordinating, and engaging one another. The book will be of great relevance to organizational stakeholders, human resource personnel and policy makers, as well as to scholars and students working in the fields of communication, management, and organization studies.
