Unequal health
Chandresh Agrawal
The Oxford Textbook of
Palliative Nursing
remains the most
comprehensive treatise
on the art and science

of palliative care
nursing available. Dr.
Betty Rolling Ferrell
and Dr. Judith A. Paice
have invited 162
nursing experts to
contribute 76 chapters
addressing the
physical, psychological,
social, and spiritual
needs pertinent to the

successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for

specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

 A global perspective on
 the management and
 prevention of emerging
 and re-emerging
 diseases Emerging
 infectious diseases are
 newly identified or
 otherwise previously
 unknown infections
 that cause public
 health challenges. Re-

emerging infectious
 diseases are due to
 both the reappearance
 of and an increase in
 the number of
 infections from a
 disease that is known,
 but which had formerly
 caused so few
 infections that it was no
 longer considered a
 public health problem.
 The factors that cause
 the emergence or re-
 emergence of a
 disease are diverse.
 This book takes a look
 at the world's
 emerging and re-
 emerging diseases. It
 covers the diagnosis,
 therapy, prevention,
 and control of a variety
 of individual diseases,
 and examines the
 social and behavioral
 issues that could
 contribute to
 epidemics. Each
 chapter focuses on an
 individual disease and
 provides scientific

background and social history as well as the current basics of infection, epidemiology, and control. Emerging Epidemics: Management and Control offers five topics of coverage: FUNDAMENTALS Epidemics fundamentals Disasters and epidemics Biosafety RE-EMERGING EPIDEMICS Tuberculosis Plague NEWLY EMERGING EPIDEMICS Leptospirosis Dengue Japanese Encephalitis Chikungunya Fever West Nile Virus Chandipura Virus Encephalitis Kyasanur Forest Disease Hantavirus Human, Avian, and Swine Influenza Severe Acute Respiratory Syndrome Nipah Virus Paragonimiasis Melioidosis POTENTIAL

EPIDEMICS Biowarfare and bioterrorism Food contamination and food terrorism Antimicrobial resistance VECTOR CONTROL METHODS Mosquito control Other disease vectors and their control Offering an integrated, worldwide overview of the complexity of the epidemiology of infections, Emerging Epidemics will be a valuable resource for students, physicians, and scientists working in veterinary, medical, and the pharmaceutical sciences.

City of Remembering Harper Collins

As half-angel Willow strives to save the world from her parasitic otherworldly kin, romance and tension heat up to a

climactic finale. In the devastated remains of the world, millions of people live in "Edens" provided by the angels who have all but enslaved humanity. As the angelic stranglehold on humanity tightens, Willow and Alex are recruiting and training new Angel Killers while struggling to hold ground on the celestial battlefield. Willow continues to struggle with feelings for Seb, and her love and resolve are tested as a shattering revelation sends Alex on a separate journey. Now that the final battle versus the angels is about to begin — and the fate of the world hangs in the balance — each of them must face the consequences of their own choices. Will love endure? Will

the human race survive?

This book provides
insight into the
instances in which
wildlife species can
create problems. Some
species trigger
problems for human
activities, but many
others need humans to
save them and to
continue to exist. The
text addresses issues
faced by economists
and politicians dealing
with laws involving
actions undertaken to
resolve the problems of
the interaction
between humans and
wildlife. Here, the
words 'problematic
species' are used in
their broadest sense,
as may be appreciated
in the short
introductions to the

various sections. At times, the authors discuss special cases while always extending the discussion into a more general and broad vision. At others, they present real cutting-edge analysis of ecological topics and issues. The book will be of interest to biologists, ecologists and wildlife managers involved in research on wildlife, parks, and environmental management, as well as to government departments and agencies, NGOs and conservation wildlife organizations. Even those in contact with nature, such as hunters, herders, and farmers, will be able to find a great deal of important information. Specific case studies are selected from among the most

significant and prevalent cases throughout the world. A total of 26 papers have been selected for this book, written by zoologists, biologists and ecologists. Many have an interdisciplinary approach, with contributions by economists, criminologists, technical specialists, and engineers. *Come Hell or High Fever* Atlantis Rising magazine Refuge in a Moving World draws together more than thirty contributions from multiple disciplines and fields of research and practice to discuss different ways of engaging with, and responding to, migration and displacement. The volume combines

critical reflections on the complexities of conceptualizing processes and experiences of (forced) migration, with detailed analyses of these experiences in contemporary and historical settings from around the world. Through interdisciplinary approaches and methodologies - including participatory research, poetic and spatial interventions, ethnography, theatre, discourse analysis and visual methods - the volume documents the complexities of refugees' and migrants' journeys. This includes a particular focus on how people inhabit and negotiate everyday life in cities, towns, camps and informal settlements across the

Middle East and North Africa, Southern and Eastern Africa, and Europe.

The Korean Wave

Policy Press

The book tells the story of a boy who wanted to make friends but could not because of his way of being and the incorrect ways of relating to his colleagues. One day, he magically met the A to Z Friends Club, which showed him how to develop and maintain lasting friendships. From then on, he knew the value and happiness of having friends.

Angel Burn McFarland Spring 2012 saw the return to creative and critical success of Joss Whedon, with the release of both his horror flick *The Cabin in the Woods* and the box-office sensation,

Marvel's *The Avengers*. After establishing himself as a premier cult creator, the man who gave us great television with *Buffy the Vampire Slayer*, *Angel*, *Firefly*, *Dollhouse* and web series *Dr Horrible's Sing-along Blog*, as well as comic books including *Fray* and *Astonishing X-Men*, finally became the filmmaker he'd long dreamed of being. Drawing on a wide variety of sources and making use of psychologist Howard Gruber's insights into the nature of the creative process, Joss, *A Creative Portrait* offers the first intellectual biography of Whedon, tracking his career arc from activated fan boy to film studies major, third generation

television writer, successful script doctor, innovative television auteur, beloved cult icon, sought-after collaborator, and major filmmaker with *Marvel's The Avengers*. Film and television scholar and Whedon expert David Lavery traces Whedon's multi-faceted magic from its source - the early influences of parents and teachers, comics, books, movies, collaborators - to its artistic incarnation. *Hüter der Dämmerung* UCL Press

Health inequalities are the most important inequalities of all. In the US and the UK these inequalities have now reached an extent not seen for over a century. Most people's health is much better now than then, but the

gaps in life expectancy between regions, between cities, and between neighbourhoods within cities now surpass the worst measures over the last hundred years. In almost all other affluent countries, inequalities in health are lower and people live longer. In his new book, academic and writer Danny Dorling describes the current extent of inequalities in health as the scandal of our times. He provides nine new chapters and updates a wide selection of his highly influential writings on health, including international-peer reviewed studies, annotated lectures, newspaper articles, and interview transcripts, to create an accessible collection that is both

contemporary and authoritative. As a whole the book shows conclusively that inequalities in health are the scandal of our times in the most unequal of rich nations and calls for immediate action to reduce these inequalities in the near future.

Springer

The first digital-only ebook taster of Unequal health: The scandal of our times by Danny Dorling. Competitively priced, it gives a flavour of one of the major themes: public health and contains three chapters from the

book, preceded by an all-new introduction specially written by Danny Dorling. This "must-read" will introduce an even wider readership to his work.

Burying the Sun

Frontiers Media SA

Travel to exotic places is fascinating, and equally so are infections and other dangers of exotic travel. Moreover, one need not be traveling to suffer these maladies; sometimes they travel to you. The enormous global mobility demands a public health response. The result is the concept of 'travel medicine' as a separate discipline. This book describes the evolution of travel medicine, travel vaccines, malaria prophylaxis and

infections of adventure and leisure. This book is unique and different to the standard textbooks on travel medicine. It provides rare insights into many of the behind-the-scenes in travel medicine, personal stories of failures and successes of travel medicine practitioners, the 'real life' tales that unravel the science behind travel medicine. We believe that the best lessons are learned from personal stories. Not every travel is fun. Some travel is for a cause, be it religious or humanitarian, or be it to escape certain political systems. We have added stories on the tragedies of so-called 'undocumented refugees', and stories written by colleagues who were involved in

humanitarian care. Pilgrimages attract large number of 'travelers' and yet we know so little about these pilgrimages. Chapters on the Muslim, Hindu, Buddhist, and Christian pilgrimages aim to correct this. Diseases also travel. The spread of global diseases and pandemics is fascinating. This book provides an overview of the pandemics, in particular that of cholera, yellow fever, severe acute respiratory syndrome and influenza. Globalization, migration and health lead to a history of disease and disparity in the global village - our world. And what about the revised International Health Regulations- what do we need to know about

them in the context of travel medicine? In the next millennium, our world will have inherited further global movement. It may even include travel to aerospace. The 'Epilogue' awakes some of our old dreams - the last frontier, space travel... Annelies Wilder-Smith has lived in China, Papua New Guinea, Nepal, New Zealand, and Switzerland. She is currently based in Singapore from where she continues to travel extensively throughout Asia. She is the Head of the Travellers Health ' Vaccination Centre in Singapore, one of the largest travel clinics in Asia. She was in a unique position to do research on W135 meningococcal disease in Hajj pilgrims during the outbreak. She

'lived through' the SARS epidemic in Singapore. Eli Schwartz is the Director of the Center for Geographic Medicine and Tropical Diseases at Sheba Medical Center, Tel-Aviv University, Israel. Eli is a 'real' tropical medicine specialist. He obtained all his experience in the field, including Nepal, Tibet, and numerous adventure travels to Africa where he prefers to do his studies on the sides of the Omo River. Marc Shaw is a passionate traveler, doctor, actor and observer of fine humor. His favorite pastime is to be an expedition doctor. This has taken him to exotic places such as Namibia, Mongolia, Pitcairn Islands, and to the Amazon. He is the Director of

WORLDWIDE

Travellers' Health Centres in New Zealand.

Dark Nights - Ewiges Begehren TAN Books

The war is on. The Devil plots to defeat you. Meet some battle-tested warriors who fight at your side.

Satan is real. He's a formidable foe who wants to snatch us away from God, and the thought of doing battle with him can seem daunting. Even so, the saints who have gone before us have engaged the Devil, armed with the power of Christ ... and emerged victorious!

These fellow warriors in heaven now fight on our behalf. In *Saints Who Battled Satan*, Paul Thigpen, author of *Manual for Spiritual Warfare*, details the heroic combat of 17

saints who defeated the Enemy. In *Saints Who Battled Satan*, discover: How Satan attacks us through extraordinary assaults and everyday temptations. How these 17 saints used prayer, Scripture, the sacraments, and other spiritual weapons against the Enemy. How the virtues served these saints as combat armor. How these victorious saints now offer their aid to those of us still battling on earth. Read the inspiring and triumphant stories of Padre Pio, Francis of Assisi, Catherine of Siena, Teresa of Avila, John Vianney, and a dozen other saints who battled Satan. You'll find the strength, the courage, and the faith to win your own war against the Enemy.
