Business Ethics provides a thorough review and analysis of business ethics issues using several learning tools: Strategic Stakeholder Management as the Theme: All chapters use a strategic stakeholder approach as a unifying theme. The text is thus the first text that adopts this approach. Most business ethics scholars and practitioners agree that successful ethical companies are the ones that can strategically balance the needs of their various stakeholders. By adopting this approach, students will be able to see how the various aspects of business ethics are connected. Theory-based and Application-based: All chapters have important applicable theories integrated with discussion of how such theories apply in practice. Unlike other texts that are either too theoretical or too practical, this text provides the appropriate blend of theory and practice to provide deeper insights into the concepts covered in the chapter. Global Perspective: Unless most other texts, this text provides a global perspective on business ethics. Most chapters include material pertaining to ethics in global contexts. Included are cases about companies in a wide range of countries including Japan, U.K., China and India among many others. Cases: The text contains over 30 real world global cases. Each chapter ends with a short two page case as well as a longer case that varies in length. Each has discussions questions at the end. Finally each of the four parts ends with a Comprehensive Case; proven teaching cases from The Ivey School and other sources.

Ethics in the First Person Rowman & Littlefield

The Political Economy of Business Ethics in East Asia: A Historical and Comparative Perspective deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia, from the periods of the fourteenth century, to the modern era. Authors in this volume ask how, and why, governments in pre-modern Joseon Korea, modern Korea, and modern Japan used moral persuasion of different kinds in designing national economic institutions. Case studies demonstrate that the concept of modes of exchange first developed by John Lie (1992) provides a more convincing explanation on the evolution of pre-modern and modern economic institutions compared with Marx's modes of production as historically-specific social relations, or Smith's free market as a terminal stage of human economic development. The pre-modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history. Furthermore, business ethics or corporate social responsibility is not a purely European economic ideology because manorial, market, entrepreneurial, and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange. In a similar vein, the domination of the market and entrepreneurial modes in the twenty-first century world is also complemented by other competing modes of change, such as state welfarism, public sector economies, and protectionism. Compares Chinese, Japanese, and Korean business ethics from a comparative and historical context Explores recent theoretical approaches to capitalist development in modern history in non-Western regions Discusses the theoretical usefulness of new institutionalism, modes of exchange, and neoclassical discussions of business ethics Evaluates historical texts in their own languages in its attempt to compare Chinese, Japanese, and Korean business ethics in the pre-modern and modern times

The recent turbulences that led to a global financial crisis have partially been triggered by immoral and egoistic behaviour. In the wake of the disaster many have asked, and keep asking, how a sustainable and socially fair economy can be build. Ethics is one of the cornerstones of human interaction in general and in economic interaction. This study has been inspired by the question: How can unethical behaviour be avoided? This book deals with the question of how ethics in general can be improved. In today's business world Business Ethical Codes of Conduct (BECC), or more commonly called honour codes, have reached some prominence. Utilizing questionnaires and moral dilemmas this study attempts to answer the question: How efficient are codes of conduct? The study arrives at surprising insights into the impact of priming-effects on morale and shows that the mere exposure to ethical questions influences how we behave.

The key to teaching business ethics successfully, says Sims, is to start with clear goals and a sensible expectation of outcomes, and with a true knowledge and appreciation of how people actually learn. Seems obvious enough, he says, but the surprise is that so few understand this. Thus, the teaching of business ethics is often an unproductive, frustrating exercise in futility. Sims hopes to change that. Proceeding with the conviction that open communications between teacher and student before, during, and after the teaching experience is vital, Sims identifies key teaching processes, gives practical advice on designing and planning the curriculum, and offers guidance on how to develop a climate conducive to effective learning. He highlights the importance of creating a classroom climate that encourages open dialogue, good moral conversation, and conversational learning. And throughout he emphasizes that learning styles and experiential learning theory are cornerstones of teaching business ethics, thus taking an approach unlike any in the literature. An important guide for those who are new to teaching this essential subject, Sims' book will also be helpful for more experienced teachers who are wondering why their own methods do not always work, or do not work as well as they believe they should. Sims identifies important processes that must be managed if business ethics is to be taught and learned successfully—processes such as creating stakeholder commitment to the goals, purposes, and outcomes of the teaching effort, and curriculum design and planning that are attuned to individual differences in learning styles, motivation, and values. Also included in Sims' processes are the development of individual school outcomes, and expectations, and the assessment procedures that can measure them. He discusses the importance of incorporating debriefing into an experiential learning exercise or discussion, and goes on to give an in-depth discussion of the pedagogical approaches that allow teachers to teach the practical and theoretical components of the subject simultaneously. Well illustrated with examples, such as an interdisciplinary approach to teaching and a way to institutionalize outcomes assessment by means of total quality management, Sims' book returns constantly to his major theme: that to teach business ethics effectively the teacher must first create a climate of trust and sharing within and between students, and between students and teacher, and that the teacher must have a concrete way to measure the impact of the teaching effort's results.
