AUBREE MELENDEZ

The Handbook of Deviance Routledge

This book incorporates many of the exciting debates in the social sciences and philosophy of knowledge concerning the issues of modernity and post-modernism. It sets out a new project for criminology, a criminology of modernity, and offers a sustained critique of theorizing without a concern for social totalities. This book is designed to place criminological theory at the cutting edge of contemporary debates. Wayne Morrison reviews the history and present state of criminology and identifies a range of social problems and large scale social processes which must be addressed if the subject is to attain intellectual commitment. This

book marks a new development in criminological texts and will serve a valuable function not only for students and academics but for all those interested in the project of understanding crime in contemporary conditions.

An Introduction to Criminological Theory Routledge

Postmodernism and Popular Culture brings together eleven recent essays by Angela McRobbie in a collection which deals with the issues which have dominated cultural studies over the last ten years. A key theme is the notion of postmodernity as a space for social change and political potential. McRobbie explores everyday life as a site of immense social and psychic complexity to which she argues that cultural studies scholars must return through ethnic and empirical work; the sound of living voices and spoken language. She also argues for feminists working in the field to continue to question the place and meaning of feminist

theory in a postmodern society. In addition, she examines the new youth cultures as images of social change and signs of profound social transformation. Bringing together complex ideas about cultural studies today in a lively and accessible format, Angela McRobbie's new collection will be of immense value to all teachers and students of the subject.

The Media Routledge

In a world in which media images of crime and deviance proliferate, where every facet of offending is reflected in a 'vast hall of mirrors', *Framing Crime: Cultural Criminology and the Image* makes sense of the increasingly blurred line between the real and the virtual. Images of crime and crime control have become almost as 'real' as crime and criminal justice itself. The meaning of both crime and crime control now resides, not solely in the essential – and essentially false – factuality of crime rates or arrest records, but also in the contested processes of symbolic display, cultural interpretation, and representational negotiation. It is essential, then, that criminologists are closely attuned to the various ways in which crime is imagined, constructed and framed within modern society. *Framing Crime* responds to this demand with a collection of papers aimed at helping the reader to understand the ways in which the contemporary 'story of crime' is constructed and promulgated through the image. It also provides the relevant analytical and research tools to unearth the hidden social and ideological concerns that frequently underpin images of crime, violence and transgression. *Framing Crime* will be of interest to students and academics in the fields of criminology, crime and the media, and sociology.

Environmental Risks and the Media Routledge

This 1999 book presents exciting perspectives on risk combining empirical analyses with metatheoretical critiques from leading social scientists.

Crime, Justice and the Media CRC Press

This volume presents the rich and provocative historical, theoretical, methodological, and applied developments within affirmative postmodern and post-structural criminology. This includes the evolution of thought that embraces the "linguistic turn" in crime, law justice, and social change. Previously-published articles authored by key thinkers are included throughout the book's five substantive sections. Collectively, they represent important reflections on the current criminological landscape in which symbolic, linguistic, material, and cultural realms of analyses are featured.

Framing Crime Psychology Press

Pointing a critical spotlight on media constructions of crime, this text aims to develop our understanding of the relationship between crime and the media, as well as taking existing knowledge in new directions.

Theories of Crime Media and Crime

These original essays introduce students to the complex and influential field of critical criminology. It presents many of the theories of critical criminology – Marxist, Feminist, Left Realist, Postmodern, Constitutive, Peacemaking, and Restorative Justice – and explores how, despite their distinctions, each theory is rooted in radical criminology, and all are critical of mainstream criminology.

An Alliance of International Drug Cartels, Organized Crime, and Terror Groups Routledge

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, which broadened the debate on criminological theory, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, social control theories, the risk society. The new edition also features comprehensive coverage of recent developments in criminology, including situation action theory, desistance theory, peacemaking criminology, Loïc Wacquant's thesis of the penal society, critical race theory and Southern theory. This revised and expanded fourth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those

studying criminology.

The Terrorist-Criminal Nexus Routledge

In *Complexity and Postmodernism*, Paul Cilliers explores the idea of complexity in the light of contemporary perspectives from philosophy and science. Cilliers offers us a unique approach to understanding complexity and computational theory by integrating postmodern theory (like that of Derrida and Lyotard) into his discussion. *Complexity and Postmodernism* is an exciting and an original book that should be read by anyone interested in gaining a fresh understanding of complexity, postmodernism and connectionism.

Cultural Studies, Identity and Politics Between the Modern and the Post-modern Routledge

Soccer fandom has traditionally been seen as an important part of adolescent, generally male, identity making. In *Post-Fandom and the Millennial Blues*, Steve Redhead shows how this tradition of youth culture of fandom has been eroded in the last years of the twentieth century by the more fleeting, style conscious allegiances inspired by television, films and music. The clubs that young people follow are determined by advertising and popular music; the games that they watch are brought to them by the globalized culture of television, as in the world cup staged in America; even their fears of so-called soccer hooliganism are determined by media-engendered moral panics at a time when the phenomenon itself seems to be dying away.

Media and Crime John Wiley & Sons

Cultural criminology has now emerged as a distinct theoretical perspective, and as a notable intellectual alternative to certain aspects of contemporary criminology. Cultural criminology

attempts to theorize the interplay of cultural processes, media practices, and crime; the emotional and embodied dimensions of crime and victimization; the particular characteristics of crime within late modern/late capitalist culture; and the role of criminology itself in constructing the reality of crime. In this sense cultural criminology not only offers innovative theoretical models for making sense of crime, criminality, and crime control, but presents as well a critical theory of criminology as a field of study. This collection is designed to highlight each of these dimensions of cultural criminology - its theoretical foundations, its current theoretical trajectories, and its broader theoretical critiques-by presenting the best of cultural criminological work from the United States, Europe, Australia, and elsewhere.

Controversies in Critical Criminology Routledge

This new title will become the core book on cultural criminology. *Cultural Criminology Unleashed* brings together cutting-edge research across the range of meanings of the term 'cultural' - from anthropology to art, from media analyses to theories of situated meaning.

Post-Fandom and the Millennial Blues Routledge

As massively multiplayer online (MMO) games grow in scope and popularity, what are the characteristics of their emerging gaming culture? How is this culture shaped by the decisions made by game designers and the collective interpretations of a game's player base? In this book, Timothy Rowlands brings a diverse mix of ethnographic, semiotic, and analytical approaches to the virtual world of EverQuest. Through first-hand player experiences and interviews of other gamers, Rowlands analyzes a gaming environment that, as time goes on, looks less like leisure and

more like a workspace. This groundbreaking fusion of sociology and the world of MMOs is a must read for scholars and gamers alike.

Routledge Handbook of Deviant Behavior Routledge

In *Making Trouble* leading scholars in criminology, sociology, criminal justice, women's studies, and social history explore the mediated cultural dynamics that construct images and understanding of crime, deviance, and control. Contributors examine the intertwined practices of the mass media, criminal justice agencies, political power holders, and criminal and deviant subcultures in producing and consuming contested representations of legality and illegality. While the collection provides broad analysis of contemporary topics, it also weaves this analysis around a set of innovative and unifying themes. These include the emergence of "'situated media'" within and between the various subcultures of crime, deviance, and control; the evolution of policing and social control as complex webs of mediated and symbolic meaning; the role of power, identity, and indifference in framing contemporary crime controversies, with special attention paid to the gendered construction of crime, deviance and control; and the importance of historical and cross-cultural dynamics in shaping understandings of crime, deviance, and control.

Postmodernist and Post-Structuralist Theories of Crime Routledge

Crime and Criminal Justice provides students with a comprehensive and engaging introduction to the study of criminology by taking an interdisciplinary approach to explaining criminal behaviour and criminal justice. The book is divided into two parts, which address the two essential bases that form the

discipline of criminology. Part One describes, discusses and evaluates a range of theoretical approaches that have offered explanations for crime, drawing upon contributions from the disciplines of sociology, psychology, and biology. It then goes on to apply these theories to specific forms of criminality. Part Two offers an accessible but detailed review of the major philosophical aims and sociological theories of punishment, and examines the main areas of the contemporary criminal justice system – including the police, the courts and judiciary, prisons, and more recent approaches to punishment. Presenting a clear and thorough review of theoretical thinking on crime, and of the context and current workings of the criminal justice system, this book provides students with an excellent grounding in the study of criminology.

The politics of becoming adult Routledge

The Handbook of Deviance is a definitive reference for professionals, researchers, and students that provides a comprehensive and engaging introduction to the sociology of deviance. Composed of over 30 essays written by an international array of scholars and meticulously edited by one of the best known authorities on the study of deviance Features chapters on cutting-edge topics, such as terrorism and environmental degradation as forms of deviance Each chapter includes a critical review of what is known about the topic, the current status of the topic, and insights about the future of the topic Covers recent theoretical innovations in the field, including the distinction between positivist and constructionist perspectives on deviance, and the incorporation of physical appearance as a form of deviance

News, Gender and Power Routledge

Aimed at criminology students, this text focuses on the key issues associated with crime, social regulation and control, and social responsibility. It questions the clichés associated with public discussion of crime by acknowledging the common frameworks within which crime and criminality are explored.

Theoretical Criminology from Modernity to Post-Modernism Routledge

'Richly documented and convincingly presented' -- New Society
 Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the

British Academy.

Understanding Complex Systems Routledge

Media and CrimeSAGE

Law and Order in Contemporary American Politics Routledge

Debates about children's rights not only concern those things that children have a right to have and to do but also our broader social and political community, and the moral and political status of the child within it. This book examines children's rights and citizenship in the USA, UK and Australia and analyses the policy, law and sociology that govern the transition from childhood to adulthood. By examining existing debates on childhood

citizenship, the author pursues the claim that childhood is the most heavily governed period of a liberal individual's life, and argues that childhood is an intensely monitored period that involves a 'politics of becoming adult'. Drawing upon case studies from the USA, the UK and Australia, this concept is used to critically analyse debates and policy concerning children's citizenship, criminality, and sexuality. In doing so, the book seeks to uncover what informs and limits how we think about, talk about, and govern children's rights in liberal societies. This book will be of interest to students and scholars of political science, governance, social policy, ethics, politics of childhood and public policy.
