"Pinker has a lot of ideas  
and sometimes  
controversial opinions  
about writing and in this  
entertaining and  
instructive book he

rethinks the usage guide

blame the internet, he  
says, good writing has  
always been hard. It

**The Art of Writing About Art** Longman Publishing Group A little more than seventy-five years ago, Kate L. Turabian drafted a

set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and*

Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array

of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been

vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

The statement of purpose

is the most important part of an application to graduate school in the humanities, but applicants often struggle to write these documents. The SOP, as it is often called, is particularly difficult for students coming from outside of the United States because they do not understand the idiosyncratic conventions of the US academy. This guide provides explanations and concrete examples of the five answers that all statements of purpose must provide: trajectory,

focus, accomplishments, aims, and fit. Written by a scholar who has coached applicants to successful admission to programs at the University of Chicago, Northwestern University, and the University of Southern California, among others, this guide will offer a window onto what humanities graduate programs in the United States are looking for, and what they need to know in order to accept your application.
