Introducing a NEW addition to our growing

library of computer science titles, *Algorithm Design and Applications*, by Michael T. Goodrich & Roberto Tamassia! *Algorithms* is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia

believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement. *Big Blondes, Piano, and Running* Calgary : Red

Katie's Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South

Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie's Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with

tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library

and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of *Greek Revival from the Garden: Growing and Cooking for Life*, offers a foreword about her friendship with Katie and her admiration of Katie's dream to end hunger one garden at a time. *Infrastructure Planning Handbook* Pearson Education India "Between 1921 and 1933, Otto Dix (1891-1969) created many portraits of his lover and later wife,

Martha. Representative paintings, watercolors, drawings, and humorous sketches show Martha Dix in various roles: as a sophisticated, emancipated woman; as muse and intellectual companion; as mother and center point of the family. The painter's different attitudes toward his model, which range from admiration to intimacy to increasing distance, are transposed into a multiplicity of different types of portraits. The titles of the works, from emotionally

charged to matter-of-fact description, underscore this impression. Martha's portraits show more than just the art of Otto Dix in its many facets. They also reflect the urban flair, fashion, music, dance, and traditional and new gender roles in the 1920s."--BOOK JACKET. *From the Lyrics and Legends of Canada* Hatje Cantz Pub US Audience: Mechanical Engineers (215,000), Architects (113,000), Civil Engineers (228,000), Environmental Engineers (47,000) Numerous
