The Skeletal System Human Anatomy Physiology Skeletal System Anatomy of the Skeletal System The skeleton is subdivided into two divisions: the axial skeleton, the bones that form the longitudinal axis of the body, and the appendicular skeleton, the bones of the limbs and girdles. Skeletal System Anatomy and Physiology - Nurseslabs Introduction: The adult human skeleton is a framework of 206 bones [...] Scapula Bone - Anterior Anatomy The bone markings of the anterior scapula include the superior border, medial border, lateral border, superior angle, lateral angle, inferior angle, coracoid process, suprascapular notch, glenoid cavity, infraglenoid tubercle, and the suprascapular fossa.
