The religion of Jesus or the religion about Jesus? The cross as Christ's atoning sacrifice or as a courageous, prophetic martyrdom? With a pastoral/prophetic voice and insights derived from a lifetime in parish ministry and theological education, Meeting Jesus the Christ Again encourages the reader to rethink these and other hotly disputed issues of Christian faith. Taking a big-picture perspective and seeking common ground, Chesnut points us toward a "neo-classical" faith. This engaging book calls us back to the vital center of historic Christian faith.

Built around 1200 and now a UNESCO World Heritage Site that draws more than a million visitors and pilgrims each year, Chartres Cathedral is one of the jewels of Western Civilization. How Chartres Cathedral and its priceless stained glass (today the largest such collection in one location) survived World War II's widespread destruction of cultural monuments is one of the great stories of recent history. Saving the Light at Chartres begins half a decade before World War II, when a young French architect developed a plan to save the cathedral's precious stained glass. As war engulfed Europe in the fall of 1939, master glass artisans dismantled the hundreds of windows, and soldiers, tradesmen, and laborers with local

volunteers crated thousands of glass panels, stowed them in the crypt, and months later—just before German invaders reached Chartres—hailed them across the country to an underground quarry. This effort to save the stained glass is but a prologue. By August 1944, the U.S. Army had broken out of Normandy and was racing across France toward Paris and the Seine. Chartres became a key battleground. Allied bombing blew out the cathedral's temporary window coverings, and when the Americans—assisted by French Resistance fighters—entered the city in the face of unexpectedly heavy defiance and snipers in the cathedral, many soldiers believed German artillery spotters were occupying the cathedral's spires. When Colonel Welborn Griffith

Jr.—a senior operations officer of Twentieth Corps in Patton's Third Army—arrived, some were pressing to countermand the army's standing order to avoid the cathedral and threatened to destroy it to neutralize the German spotters. Griffith was skeptical. He inspected the cathedral himself, climbed its towers, but found no Germans, so he rang the bell, waved an American flag, and ordered that the cathedral be spared, saving it from destruction. Griffith would be killed later that day. Victor Pollak tells both stories—the rescue of the windows and Colonel Griffith's fateful role—in a compelling narrative. *Saving the Light at Chartres* honors the government and local teams who saved the windows, the Resistance that performed a vital role in the

liberation of Chartres, Welborn Griffith, and the enduring treasure that is Chartres Cathedral.

Drawing on the works of Shakespeare and American screenwriter Joss Whedon, this study in narrative ethics contends that Whedon is the Shakespeare of our time. The Bard wrote before the influence of the modern moral philosophers, while Whedon is writing in

the postmodern period. It is argued that Whedon's work is more in harmony with the early modern values of Shakespeare than with modern ethics, which trace their origin to 17th and 18th century moral philosophy. This study includes a detailed discussion of representative works of Shakespeare and Whedon, showing how they can and should be read as forms of narrative ethics.

Becoming a Great Essayist CRC Press
As the Bible indicates, our lives are a construction zone, for our bodies are temples of the divine Spirit. Formed initially in the image of God, human beings lost intimacy with God through corruption, rebellion, or neglect. In response, the divine Creator loves us back into relationship, providing means of grace to help restore us to wholeness,

beginning with our body and continuing through our mind, soul, and spirit. As buildings need cleaning, maintenance, and ongoing care, so our inner temple needs spiritual stimulus, cleaning, and care. Rebuilding the Temple is the fourth book in Vande Kappelle's series on spirituality and the arts. Books in this series reinforce the essential principle underlying all authentic spirituality: "Go deep in any one place and you will meet the infinite aliveness that is God, for God is everywhere!" Whereas earlier books consider the connection of spirituality with creative arts such as poetry, film, music, theater, drama, dance, and modern literature, this volume takes readers on a journey through classic Christian literature, beginning with the Bible and continuing through

inspirational works written by diverse spiritual mentors such as Augustine, Dante, Luther, Calvin, Teresa of Ávila, George Fox, Blaise Pascal, Henri Nouwen, A. W. Tozer, John McLaren, John Shelby Spong, Richard Rohr, and Marcus Borg. Reading their works reminds us that Christian literature is most practical and inspirational when it takes a narrative approach to theology, interpreting the spiritual journey through the ongoing stories of people and communities rather than trying to capture timeless truths analytically or through rational argumentation. Like its companion texts, *Wading on Water*, *Deep Splendor*, and *Deeper Splendor*, this volume is useful for individual or group study. Each chapter concludes with questions suitable for discussion or

reflection.

 K347191 BCC Drinking water quality is a sensitive issue, and the public is constantly barraged by contaminant reports now routinely at parts-per-trillion. Protection from microbial disease risks from drinking water must always be predominant; trace chemicals usually fall farther down the scale of possible health risks, but even negligible detections raise public concerns. Drinking Water Quality and Contaminants Guidebook presents information and guidance on drinking water quality and regulatory issues reflecting experiences and judgments from the author's more than 43 years of extensive experience. It contains digested comprehensive information on important chemical,

microbial, and radionuclide water contaminants, and discussions of several drinking water-related policy issues. Information is presented for long-standing regulated contaminants and chemicals of emerging concern in understandable terms for professionals and non-experts alike. Dossiers contain readily accessed information on sources, physical and chemical properties, toxicity, analytical methodology, water treatment technology, regulations and health advisories, and also include World Health Organization Guidelines. Aesthetic and acceptance factors such as water hardness and salinity that influence public perceptions of drinking water quality are also addressed. Features: Compiles and interprets essential information on numerous key

chemical, microbial, and radionuclide water contaminants Provides standardized entries for each contaminant, including occurrence, health, analytical, water treatment, regulations, and World Health Organization guidance and recommendations with source citations Examines many water-related topics including fracking, potable water reuse, desalination, boil water notices, bottled water, foodborne and waterborne disease, and public perceptions about public drinking water quality Provides essential information and the basis for management of many long-standing contaminants such as lead, mercury, disinfection by-products, E. coli, and also emerging issues such as legionella, glyphosate, BPA, and more
