Armed with clear and powerful evidence, Atif Mian and Amir Sufi reveal in House of Debt how the Great Recession and Great Depression, as well as the current economic malaise in Europe, were caused by a large run-up in household debt followed by a significantly large drop in household

spending. Though the banking crisis captured the public's attention, Mian and Sufi argue strongly with actual data that current policy is too heavily biased toward protecting banks and creditors. House of Debt: How They (And You) Caused the Great ... They argue that the run up in household debt was one of the major causes of the Recession due to how the debt was financed. They offer an in

depth exploration of the mortgage backed securities market and collateral debt. This is a dense, but insightful work on the causes of the Great Recession in the US.
