Structure in four novels by H. G. Wells

Kipps: The Story of a Simple Soul is a novel by H. G. Wells, first published in 1905. Humorous yet sympathetic, the perceptive social novel is generally regarded as a masterpiece, and it was his own favourite work Plot: The protagonist of the Bildungsroman is Arthur "Artie" Kipps, an illegitimate orphan. In Book I ("The Making of Kipps"), he is raised by his aged aunt and uncle, who keep a little shop in New Romney, on the southern coast of Kent. He attends the Cavendish Academy ("a middle-class school," not a "boarding school,") in Hastings, in East Sussex. "By inherent nature he had a sociable disposition," and befriends Sid Pornick, the neighbour's boy. Kipps falls in love with Sid's younger sister, Ann. Ann gives him half a sixpence as a token of their love when, at 14, he is apprenticed to the Folkestone Drapery Bazaar, run by Mr. Shalford. However, the Pornicks move away and Kipps forgets Ann. He becomes infatuated with Helen Walshingham, who teaches a wood carving class on Thursday nights. When Chitterlow, an actor and aspiring playwright, meets Kipps by running into him with his bicycle, their encounter turns into an inebriated evening that leads to Kipps being "swapped" (dismissed). However, before he leaves Mr. Shalford's establishment, Chitterlow brings to his attention a newspaper advertisement that leads to an unsuspected inheritance for Kipps from his grandfather of a house and £26,000. In Book II ("Mr. Coote the Chaperon"), Kipps fails in his attempt to adapt to his new social class while he lives in Folkestone. By chance, he meets a Mr. Coote, who undertakes his social education; that leads to renewed contact

with Helen Walshingham, and they become engaged. However, the process of bettering himself alienates Kipps more and more, especially since Helen has taken advantage of Kipps's fortune to establish herself and her brother in London society. Chance meetings with Sid and then Ann, now a house servant, lead to a decision to abandon

..... Herbert George Wells (21 September 1866 - 13 August 1946), usually referred to as H. G. Wells, was an English writer. He was prolific in many genres, writing dozens of novels, short stories, and works of social commentary, satire, biography, and autobiography, including even two books on war games. He is now best remembered for his science fiction novels and is often called a "father of science fiction," along with Jules Verne and Hugo Gernsback. During his own lifetime, however, he was most prominent as a forward-looking, even prophetic social critic who devoted his literary talents to the development of a progressive vision on a global scale. A futurist, he wrote a number of utopian works and foresaw the advent of airplanes, tanks, space travel, nuclear weapons, satellite television and something resembling the World Wide Web. His science fiction imagined time travel, alien invasion, invisibility, and biological engineering. Brian Aldiss referred to Wells as the "Shakespeare of science fiction." His most notable science fiction works include *The Time Machine* (1895), *The Island of Doctor Moreau* (1896), *The Invisible Man* (1897), and *The War of the Worlds* (1898). He was nominated for the Nobel Prize in Literature four times. Wells's earliest specialised training was in biology, and his thinking on ethical matters took place in a specifically and fundamentally Darwinian context. He was also from an

early date an outspoken socialist, often (but not always, as at the beginning of the First World War) sympathising with pacifist views. His later works became increasingly political and didactic, and he wrote little science fiction, while he sometimes indicated on official documents that his profession was that of journalist....

The World Set Free is H. G. Wells' prophetic 1914 novel, telling of world war and the advent of nuclear weapons. Although Wells' atomic bombs only have a limited power of explosion, they keep on exploding for days on end. "Never before in the history of warfare had there been a continuing explosive; indeed, up to the middle of the twentieth century the only explosives known were combustibles whose explosiveness was due entirely to their instantaneousness; and these atomic bombs which science burst upon the world that night were strange even to the men who used them."

Most people in this world seem to live "in character"; they have a beginning, a middle and an end, and the three are congruous one with another and true to the rules of their type. You can speak of them as being of this sort of people or that. They are, as theatrical people say, no more (and no less) than "character actors." They have a class, they have a place, they know what is becoming in them and what is due to them, and their proper size of tombstone tells at last

how properly they have played the part. But there is also another kind of life that is not so much living as a miscellaneous tasting of life. One gets hit by some unusual transverse force, one is jerked out of one's stratum and lives crosswise for the rest of the time, and, as it were, in a succession of samples. That has been my lot, and that is what has set me at last writing something in the nature of a novel.

*H.G. Wells's The Time Machine* Good Press

The Time Machine is one of the most important works of science fiction. It greatly influenced the genre and continues to be widely read at all levels. This reference guide overviews the novel

for students and general readers. Written by a leading scholar on H.G. Wells, the volume covers all aspects of the work, including its plot, textual history, historical and intellectual contexts, themes, style, and reception. Written more than 100 years ago, H.G. Wells' first novel forever shaped the course of science fiction. Of all his vast writings, *The Time Machine* seems most likely to ensure his permanent place in literary history. But more than a literary work, it is now widely recognized as a key text in the history of ideas, for the notion of time travel has profoundly influenced human thought. So too, with its bleak view of the future, *The Time Machine* has made a seminal contribution to the ongoing debate concerning the future course of evolution. Though *The Time Machine* is widely read and studied, there is relatively little written about it. Prepared by a leading authority on H.G. Wells, this reference is a convenient introductory guide to the novel. It examines all aspects of the work, including its textual history, historical and intellectual contexts, themes, literary style, and critical reception. The volume also includes a detailed plot summary and an extensive bibliographic essay.

As a gift to readers, this ebook edition includes an excerpt from *The Map of Chaos*. *The Invisible Man* is the most famous novel by the famous English writer H.G. Wells. It describes the fate of the scientist-physicist Griffin, who invented a machine that makes a person invisible. But for all the sensationalism of the discovery it concealed in itself a lot of pretty uncomfortable situations. In such situations the main hero of the novel always finds himself. The tragic story of a talented scientist who imagines himself a "superman" is distinguished by a tense, almost detective storyline and strikes a combination of psychological and everyday authenticity with the fantasy of the events taking place. *The Invisible Man* by H G WELLS : *The Invisible Man Annotated* *The Invisible Man* is a science fiction novel by H. G. Wells. "In the night, he must have eaten and slept; for in the morning he was himself again, active, powerful, angry and malignant, prepared for his last great struggle against the world." Griffin, an ingenious research scientist, develops a process that can render physical objects invisible. Having successfully performed it on himself, he

soon realises that it is impossible to survive like this. and now this invisible man is desperate to reverse the process. Will Griffin be able to become visible again? Or Will his obsession for invisibility result in his doom? An outstanding work of science fiction, H. G. Wells' the Invisible Man brings forth the destructive effects science can have on humanity.
