African Animals ABC A&C Black
 Kingdon's remarkable seven-volume masterwork on East African mammals concludes with two volumes on the bovids, placing them in a broad comparative, ecological, and evolutionary context. Volume IIIC covers cattle, water buffalo, kudus, elands, dwarf antelopes, duikers, reedbucks, and waterbucks; IIID covers gazelles, impalas, wildebeests, oryxes, sheep, and goats. In addition to the stunning, lifelike drawings that are an integral part of the text, the volumes include a reappraisal of bovid taxonomy and original analyses of the form and function of body shape and size, horn shape, coat pattern, and tooth structure.
Wild Ways Springer Science & Business Media
 Wild Ways brings together all the latest studies of the behaviour of southern Africa's rich and accessible mammal fauna, describing not only what mammals do, but also the often

surprising reasons why they do it, and covers species as diverse as fruit bats, pangolins, lions, rats and whales. Well-established as an invaluable resource for visitors to parks and reserves, hikers, hunters, farmers and outdoor enthusiasts, this classic guide has now been thoroughly updated and revised, has a fresh, lively design, and is packed with new and engrossing detail.
Mammals of Africa: Volume II Penguin Random House South Africa
 The essential mammal guide to take on safari, covering every African land mammal. Originally published in 2004, the Kingdon Pocket Guide to African Mammals quickly became the field guide of choice to take on African safaris. Its compact format makes it ideal for use in the field, while its coverage is the most comprehensive currently possible in this format. Adapted from the Kingdon Field Guide to African Mammals, the greatly condensed text focuses on essential information such as identification and distribution, while the author's superb illustrations have been rearranged into an easy-to-use plate format and placed opposite the text. Complex and more obscure

groups like the bats and certain rodent families are summarised by genera. Over 500 maps plot the distribution of all larger species, and for smaller mammals the maps show distribution by genus. This is a completely revised second edition of this popular guide. The information and taxonomy have been updated to follow the newly published second edition of the Kingdon Field Guide to African Mammals (2015), and this new edition of the pocket guide contains several new species and illustrations. The maps have been completely replaced and there are now 200 more maps than in the original edition.

The Kingdon Field Guide to African Mammals Struik Pub

'Mammals of Africa' is a series of six volumes which describes, in detail, every currently recognised species of African land mammal. This is the first time that such extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution (including reference to fossil and molecular data) of Africa's mammals.

African Ungulates University of Chicago Press

Mammals of Africa (MoA) is a series of six volumes which describes, in detail, every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution (including reference to fossil and molecular data) of Africa's mammals. With more than 1,160 species and 16-18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format, with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned, as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina, and written by more than 350 authors, all experts in their fields, Mammals of Africa is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume II is edited by Thomas Butynski, Jonathan Kingdon and Jan Kalina and contains profiles of 93 species of primates; this includes the great apes, Old World monkeys, lorises and galagos.

Mammals of Africa: Volume III Legare Street Press

Mammals of Africa (MoA) is a series of six volumes which describes, in detail, every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution (including reference to fossil and molecular data) of Africa's mammals. With more than 1,160 species and 16-18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format, with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned, as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina, and written by more than 350 authors, all experts in their fields, Mammals of Africa is as comprehensive a

compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. This first volume in the series comprises eight introductory chapters covering topics such as evolution, geography and geology, biotic zones, classification, behaviour and morphology. The rest of the book is devoted to the Afrotheria, a grouping that comprises six orders and 49 species; these are the hyraxes, elephants, manatees, otter-shrews, golden-moles, sengis (elephant-shrews) and Aardvark.

The Natural History of South Africa; Mammals; Volume 3

Univ of California Press

The ultimate compact, quick ID guide to southern and East African animal behaviour, and the latest in the popular series of 'quick guides' to wildlife. This title: • describes and explains the habits of the more commonly found mammals of southern and East Africa; • matches concise text with action photographs that capture characteristic behaviour; • serves as a companion volume to more detailed field guides; • provides a quick reference and easy read for anyone interested in understanding wild animals and their sometimes baffling rituals.

The Safari Companion Bloomsbury Publishing

This detailed 1983 study of the African buffalo is distinguished by the extraordinary first-hand data obtained by the author in ten years of study. During this time, Dr Mloszewski virtually lived with the herds, moving among the animals and becoming accepted by them as a companion in their wanderings. The result is a book written from a highly unusual viewpoint and containing unique data. The book discusses the ancestry, zoological classification, and biogeographical setting of the African buffalo and describes the interactions of buffaloes with other species. The individual and collective behavior of the buffalo in the wild, as directly observed by the author, is the central subject, covering herd movements, feeding activities, hierarchies and individuals and agnostic, reproductive and other behaviors.

The Behavior Guide to African Mammals Penguin Random House South Africa

Detailed anatomical illustrations accompany information on the appearance, habits, geographical distribution, and evolutionary changes of the smaller mammals of Kenya, Uganda, and Tanzania. Bibliogs

East African Mammals Penguin Random House South Africa

East Africa comprises a range of habitats that provide living space for more than 360 diverse species of mammal. These vary in size from the massive elephant to the tiniest bats, shrews and mice. This compact guide covers all of the common and some of the less common mammal species of the region. For each species it offers: • key identification features, behaviour, diet, breeding biology, occurrence and size • clear, full-colour photographs • track illustrations • silhouettes to indicate size relative to human figure • distribution map A section on droppings/dung of many of the animals, as well as that of relative tracks, conclude the book. Compact and easy-to-use, this is the ideal companion both for regulars and visitors to the region.

Stuarts' Field Guide to the Larger Mammals of Africa Bloomsbury Publishing

Mammals of Africa (MoA) is a series of six volumes which describes, in detail, every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology,

distribution, biology and evolution (including reference to fossil and molecular data) of Africa's mammals. With more than 1,160 species and 16-18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format, with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned, as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina, and written by more than 350 authors, all experts in their fields, *Mammals of Africa* is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume III, edited by David Happold, has profiles of 395 species of rodents, comprising the squirrels, dormice, jerboas, blind mole-rats, African root-rats, pouched rats and mice, Swamp Mouse, climbing mice, fat mice, White-tailed Rat, rock mice, voles, Maned Rat, spiny mice, brush-furred mice, gerbils, jirds, taterils, African Forest Mouse, rats and mice, vlei rats, whistling rats, anomalures, springhares, gundis, African mole-rats, porcupines, Noki (Dassie Rat), cane rats and Coypu. The volume concludes with 13 species of hares and rabbits.

Detailed anatomical illustrations accompany information on the appearance, habits, geographical distribution, and evolutionary changes of the smaller mammals of Kenya, Uganda, and Tanzania. Bibliogs

[The Natural History of South Africa; Mammals; Volume 1](#) Bloomsbury Publishing

This ebook is the complete guide to the mammal fauna of Africa. Optimised for iPad, this guide will enable identification of all 460 land mammals likely to be seen anywhere in Africa. Detailed accounts, with colour illustrations, are provided for most species, but some complex small mammal groups are summarized by genera. The colour illustrations show both sexes in sexually dimorphic species, and there are also a wealth of line drawings illustrating typical behaviours, the function of camouflaged or disruptive markings and the details of interspecific variation among closely allied species. Fully zoomable distribution maps show the ranges of most species covered. Heading to any part of Africa? Don't leave home without this indispensable guide.

[Portraits in the Wild](#) Chelsea Green Publishing

"A work of tremendous scope. . . . Amateur naturalists and tourists to the parks of Africa and finally professionals will find this a stimulating, well-documented summary."--John F. Eisenberg, Florida Museum of Natural History "We have seen in the field how very helpful and informative *The Behavior Guide* is. Our knowledgeable safari guides turned often to their prized and already well-thumbed copies, and we continue to refer to ours now that we are back home."--Douglas F. Williamson, Jr., National Council, World Wildlife Fund, U.S. "A fascinating, perceptive, and enjoyable travel companion heightens the pleasure of being afield. *The Behavior Guide to African Mammals* is that ideal companion. Lucid, accurate, and marvelously illustrated, the book

is a basic reference for anyone interested in natural history."--George B. Schaller, author of *The Serengeti Lion* and *The Deer and the Tiger* "A remarkable review of what is known about the larger African mammals."--A.R.E. Sinclair, The Ecology Group, University of British Columbia

Field Guide to Mammals of Southern Africa University of Chicago Press

A new guide to all the larger African mammals, fully illustrated, with over 400 color photos for easy identification. Concentrates on the more visible and easily distinguished larger mammal species, as well as on some of the more frequently seen smaller mammals. Gives detailed coverage of all the families except bats, smaller insectivores, and smaller rodents. This book does cover the five species of hedgehogs, the pangolins, and rabbits, ground squirrels, springhare, and porcupines.

This revised edition surveys key aspects of hippopotamuses, describing these African animals' appearance, behaviors, and habitats. A folk tale explains why hippos live mostly in water.

[Behaviour Briefs](#) Cambridge University Press

An authoritative pocket guide to the mammals of North Africa and the Middle East This handy guide provides an introduction to more than 120 species of mammals found in North Africa and the Middle East. The authoritative text includes key facts about identification, habitat, behaviour, distribution and status, and each species is illustrated with colour photographs, including many never previously published. Illustrated with clear colour photography and brief but authoritative descriptions the Pocket Photo Guides highlight the species of birds and animals from each region that the traveller is most likely to see, as well as those that are genuinely endemic (only to be seen in that country or region) or special rarities. The genuine pocket size allow the books to be carried around on trips and excursions and will take up minimal rucksack and suitcase space.

The Kingdon Pocket Guide to African Mammals University of Chicago Press

Jonathan Kingdon, one of the world's foremost authorities on African mammals, has both written and illustrated this landmark field guide. The unique combination of his extensive field experience and artistic talent has produced a stunning work that sets new standards. The concise text provides full information on identification, distribution, ecology, relationships and conservation status, with introductory profiles that summarise the characteristics of each mammal group. All known species of African land mammal are covered, with coverage of several of the more complex groups of small mammals simplified by reference to genera. Classification has been fully updated and this new edition includes many newly recognised species. With over 780 colour illustrations, numerous line drawings and more than 520 maps, this book will be an essential companion to anyone visiting Africa or with an interest in the mammals of the continent. Competition note: There are regional mammal books covering southern Africa, for example, but none that covers the whole continent in a portable format. The smaller-format and more concise Kingdon Pocket Guide to African Mammals may be more appealing to a more general safari market, but is much less comprehensive and more out of date.
