For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Pro Office 2007 Development with

VSTO Prentice Hall
Experienced author Ty Anderson cuts to the chase in explaining how professional Microsoft Office 2007 solution developers get the job done. Ty is a professional Microsoft application

developer working each and every day with the Visual Studio Tools for Office (VSTO) technology, and his real-world experience will teach you exactly what you need to know to excel in your professional development career. Pro Office 2007 Development with VSTO takes you far beyond traditional Visual Basic for Applications (VBA) programming, showing you how to transform Microsoft Office 2007 into a complete enterprise application development platform. By the end of the book, you will be creating your own powerful, customized Office business applications (OBAs), using the techniques Ty has taught you throughout. The author demonstrates how to leverage all aspects of the Microsoft Office application platform (covering Word, Excel, Outlook, PowerPoint, Visio, and InfoPath) so you can create OBAs that increase information worker productivity, unlock business data stored in documents,

reduce end-user training costs, increase developer productivity, and reduce IT operations costs. This book takes you beyond the basics of VSTO with expert topics such as automation with the Office application object models and includes detailed examples throughout.

Build mobile apps that specifically target your company's unique business needs, with the same ease of writing a simple spreadsheet! With this book, you will build business apps designed to work with your company's systems and databases, without having to enlist the expertise of costly, professionally trained software developers. In *Beginning PowerApps*, author and business applications expert Tim Leung guides you step-by-step through the process of building your own mobile app. He assumes

no technical background, although if you have worked with Excel, you are one step closer. He guides you through scenarios, such as what to do if you have existing databases with complex data structures and how to write screens that can connect to those data. You will come away with an understanding of how to set up screen navigation, manipulate data from within apps, and write solutions to perform specific tasks.

What You'll Learn Connect with data Write formulas Visualize your data through charts Work with global positioning systems (GPS) Build flows Import and export data Manage offline scenarios Develop custom application programming interfaces (API) Who This Book Is For

Beginners and non-developers, and assumes no prior knowledge of PowerApps
