concrete sea structures 3rd edition**
CRC Press

This manual was prepared for the
Bureau of Reclamation of the United
States Department of the Interior. It
discusses the Bureau of Reclamation's

methodology for concrete repair,
addresses the more common causes of
damage to concrete, and identifies the
methods and materials most successful
in repairing concrete damage. This guide
contains the expertise of numerous
individuals who have directly assisted
the author on many concrete repair
projects or freely shared their concrete
repair knowledge whenever requested.

Builder 3 & 2 John Wiley & Sons

This book provides comprehensive
guidance on maintaining old waterfront
structures, particularly gravity walls
constructed with stone masonry, brick,
blocks or mass concrete. It will be
valuable for all engineers responsible for
such structures.

The Mightiest of Them All: Memories of Grand Coulee Dam presents the experiences of L. Vaughn Downs from the time he started working on the dam when it was in the design stage, through the construction period and into many years of actual dam operation and maintenance. He provides glimpses into the personalities connected with the project and explains the many techniques and pieces of equipment that were developed or improved as the dam was built. Downs also devotes considerable attention to problems they encountered and the solutions developed in the hope that others will learn from these situations. This revised edition brings the story up to the current period with an examination of the upkeep and condition of the dam after 50 years, and its prospects for the future. Engineers, architects, and interested general readers will feel the thrill of this extraordinary dam, as the informative text and bounty of photographs illustrate various stages of construction and the dramatic rates of progress attained.
