Constitutional Bricolage Routledge
Each of these Analysing Architecture Notebooks is devoted to a particular theme in understanding the rich and varied workings of architecture. They can be thought of as addenda to the foundation volume Analysing Architecture, which first appeared in 1997 and has subsequently been enlarged in three further editions.

Examining these extra themes as a series of Notebooks, rather than as additional chapters in future editions, allows greater space for more detailed exploration of a wider variety of examples, whilst avoiding the risk of the original book becoming unwieldy. As children we make places spontaneously: on the beach, in woodland, around our homes... Those places are evidence of a natural language of architecture we all share. Beginning with the child as seed and agent of the places it makes, initial sections of Children as Place-makers

illustrate the key ‘verbs’ that drive that natural language of architecture. Later sections look at the core importance of the circle of place, how as children we are drawn to inhabit boxes, and the narrative possibilities that arise when place is linked with imagination. The principal messages of this Notebook are that it is by place-making we make sense of the space of the world in which we live, and that the first step in becoming a professional architect is to re-awaken the innate architect inside each of us.

Digital Playgrounds explores the key developments, trends, debates, and controversies that have shaped children’s commercial digital play spaces

over the past two decades. It argues that children’s online playgrounds, virtual worlds, and connected games are much more than mere sources of fun and diversion – they serve as the sites of complex negotiations of power between children, parents, developers, politicians, and other actors with a stake in determining what, how, and where children’s play unfolds. Through an innovative, transdisciplinary framework combining science and technology studies, critical communication studies, and children’s cultural studies, Digital Playgrounds focuses on the contents and contexts of actual technological artefacts as a necessary entry point for understanding the meanings and politics of children’s digital play. The discussion draws on several research studies on a

wide range of digital playgrounds designed and marketed to children aged six to twelve years, revealing how various problematic tendencies prevent most digital play spaces from effectively supporting children's culture, rights, and – ironically – play. *Digital Playgrounds* lays the groundwork for a critical reconsideration of how existing approaches might be used in the development of new regulation, as well as best practices for the industries involved in making children's digital play spaces. In so doing, it argues that children's online play spaces be reimagined as a crucial new form of public sphere in which children's rights and digital citizenship must be prioritized.

Uniquely blending anthropological and exchange theory, Professor Garvey offers a new interpretation of American constitutional development. His thesis: judicial reliance on a limited stock of received forms has inhibited the development of new concepts that could adequately reflect fundamental changes in society. Professor Garvey reviews the history of the Supreme Court in light of the "bricolage" theory. The Court, by interpreting the Constitution to effect laissez-faire and Social Darwinism, helped bring about a society ostensibly patterned on the buyer-seller model, marked by free exchange and "liberty of contract." New departures by the Court in the areas of free speech and criminal justice, according to the author, evidence a recognition of present

inequities and a determination to change them; but to the extent the Court remains loyal to a buyer-seller model, it practices an unrealistic jurisprudence. Originally published in 1971. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

How Boston Played Saqi Sport in the lives of young Australians offers an informative look into the practice of sport, the nature of children's and young people's experiences, and its significance for their development.

Perspectives on Play AuthorHouse "Whether consciously molding the city through the construction of public spaces or developing social ties through organizations such as athletic clubs, Bostonians of all classes participated in recreation-based community building,

often at cross-purposes. Elite Bostonians, for instance, promoted the establishment of parks as a healthy alternative to unsavory activities, such as drinking and gambling, that they associated with the city's vast new pool of immigrants. They were soon forced to compromise, however, with citizens who were less interested in the rhetoric of moral uplift than in using the parks for competitive athletics and commercial amusements."--BOOK JACKET.

Lebanon today is at a fateful crossroads in its eventful socio-cultural and political history. Imperiled by unsettling transformations, from postwar reconstruction and rehabilitation to the forces of postmodernity and globalism, it remains adrift. In this landmark study, Samir Khalaf explores how ordinary citizens, burdened by the consequences of an ugly and unfinished war, persisting regional rivalries, mounting economic deprivation and diminishing prospects for well-being, find meaning and coherence in a society that has not only

lost its moorings and direction, but also its sense of control. Khalaf argues that a mood of lethargy and indifference prevails, with a growing tendency for the Lebanese to seek refuge in religiosity, communalism and cloistered spatial identities, or temporary relief in the allure of mass consumerism. 'Timely and provocative ... Samir Khalaf offers an empirically rich and theoretically broad survey of Lebanese society.' Craig Larkin, University of Exeter 'Samir Khalaf is the foremost scholar writing on Lebanese politics and society today. This book re-affirms his stature with its keen observations, eloquent prose and impassioned arguments about the escapist and narcissistic maladies afflicting postwar Lebanon.' Akram Khater, North Carolina State University

'A skilled sociological reading of contemporary Lebanon by a master of the discipline.' Augustus Richard Norton, Boston University and University of Oxford

Play is of critical importance to the well-being of children across the globe, a fact reflected in Article 31 of the United Nations Convention on the Rights of the

Child. Yet existing literature on the subject is largely confined to discussing play from a developmental, educational or psychological perspective.

Researching Play from a Playwork Perspective offers a new and exciting angle from which to view play, drawing on the authors' own experience of conducting research into various aspects of this all-important and pervasive phenomenon. This innovative work will act as a compass for those looking to undertake research into different aspects of play and child welfare. Each chapter explores how the author has combined established and new research methodologies with their individual playwork approaches to arrive at emergent understandings of playwork research. The overall conclusion

discusses directions for future research and develops a new model of playwork research from the four common themes that emerge from the contributions of individual authors: children's rights, process, critical reflection, and playfulness. Examples from the United Kingdom, Nicaragua, and Sweden give this unique work international relevance. *Researching Play from a Playwork Perspective* will appeal to researchers and students around the world working in the fields of playwork, childcare, early years, education, psychology and children's rights. It should also be of interest to practitioners in a wide variety of professional contexts, including childcare and therapy.

Drawing evidence from transatlantic literary texts of childhood as well as from nineteenth and early twentieth century children's and family card, board, and parlor games and games manuals, *Nineteenth-Century Fictions of Childhood and the Politics of Play* aims to reveal what might be thought of as "playful literary citizenship," or some of the motivations inherent in later nineteenth and early twentieth century Anglo-American play pursuits as they relate to

interest in shaping citizens through investment in "good" literature. Tracing play, as a societal and historical construct, as it surfaces time and again in children's literary texts as well as children's literary texts as they surface time and again in situations and environments of children's play, this book underscores how play and literature are consistently deployed in tandem in attempts to create ideal citizens – even as those ideals varied greatly and were dependent on factors such as gender, ethnicity, colonial status, and class.

Child-initiated, creative play is returning after decades of erosion. Through the hard work and dedicated efforts of play

activists, new opportunities for play are arising, including the use of open-ended play materials in schools, parks, nature centers, and adventure playgrounds. Over 20 play initiatives are described in this book, with dozens of photographs that illustrate the power of play.

Action Games contains more than forty games that the teacher can use to enrich her activity period. Many of the games require no special materials; others call for readily obtainable equipment, such as whistles, balloons, volleyballs, playground balls, tennis balls, and masking tape. The directions for each game suggest whether it should be played indoors or outdoors.

Jonathan Cape

In this long-awaited work, Samir Khalaf analyzes the history of civil strife and political violence in Lebanon and reveals the inherent contradictions that have plagued that country and made it so vulnerable to both inter-Arab and superpower rivalries. How did a fairly peaceful and resourceful society, with an impressive history of viable pluralism, coexistence, and republicanism, become the site of so much barbarism and incivility? Khalaf argues that historically internal grievances have been magnified or deflected to become the source of international conflict. From the beginning, he shows, foreign interventions have consistently exacerbated internal problems. Lebanon's fragmented political culture is

a byproduct of two general features. First, it reflects the traditional forces and political conflicts caused by striking differences in religious beliefs and communal and sectarian loyalties that continue to split the society and reinforce its factional character. Second, and superimposed on these, are new forms of socioeconomic and cultural stress caused by Lebanon's role in the continuing international conflicts in the region. Khalaf concludes that Lebanon is now at a crossroads in its process of political and social transformation, and proposes some strategies to re-create a vibrant civil and political culture that can accommodate profound transformations in the internal, domestic sphere as well as mediate developments taking place internationally. Throughout, Khalaf

demonstrates how the internal and external currents must be considered simultaneously in order to understand the complex and tragic history of the country. This deeply considered and subtle analysis of the interplay of complex historical forces helps us to imagine a viable future not only for Lebanon but also for the Middle East as a whole.

The Bourj in central Beirut is one of the world's oldest and most vibrant public squares. Named after the mediaeval lookout tower that once soared above the city's imposing ramparts, the square

has also been known as Place des Canons (after a Russian artillery build-up in 1773) and Martyrs' Square (after the Ottoman execution of nationalists in 1916). As an open museum of civilizations, it resonates with influences from ancient Phoenician to colonial, post-colonial and, as of late, postmodern elements. Over the centuries it has come to embody pluralism and tolerance. During the Lebanese civil war (1975-90), this ebullient entertainment district, transport hub and melting-pot of cultures was ruptured by the notorious Green Line, which split the city into belligerent warring factions. Fractious infighting and punishing Israeli air raids compounded the damage, turning the Bourj into a no-man's-land. In the wake of former Prime Minister Rafik al-Hariri's

assassination (14 February 2005), the Bourj witnessed extraordinary scenes of popular, multi-faith and cross-generational protest. Once again, Samir Khalaf argues, the heart of Beirut was poised to re-invent itself as an open space in which diverse groups can celebrate their differences without indifference to the other. By revisiting earlier episodes in the Bourj's numerous transformations of its collective identity, Khalaf explores prospects for neutralizing the disheartening symptoms of reawakened religiosity and commodified consumerism. 'A timely and informative study on Beirut's pre-eminent patch of public space.' The Daily Star 'Khalaf has arguably contributed more fine studies on the history and sociology of modern Lebanon than has

any other scholar alive.' Foreign Affairs
'A spirited guide to Beirut's
(re)development, lively in style, rich in
